**Foreign Currency Volatility and the Market for French Modernist Art** David Challis,2021-08-04 Foreign Currency Volatility and the Market for French Modernist Art examines how the collapse of the French franc in the decades following the First World War activated powerful push and pull economic forces that compelled French art collectors to monetise their collections while simultaneously elevating the purchasing power of international art collectors These factors are shown to have played a significant and previously under recognised role in the large scale translocation of French modernist art that radically accelerated its commercial and critical reception across the globe and positioned it at the apex of the newly established hierarchy of modern art

Post Critical Museology Andrew Dewdney,David Dibosa,Victoria Walsh,2013-01-25 Post Critical Museology considers what the role of the public and the experience of audiences means to the everyday work of the art museum It does this from the perspectives of the art museum itself as well as from the visitors it seeks Through the analysis of material gathered from a major collaborative research project carried out at Tate Britain in London the book develops a conceptual reconfiguration of the relationship between art culture and society in which questions about the art museum s relationship to global migration and the new media ecologies are examined It suggests that whilst European museums have previously been studied as institutions of collection heritage and tradition however modern their focus it is now better to consider them as distributive networks in which value travels along transmedial and transcultural lines Post Critical Museology is intended as a contribution to progressive museological thinking and practice and calls for a new alignment of

academics and professionals in what it announces as post critical museology An alignment that is committed to rethinking what an art museum in the twenty first century could be as well as what knowledge and understanding its future practitioners might draw upon in a rapidly changing social and cultural context The book aims to be essential reading in the growing field of museum studies It will also be of professional interest to all those working in the cultural sphere including museum professionals policy makers and art managers
