Seidl,2024 **NBER Reporter** National Bureau of Economic Research,2004 **Financialization and the Future of the American Economy** William K Tabb,2023-07-14 Financialization is a set of processes which has led to a financially driven and commodified economy with rising inequality tax avoidance and a lack of investment in the physical and social infrastructure Given the influence of money politics and the secular increase in the burden of debt financialization has produced a deeply flawed economic system which mainstream economists are unable to address This book discusses the causes and costs of financial crises how financialization produces inequality and instability and the patterns of value extraction it enables It draws on key theoretical traditions most prominently the writing of Marx Keynes and Minsky that illuminate much that is ignored and rejected in mainstream theorizing including by many who identify as Keynesians After decades of low interest rates and years of quantitative easing QE keeping borrowing costs near zero many borrowers households businesses banks shadow banks and governments will not be able to finance their debt at the higher interest rates initiated by central banks to address inflation The resulting stagflation will be global producing a severe downturn that may be postponed through still greater debt creation but not avoided by conventional means The book also explores the ways that standard financial criteria contribute to the climate emergency and the manner in which the commodification of nature proceeds from the desire to create new marketable derivative products It concludes with a discussion of what needs to be done to move away from a harmful regime of accumulation premised on financialization and to adopt a far better one This book is essential reading for anyone interested in the causes and consequences of financialization and its impact on the economy Frontiers in Health Policy Research David M.
