Tax Expenditures A Review Of The Issues And Country Practices:

Tax Expenditures, 1996 Study updating the 1984 report of the OECD Committee on Fiscal Affairs Tax expenditures a review of the issues and country practices It provides a survey of tax expenditure reporting highlighting differences in practice and the reasons for those differences The second part reviews 14 OECD countries and presents tables of tax expenditure estimates derived from national sources The New World, 1842 **The New World** Park Benjamin, James Aldrich, Henry Champion Deming, James Mackay, 1842 **Tax Expenditures--shedding Light on Government Spending Through the Tax System** Hana Polackova Brix, Zhicheng Li Swift, Policy World Bank, 2004 **Managing the Effects of Tax Expenditures on National Budgets**, *Managing the Effects of Tax Expenditures on National Budgets* Zhicheng Li Swift, 2012 Tax expenditures in the form of tax provisions are government expenditures They are conceptually and functionally distinct from those tax provisions whose purpose is to raise revenue Tax expenditure programs are comparable to entitlement programs Therefore tax expenditures must be analyzed in spending terms and integrated into the budgetary process to ensure fiscal accountability In addition tax expenditures must be audited for performance and the information must be published with comprehensive analysis to ensure fiscal transparency The author analyzes the concept and definition size and effects of tax expenditures as well as the fiscal accountability and transparency of tax expenditure spending In short tax expenditures affect 1 the budget balance 2 budget prioritization in allocation 3 the effectiveness and efficiency of fiscal resources and 4 the scope for abuse by taxpayers government officials and legislators While reviewing the current practices in tax expenditures against the requirements of fiscal accountability and transparency she finds that this fiscal area must be strengthened The author sketches four building blocks to strengthen tax expenditures toward fiscal accountability and transparency based on the literature developed by Surry and McDaniel the practices from industrial and developing countries the Campos and Pradhan fiscal accountability model and the International Monetary Fund's fiscal transparency code The author argues that normative benchmark tax structure a revenue raising component of the tax system should be formalized The normative benchmark tax structure should be legally defined in the tax law and should be transparent The tax receipts from this normative benchmark tax structure should be quantified and published Presently many countries could publish imputed tax revenue from normative benchmark tax structures because such data is available Only if imputed tax revenue is published in the same way as the other budget components tax revenue received tax expenditures direct expenditures and fiscal balance will a budget system be truly transparent in terms of revenue raising activities and expenditure activities In addition when the tax revenue raising activity is formalized the inherent spending nature of tax expenditures is further exposed Therefore tax expenditures should be added to direct expenditures forming total government expenditures Furthermore the conventional conc *Managing the Effects of Tax Expenditures on the National Budget* Zhicheng Li Swift, 2006 Tax expenditures in the form of tax provisions are government expenditures They are conceptually

International Aspects of Tax Expenditures Paul R.

McDaniel, Stanley S. Surrey, 1985-01-01 The philanthropic sector in international contexts is increasing in importance The ability of donors from several nations to jointly finance international charitable programs requires knowledge of the tax deduction treatment of transnational donations The developments in this area have given rise to the need among practitioners for a single source guide with information on the functioning of voluntary organisations revenue structures supporting this sector International Charitable Giving Laws Taxation offers a survey of the laws regulations policies describing the characteristics of exempt organisations their activities in more than 50 countries It includes information related to government regulation of exempt organisations tax treatment of the donations they receive In setting out this information International Charitable Giving Laws Taxation also contributes to an understanding of exempt organisations position within the overall social scheme of a country Tax lawyers in house counsel human rights groups will appreciate the

