Zodrow,2008 Papers presented at a conference held at the James A Baker III Institute for Public Policy at Rice University in Apr 2006 **Handbook of Behavioural Economics and Smart Decision-Making** Morris Altman,2017-05-26 This Handbook is a unique and original contribution of over thirty chapters on behavioural economics examining and addressing an important stream of research where the starting assumption is that decision makers are for the most part relatively smart

or rational This particular approach is in contrast to a theme running through much contemporary work where individuals behaviour is deemed irrational biased and error prone often due to how people are hardwired In the smart people approach where errors or biases occur and when social dilemmas arise more often than not improving the decision making environment can repair these problems without hijacking or manipulating the preferences of decision makers This book covers a wide range of themes from micro to macro including various sub disciplines within economics such as economic psychology heuristics fast and slow thinking neuroeconomics experiments the capabilities approach institutional economics methodology nudging ethics and public policy Behavioural Public Finance M. Mustafa Erdoğan, Larissa Batrancea, Savaş Çevik, 2020-11-19 This book tackles political social and behavioural aspects of public finance and fiscal exchange The book combines conventional approaches toward public finance with new developments in economics such as political governance social and individual aspects of economic behaviour It colligates public finance and behavioural economics and gathers original contributions within the emerging field of behavioural public finance The book addresses public finance topics by incorporating political social and behavioural aspects of economic decision making assuming the tax relationship is shaped by three dimensions of decision making Thus it aims not only to reflect the interdisciplinary nature of public finance by bringing together scholars from various disciplines but also to examine public finance through the lens of political social and behavioural aspects The book scrutinizes the relationship between political institutions governance types and public finance it investigates the impact of social context social capital and societal cooperation on public finance it explores behavioural biases of individual fiscal preferences This book is of interest to scholars policymakers tax professionals business professionals financiers university students and researchers in the fields of public policy and economics **Tax Law and Racial Economic Justice** Andre L. Smith, 2015-06-03 No study of Black people in America can be complete without considering how openly discriminatory tax laws helped establish a racial caste system in the United States how they were designed to exclude blacks from lucrative markets and the voting franchise and how tax laws extracted and redistributed vast sums of black wealth Not only was slavery nearly a 100% tax on black labor so too was Jim Crow apartheid and tax laws specified the peculiar institution as negro slavery The first instances of affirmative action in the United States were tax laws designed to attract white men to the South The nineteenth century Federal Tariff indirectly redistributed perhaps a majority of the profits from slavery from the South to the North and is the principle reason the Confederate states seceded The only constitutional amendment obtained by the Civil Rights Movement is the Twenty Sixth Amendment abolishing poll taxes in federal elections Blending traditional legal theory neoclassical economics and a pan African view of history these six interrelated essays on race and taxes demonstrate that even in today's supposedly post racial society there is no area of human activity where racial dynamics are absent Ethics and Taxation Robert F. van Brederode, 2019-11-02 This book does not present a single philosophical approach to taxation and ethics but instead demonstrates the divergence in opinions

and approaches using a framework consisting of three broad categories tax policy and design of tax law ethical standards for tax advisors and taxpayers and tax law enforcement In turn the book addresses a number of moral questions in connection with taxes concerning such topics as the nature of government the relation between government the state and its subjects or citizens the moral justification of taxes the link between property and taxation tax planning evasion and avoidance corporate social responsibility the use of coercive power in collecting taxes and enforcing tax laws ethical standards for tax advisors tax payer rights the balance between individual rights to liberty and privacy and government compliance and information requirements the moral justification underlying the efforts of legislators and policymakers to restructure society and steer individual and corporate behavior
