Edith Wharton as Spatial Activist and Analyst Reneé Somers, 2013-09-13 Because she devoted much of her life to exploring the relationships that exist between people and their built environment Edith Wharton developed a set of philosophies that she expressed in many arenas including interior design architecture and landscaping Her theories of space were practiced and materially executed in addition to being expressed in her writing This book explores Wharton s theories of space in Newport Rhode Island during the Gilded Age when the town was transformed from a rustic seaport to a playground for the fabulously wealthy The built environment played a pivotal role as social economic and personal conflicts were enacted among private and public spaces As a cultural worker and as an author Wharton stood squarely in the middle of these conflicts and directly participated in them Accordingly the book shows Wharton in a new light

by exploring texts such as *The Decoration of Houses* and *The House of Mirth* as well as by examining the architecture and aesthetics of three of Wharton's primary homes

Consumers' Imperium Kristin L. Hoganson, 2010-03-15 Histories of the Gilded Age and Progressive Era tend to characterize the United States as an expansionist nation bent on Americanizing the world without being transformed itself. In *Consumers' Imperium*, Kristin Hoganson reveals the other half of the story, demonstrating that the years between the Civil War and World War I were marked by heightened consumption of imports and strenuous efforts to appear cosmopolitan. Hoganson finds evidence of international connections in quintessentially domestic places: American households. She shows that well-to-do white women in this era expressed intense interest in other cultures through imported household objects, fashion, cooking, entertaining, armchair travel, clubs, and the immigrant gift movement. From curtains to clothing from around the world, parties to arts and crafts of the homelands, exhibits Hoganson presents a new perspective on the United States in the world by shifting attention from exports to imports, from production to consumption, and from men to women. She makes it clear that globalization did not just happen beyond America's shores as a result of American military might and industrial power, but that it happened at home thanks to imports, immigrants, geographical knowledge, and consumer preferences. Here is an international history that begins at home