usefulness practicality of this guide By putting all of the key topical information in a single updatable resource International Charitable Giving Laws Taxation streamlines the process of obtaining the on point governing information in the field **Tax Expenditures** Bernard Wolfman,1985 The Distribution of Major Tax Expenditures in the Individual Income Tax System Edward Harris,Joshua Shakin,2013 **Government Performance and Accountability** United States. Government Accountability Office,2005 *Tax Expenditures Budgets* Luiz Arruda Villela,2010 Tax expenditures are generally defined as those government expenditures carried out through tax legislation regulations and practices that reduce or defer taxes for some taxpayers There is a general concern that the tax expenditures negatively affect the budget and tax policies which in turn affect the transparency efficiency and equality of the fiscal systems Many countries in Latin American and a few in the Caribbean already estimate their tax expenditures but in many cases they do so without adopting a consistent methodology that allows for adequate comparisons or that even evaluates their effectiveness This working paper discusses the conceptual aspects of tax expenditures the main challenges to assess them and the general procedures adopted in the OECD countries and Latin America and the Caribbean to calculate present and approve them Reforming Tax Expenditures in Italy Justin Tyson,2014-01-16 The IMF has advised country authorities to roll back tax expenditures as a way to support fiscal consolidation efforts urging them to evaluate tax expenditures according to clear criteria and assessing their impact on public finances economic efficiency equity and administrative and compliance costs This paper analyzes tax expenditures in Italy considering the extent to which tax expenditures can be considered part of an optimal tax system and possible reforms

Tax Expenditures, Shedding Light on Government Spending Through the Tax System World Bank,2004 Discusses conceptual and methodological issues relating to tax expenditures provides a framework for evaluating them offers case studies on government treatment of tax expenditures from developed and transition economies and outlines generally applicable policy options Provides case studies of the treatment of tax expenditures in Australia Belgium Canada China the Netherlands Poland and the United States Each chapter presents how the nation defines tax expenditures and the corresponding benchmark tax system *Tax Expenditure Reporting and Its Use in Fiscal Management* International Monetary Fund. Fiscal Affairs Dept.,2019-03-27 This note aims to inform governments on how to account for tax expenditures and use that information in fiscal management The emphasis is on developing and emerging market economies where the use of such accounts is in its infancy because of data constraints insufficient human and financial resources and weak fiscal institutions Most developing economies more over do not have tax policy units in their Ministry of Finance to provide analytical support to the government and legislature that integrates all revenue policy aspects As a result the tax policy framework can be fragmented line ministries compete in the provision of sectoral tax incentives but do not report on their cost The note is organized as follows The second section outlines the role that tax expenditure measurement and reporting can play in fiscal management The third section provides a step by step approach on how tax expenditure accounts

can be built with emphasis on data methods and models and institutional requirements The section is concerned primarily with the direct cost of tax expenditures that is the revenue forgone because of them It does not deal with their indirect costs which could include economic efficiency losses and additional tax administration resources and it does not address assessment of the benefits of tax expenditures The fourth summarizes the current status of tax expenditure reporting in developing economies with some reference to advanced economies The last section concludes *Tax Expenditures and Public Policy* Richard-Philippe Domingue,1988 **Tax Expenditures** Citizens for Tax Justice (Washington, D.C.),1996

Tax Expenditure--shedding Light on Government Spending Through the Tax System Hana Polackova Bixi,Christian Valenduc,Zhicheng Li Swift,2004 *Managing Tax Expenditures and Government Program Spending* John Lester,2019 The federal government implemented a new expenditure management system in 2007 Under the new system departments are required to review programs on a four year cycle to determine if they are aligned with federal responsibilities and priorities if they are efficiently delivered and if they are providing value for money or effective Based on the results from these strategic reviews which are expected to be supported by formal evaluations that provide the evidence base for decisions departments are expected to identify 5% of their direct program spending that could be reallocated to other priorities including deficit reduction This system has much to recommend it but to realize the full potential of the new system two fundamental changes should be made First tax expenditures should be integrated into the expenditure management system Integration implies that departments would be given responsibility for both tax and spending initiatives that are relevant to their mandates and that tax expenditures would be subject to the government's evaluation policy and be included in strategic reviews Second while departments should continue to have responsibility for evaluating program efficiency evaluations of both tax and spending program effectiveness should be undertaken by an independent entity such as the Parliamentary Budget Officer Effectiveness evaluations should be carried out using a variant of the benefit cost framework that is now applied to government regulatory initiatives In order for the reformed system to work more resources will need to be allocated to developing the performance data needed to undertake effectiveness evaluations and to perform the evaluations Tax Expenditures United States.
