Human Ecology of Sikkim Kuldip Singh Gulia, 2005 A historic view on the human ecology of sikkim the culture and structure of local ecosystems human ecosystems various richness of human ecosystems monasteries and the monastic architecture customs and their eco biological significances spirit possession shamans and Jhakis ethno botany and adaptations A complete guide to the tourist industry policy makers and scholars **More and More Equal** Nancy E. Berg, 2005-01-01 More and More Equal examines the works of Sami Michael the most significant Israeli writer who has made the transition from Arabic to Hebrew Born in Baghdad Michael fled in 1948 to Iran and later to Israel to escape imprisonment or execution due to his involvement with the Iraqi Communist Party Early in his career Michael was deemed merely an ethnic writer but his incredible popular success and indelible influence on his Israeli audience have forced critics to consider his writings anew Nancy E Berg sheds light on Michael s belated canonization and traces his development as a storyteller Berg offers fresh readings of each of Michael s major novels She shows us that by questioning and exploring Israeli and Jewish identity via characters otherwise rare in Hebrew literature non European immigrants Sephardis and Arabs Michael has recast the Zionist master narrative Berg notes that Michael s rise to literary prominence owes not only to his growing sophistication as a writer but also to changing norms and attitudes in Israeli society **Dermatopathology** C.L. Berry, 2012-12-06 In any histopathology department cutaneous biopsies form the major part of the workload In many instances these may be readily dealt with by experienced pathologists and their documentation represents an essential step in organising therapy However in a number of areas dramatic changes have occurred in dermatopathology The rapidly changing incidence of pigmented lesions of the skin and the availability of diagnostic cell markers in the complex cutaneous lymphomas have meant that for many pathologists a review in these fields will be valuable The distribution and pattern of skin pigmentation may allow us to make important assertions and draw important conclusions about the genetics of skin disease but also about human variability Cutaneous vasculitis is a difficult problem where clinicopathological consultation is vital in diagnosis and the review presented has been written with this very much in mind In the same way many diagnostic difficulties exist in assessing buttuos lesions in the skin and for this reason a review was invited Finally our understanding of certain skin diseases has been radically altered by knowledge of the dynamics of the changes seen a field which has also been studied with advantage in other systems in pathology This volume is intended as an aide to those many pathologists and dermatologists who often together are responsible for the provision of clinical care in this demanding field London C L BERRY Contents Melanoma and Other Melanocytic Skin Lesions With 8 Figures D WEEDON Cutaneous Vasculitis The Pigmentary System James J. Nordlund, Raymond E. Boissy, Vincent J. Hearing, Richard A. King, William S. The Skull of Australopithecus afarensis William H. Kimbel, Yoel Rak, Donald C. Johanson, 2004-03-11 The book is the most in depth account of the fossil skull anatomy and evolutionary significance of the 3 6 3 0 million year old early human species Australopithecus afarensis Knowledge of this species is pivotal to understanding early human evolution because 1 the sample of fossil remains of A afarensis is among the most extensive for any early human species and the

majority of remains are of taxonomically informative skulls and teeth 2 the wealth of material makes *A. afarensis* an indispensable point of reference for the interpretation of other fossil discoveries 3 the species occupies a time period that is the focus of current research to determine when where and why the human lineage first diversified into separate contemporaneous lines of descent Upon publication of this book this species will be among the most thoroughly documented extinct ancestors of humankind The main focus of the book its organizing principle is the first complete skull of *A. afarensis* specimen number A.L. 444-2 at the Hadar site Ethiopia the home of the remarkably complete 3.18 million year old skeleton known as Lucy found at Hadar by third author D. Johanson in 1974 Lucy and other fossils from Hadar together with those from the site of Laetoli in Tanzania were controversially attributed to the then brand new species *A. afarensis* by Johanson T. White and Y. Coppens in 1978 However a complete skull which would have quickly resolved much of the early debate over the species proved elusive until second author Y. Rak's discovery of the 444 skull in 1992 The book details the comparative anatomy of the new skull and the cast of its brain analyzed by R. Holloway and M. Huan as well as of other skull and dental finds recovered during the latest ongoing field work at Hadar and analyzes the evolutionary significance of *A. afarensis* in the context of other critically important discoveries of earliest humans made in recent years In essence it summarizes the state of knowledge about one of the central subjects of current paleoanthropological investigation
