Tate Modern: the Model Ruth Thomson, Bob Bass, 2001-12-31 **Model** Ladislav Kesner, 2015-08-04 **The Architectural Model** Matthew Mindrup, 2019-10-08

An investigation of different uses for the architectural model through history as sign souvenir funerary object didactic tool medium for design and architect's muse For more than five hundred years architects have employed three dimensional models as tools to test refine and illustrate their ideas But as Matthew Mindrup shows the uses of physical architectural models extend beyond mere representation An architectural model can also simulate instruct inspire and generate architectural designs It can be among other things sign souvenir toy funerary object didactic tool medium or muse In this book Mindrup surveys the history of architectural models by investigating their uses both theoretical and practical Tracing the architectural model's development from antiquity to the present Mindrup also offers an interpretive framework for understanding each of its applications in the context of time and place He first examines models meant to portray extant fantastic or proposed structures describing their use in ancient funerary or dedicatory practices in which models are endowed with magical power as a medium for architectural reverie and inspiration and as prototypes for twentieth century experimental designs Mindrup then considers models that exemplify certain architectural uses exploring the influence of Leon Battista Alberti's dictum that models be simple lest they distract from the architect's ideas analyzing the model as a generative tool and investigating allegorical analogical and anagogical interpretations of models Mindrup's histories show how the model can be a surrogate for the architectural structure itself or for the experience of its formal tactile and sensory complexity and beyond that that the manipulation play experimentation and dreaming enabled by models allow us to imagine architecture in new ways

Understanding Art Martin Wenham, 2003-03-19 In any area of the curriculum children need to learn concepts facts and skills through first hand experience In art such learning depends on exploring and experimenting with the visual language through which artists communicate and the visual elements such as line colour and shape The National Curriculum places strong emphasis on experimenting with and applying the visual elements This book systematically explores the basic knowledge needed to do this effectively The author deals with the visual elements of art their properties how they are related and especially with the ways in which children's knowledge of each can be developed through simple but creative activities Each element is placed in context with extensive cross referencing The author shows how these elements can be observed in the children's environment and provides examples of how they have been used in works of art and craft This accessible book does not assume any specialist knowledge or experience It is essential for teachers at primary and secondary levels art coordinators and for undergraduate and postgraduate level students of art education Martin Wenham is an artist calligrapher and stone carver who has exhibited at the Crafts Council He has taught at the University of Leicester and has over twenty years experience of teaching in primary and secondary schools

Models of Art Collecting and the American Response Dr Inge Reist, 2014-10-28 This collection of fourteen essays by distinguished art and cultural historians examine points of similarity and difference in British and American art collecting Half the essays examine the trends that dominated the British art collecting scene of the nineteenth century Others focus on American collectors using biographical sketches and case studies to demonstrate how collectors in the United States embellished the British model to develop their own often philanthropic approach to art collecting *Sculpture and the Museum* Christopher R. Marshall, 2017-07-05 Sculpture and the Museum is the first in depth examination of the varying roles and meanings assigned to sculpture in museums and galleries during the modern period from neo classical to contemporary art practice It considers a rich array of curatorial strategies and settings in order to examine the many reasons why sculpture has enjoyed a position of such considerable importance and complexity within the institutional framework of the museum and how changes to the museum have altered in turn the ways that we perceive the sculpture within it In particular the contributors consider the complex issue of how best to display sculpture across different periods and according to varying curatorial philosophies Sculptors discussed include Canova Rodin Henry Moore Flaxman and contemporary artists such as Rebecca Horn Rachel Whiteread Mark Dion and Olafur Eliasson with a variety of museums in America Canada and Europe presented as case studies Underlying all of these discussions is a concern to chart the critical importance of the acquisition placement and display of sculpture in museums and to explore the importance of sculptures as a forum for the expression of programmatic statements of power prestige and the museum's own sense of itself in relation to its audiences and its broader institutional aspirations *User Modeling 2007* Cristina Conati, Kathleen McCoy, Georgios Paliouras, 2007-08-28 This book constitutes the refereed proceedings of the 11th International Conference on User Modeling UM 2007 held in Corfu Greece in July 2007 Coverage includes evaluating user student modeling techniques data mining and machine learning for user modeling user adaptation and usability modeling affect and meta cognition as well as intelligent information retrieval

information filtering and content personalization *Museum Space* Kali Tzortzi, 2016-03-09 Museums are among the iconic buildings of the twenty first century as remarkable for their architectural diversity as for the variety of collections they display But how does the architecture of museums affect our experience as visitors This book proposes that by seeing space as common ground between architecture and museology and so between the museum building and its display we can illuminate the individuality of each museum and the distinctive experience it offers for example how some museums create a sense of personal exploration while others are more intensely didactic and how the visit in some cases is transformed into a spatial experience and in other cases into a more social event The book starts with an overview of the history of museum buildings and display strategies and a discussion of theoretical and critical approaches It then focuses on specific museums as in depth case studies and uses methods of spatial analysis to look at the key design choices available to architects and curators and their effects on visitors behaviour Theoretically grounded methodologically original and richly illustrated this book will equip students researchers and professionals in the fields of architecture museum studies curating exhibition design and cultural studies with a guide for studying museums and a theoretical framework for their interpretation The Psychological and Physiological Benefits of the Arts Vicky Karkou, Nisha Sajnani, Felicity Anne Baker, Jenny M.
