Key features of the "2022 HSC Comprehensive Revision Series":

- ~13 hours of cherry-picked HSC revision questions by topic
- Weighting toward more difficult examples
- Targeted at motivated students aiming for a Band 5- or 6 result
- **Attempt, carefully review and annotate** this revision set in Term 3
- This question set provides the foundation of a concise and high-quality revision resource for the run into the HSC exam.

Our analysis on each topic, the common question types, past areas of difficulty and recent HSC trends all combine to create this revision set that ensures students cover a wide cross-section of the key areas.

IMPORTANT: Exposure to quality HSC questions multiple times is best practice revision and highly beneficial. Many top-performing students attest to the benefits of doing quality questions 2-3 times before the HSC. The resulting confidence and speed through the exam creates a virtuous cycle for peak performance.

HSC Final Study: ADVANCED MATHEMATICS

TRIGONOMETRY (T2 and T3 historical contribution ~15%)

Key Areas addressed by this worksheet

T2 Trig Functions and Identities

- **Exact Trig Ratios:** the most common question type of this topic area was last examined in a dedicated question in 2017. Students are required to solve a simple trig equation in exact radian form, within a specified range. Numerous examples look at this, including the harder 2008 HSC for which caused problems;
- questions giving an exact trig ratio that require students to use Pythagoras and find exact $\sin$, $\cos$ and $\cot$ ratios is covered (similar to HSCSA Topic Guidance exemplar questions).

- **Trig Identities and Harder Equations:** examined with a dedicated question in 8 of the last 9 years (most recently in 2021).
- this topic can be examined in a broad array of questions that have produced sub-50% mean marks on a majority of occasions. We revise a number of these.

T3 Trig Functions and Graphs

- **Trig Graphs:** examined in each of the last 9 years, primarily through multiple choice although 2021 and 2017 saw 2-3 mark allocations;
- **Trig Graphs and Transformations,** although not examined in 2020-21, should be a revision focus in our view and this is reflected in the revision set;
- **amplitude and period** of various trig functions is well covered (including the period of tan functions which has caused problems in the past);
- we also revise examples that reflect HSCSA sample exam questions in this topic area;
- **Trig Applications:** a content area which, if examined, has historically involved a substantial mark allocation and a high level of difficulty;
- last examined in 2020, we review two past HSC questions to cover this very important revision area.
