**A Bowl for a Coin** William Wayne Farris, 2019-04-30 A Bowl for a Coin is the first book in any language to describe and analyze the history of all Japanese teas from the plant s introduction to the archipelago around 750 to the present day To understand the triumph of the tea plant in Japan William Wayne Farris begins with its cultivation and goes on to describe the myriad ways in which the herb was processed into a palatable beverage ultimately resulting in the wide variety of teas we enjoy today Along the way he traces in fascinating detail the shift in tea s status from exotic gift item from China tied to Heian 794 1185 court ritual and medicinal uses to tax and commodity for exchange in the 1350s to its complete nativization in Edo 1603 1868 art and literature and its eventual place on the table of every Japanese household Farris maintains that the increasing sophistication of Japanese agriculture after 1350 is exemplified by tea farming which became so advanced that Meiji 1868 1912 entrepreneurs were able to export significant amounts of Japanese tea to Euro American markets This in

turn provided the much needed foreign capital necessary to help secure Japan a place among the world's industrialized nations. Tea also had a hand in initiating Japan's industrious revolution. From 1400 tea was being drunk in larger quantities by commoners as well as elites and the stimulating habit-forming beverage made it possible for laborers to apply handicraft skills in a meticulous, efficient and prolonged manner. In addition to aiding in the protoindustrialization of Japan by 1800 tea had by that time become a central commodity in the formation of a burgeoning consumer society. The demand pull of tea consumption necessitated even greater production into the postwar period and this despite challenges posed to the industry by consumers growing taste for coffee. A Bowl for a Coin makes a convincing case for how tea, an age-old drink that continues to adapt itself to changing tastes in Japan and the world, can serve as a broad lens through which to view the development of Japanese society over many centuries.

**Tea sector review - Azerbaijan** Prikhodko, D., Sterk, B., Sokolova, A., Monzini, J., Snell, J., 2022-05-17. This study was produced under an FAO-EBRD Cooperation project on reviewing the development potential of the tea sectors of Azerbaijan and Georgia. As a result of the joint research in the two countries carried out as part of the project, a similar separate review of the Georgian tea sector was also published under the FAO Investment Centre's Knowledge for Investment K4I programme. Tea has a long tradition of cultivation in Azerbaijan and Georgia dating back to the nineteenth century. The structural changes that followed the collapse of the Soviet Union in the early 1990s led to a dramatic decline of the two countries' tea sectors. However, interest in tea production in Georgia and Azerbaijan has increased in recent years and in an effort to revive their once thriving tea sectors, governments have adopted sector development programmes that provide for support to primary tea production. In spite of the long tradition and accumulated know-how of tea production and processing, there is little doubt that investments in both technology and knowledge will be required for the Azerbaijani and Georgian tea sectors to grow in a successful and sustainable way. Production focused on efficiency and quality and mindful of shifts in consumer preferences on global markets but also of potential environmental risks will be critical in achieving this goal. This publication is part of the Country Investment Highlights series under the FAO Investment Centre's Knowledge for Investment K4I programme.

**Plays of the 19th and 20th Centuries**, 1889 **Tea: Genome and Genetics** Tapan Kumar Mondal, 2020-12-22. Tea is an important non-alcoholic beverage plant of the world. Cultivation of tea is also commercially very important as it earns huge revenue for the tea-growing nations, especially the developing countries such as India. Although conventional breeding is well established and contributes significantly for varietal improvement of this plant and other *Camellia* species with ornamental value, yet applications of biotechnology via *in vitro* genomics are essential to improve the productivity and quality of the tea. This book brings out various aspects of breeding, biotechnology and genomics of tea plants. It covers: i) Origin and descriptions of health benefits as well as morphological classification as first chapter; ii) Breeding and cytogenetics that comprise various conventional approaches of varietal improvement of tea along with their genetic resources; iii) Micro propagation which deals with in-depth study of clonal
