R.R. Bowker Company, 1982 **The Interface of International Trade Law and Taxation** Jennifer E. Farrell, 2013 This book explores the ill defined and oft underestimated relationship between the World Trade Organization WTO and taxation By adopting a two pronged approach the relationship is examined in terms of the extent to which the WTO legal framework exerts influence upon domestic tax law and international tax policy and whether it is appropriate for the WTO to play a regulatory role in the field of taxation The book begins with an examination of the historical development of international trade law and international tax law and demonstrates that these two separate areas of law are closely linked in terms of their

underlying principles and historical evolution The work then goes on to offer a doctrinal analysis of the tax content found in the WTO legal texts and highlights ambiguities therein **Taxation** ,1985 **The International Tin Cartel** John Hillman,2010-02-25 This book brings together two areas of inquiry the history of tin and its role in producing countries and the history of cartelization as a solution to the inherent difficulties of primary commodity markets **The Continuing Imperialism of Free Trade** Jo Grady,Chris Grocott,2018-10-08 In 1953 John Gallagher and Ronald Robinson shook the foundations of imperial history with their essay The Imperialism of Free Trade They reshaped how historians saw the British empire focussing not on the red bits on the map and the wishes of policy makers in London but rather on British economic and political influence globally Expanding on this analysis this volume provides an examination of imperialism which brings the reader right up to the present This book offers an innovative assessment and analysis of the history and contemporary status of imperial control It does so in four parts examining the historical emergence and traditions of imperialism the relationships between the periphery and the metropolitan the role of supranational agencies in the extension of imperial control and how these connect to financialisation and international political economy The book provides a dynamic and unique perspective on imperialism by bringing together a range of contributors both established and up and coming scholars activists and those from industry from a wide range of disciplines and backgrounds In providing these authors a space to apply their insights this engaging volume sheds light on the practical implications of imperialism for the contemporary world With a broad chronological and geographical sweep this book provides theoretical and empirical engagements with the nature of imperialism and its effects upon societies It will be of great interest to a broad range of disciplines across the humanities and social sciences especially those working in History Politics and Management and Organisation Studies
