Context and Development Robert Cohen, Alexander W. Siegel, 2014-02-04 The purpose of this book is to explore meaningful integrations of developmental processes and functioning with conceptualizations of context a term traditionally denoting physical settings social arenas or perceptual or social backdrops in relation to a focal point However the study of context has taken a considerably more unique and vibrant form in recent years the term is becoming more than a substitute for background independent variables Rather the contributions of context to behavior thought feelings and vice versa are becoming central issues in many research domains This text is a collection of empirical and theoretical accounts for understanding context its focus is on integrating the study of context with the science of developmental psychology Although the authors work in many different areas of the field and with different populations they all converge on a central methodological conceptual theme of contextualism which is presented as the dynamic integration of intraindividual factors with environmental and social environmental factors

Who Pays for Canada? E.A. Heaman, David Tough, 2020-09-17. Canadians can never not argue about taxes. From the Chinese head tax to the Panama Papers, from the National Policy to the Canada-United States-Mexico Agreement, tax grievances always inspire private resentments and public debates. But if resentment and debate persist, the terms of the debate have continually altered and adapted to reflect changing social, economic and political conditions in Canada and the wider world. The centenary of income tax is the occasion for Canadian scholars to wrestle with past and present debates about tax equity, efficiency and justice. *Who Pays for Canada* explores the different ways governments can and should tax their peoples and evaluates how well Canada has done so. It brings together a diverse group of perspectives from academia, law, economics, political science, history, geography, philosophy and accountancy, and from the wider world of activists and public servants. It asks how Canada compares to other countries and how other countries, especially the United States, influence Canadian tax policies. It also surveys internal tax tensions and politics through the lenses of region and jurisdiction, as well as race, class and gender. Reasoning from tax perplexities and reforms in the past and the present, it argues that fair taxation requires an informed populace and a democratically inclined public will. Above all, this book serves as a reminder that it is not only what counts as fair that is important, but how fairness is evaluated. Revealing how closely tax policy is tied to mainstream politics, human rights and morality, *Who Pays for Canada* represents new perspectives on a matter of tremendous national urgency.

National tuberculosis prevalence surveys 2007-2016, 2021-05-03. Between 2007 and the end of 2016, 24 countries implemented a total of 25 national tuberculosis prevalence surveys using methods recommended by WHO. The 25 surveys consisted of 13 in Asia and 12 in Africa. Collectively, survey findings have informed the policies, plans and programmatic actions needed to address gaps in TB diagnosis and treatment and to reduce the burden of TB disease. Finally, the 24 countries have a robust baseline for assessing progress towards new global targets set in the UN Sustainable Development Goals 2016-2030 and WHO's End TB Strategy 2016-2035. The methods, results, successes, achieved challenges, faced and lessons learned from the 25 surveys were comprehensively documented in the book. We viewed such a product as a global public good that should be available to all those with an interest in and commitment to using survey findings now and in the future, e.g. academics, donors, public health officers and national TB programmes. As with implementation of the 25 surveys themselves, the book is the result of a major global, regional and national collaborative and collective effort with more than
