 Lesson 20 Holidays and Traditions **Profundity** Jean Gabbert Harrell, 2010-11 The crisis or death of philosophy currently identified both within and outside professional circles is commonly attributed to the failure to find universals in metaphysics epistemology and most obviously in valuational judgment Profundity concentrates on an assumption uniformly upheld in the theory of value that all human values are contextually dependent Harrell contends to the contrary that there exists one major value that is universal to humans regardless of context That value is profundity or depth Considering how profundity is used in our language leads Harrell to identify two fundamental sensory patterns that are common to all human life at its origin an auditory pattern that is first experienced before birth and a visual one that is experienced immediately after birth From analysis of these patterns as they recur in music and the visual arts Harrell moves on to discuss their related manifestations in religious doctrine ceremony and experience and also in works of literature Overall her theory entails a radical revamping of the concept of creativity since no artist can create profundity as a universal value and provides the first full scale treatment of profundity in the history of Western philosophy *Multiliteracies, Multimodality, and Learning by Design in Second Language Learning and Teacher Education* Agustín Reyes-Torres, María Estela Brisk, Manel Lacorte, 2025-04-30 Multiliteracies Multimodality and Learning by Design in Second Language Learning and Teacher Education offers valuable insights and practical strategies for addressing the language and literacy needs of students in diverse multilingual classrooms This edited volume delves into the dynamic interplay between multimodality multiliteracies and Learning by Design LbyD providing evidence based research and actionable guidance for their effective implementation in second language learning and teacher education Examining the advantages of incorporating multimodality and multiliteracies in second language teacher training this book emphasizes the use of multimodal texts to create engaging and meaningful lessons for L2 learners By empowering students as active co constructors of knowledge this book equips educators with the necessary tools to foster a vibrant and inclusive learning environment Designed specifically for pre service and practicing teachers this book serves as an indispensable resource for integrating the pedagogy of multiliteracies into both coursework and classroom practices *American Book Publishing Record* ,2004 *The Art of Sensorial Language* Barbara Pia Jenič, 2025-07-31 The Art of Sensorial Language examines audience interactivity and multisensory experiences that can be understood internationally and cross culturally It considers interactivity not as a technological mode of interaction but as a direct and immediate communication between the audience and the performers which takes place in person and in which all participants are in contact with each other By describing theatrical techniques and approaches for organically immersing the audience in the story this book shows how the development of these methods is also applicable to multisensory presentations for museums and galleries The author places particular emphasis on the development of scents and their uses for cultural and educational purposes to allow for greater and deeper immersion in an event or installation Inspired by the work of

Enrique Vargas the inventor of sensorial language the discussion reveals how this approach not only engages the senses but also integrates additional methods and tools to create a poetic symphony which is particularly important for enriching user experiences in theatres galleries and museums as well as in other forms of immersive experiences This study will be of great interest to experts in multisensory approaches within the fields of the arts and education as well as specialists in cultural heritage and tourism
