Smith, 2015-10-23 The Qing dynasty 1636-1912 a crucial bridge between traditional and modern China was remarkable for its expansiveness and cultural sophistication This engaging and insightful history of Qing political social and cultural life traces

the complex interaction between the Inner Asian traditions of the Manchus who conquered China in 1644 and indigenous Chinese cultural traditions. Noted historian Richard J. Smith argues that the pragmatic Qing emperors presented a Chinese face to their subjects who lived south of the Great Wall and other ethnic faces particularly Manchu, Mongolian, Central Asian and Tibetan to subjects in other parts of their vast multicultural empire. They were attracted by many aspects of Chinese culture but far from being completely sinicized as many scholars argue they were also proud of their own cultural traditions and interested in other cultures as well. Setting Qing dynasty culture in historical and global perspective, Smith shows how the Chinese of the era viewed the world, how their outlook was expressed in their institutions, material culture and customs, and how China's preoccupation with order, unity and harmony contributed to the civilization's remarkable cohesiveness and continuity. Nuanced and wide-ranging, his authoritative book provides an essential introduction to late imperial Chinese culture and society.

The Pursuit of Pleasure Rudolph Matthee, 2021-05-11. From ancient times to the present day, Iranian social, political and economic life has been dramatically influenced by psychoactive agents. This book looks at the stimulants that, as put by a longtime resident of seventeenth-century Iran, Raphaël du Mans, provided Iranians with a damagh, gave them a kick, got them into a good mood. By tracing their historical trajectory and the role they played in early modern Iranian society, 1500-1900, Rudi Matthee takes a major step in extending contemporary debates on the role of drugs and stimulants in shaping the modern West. At once panoramic and richly detailed, *The Pursuit of Pleasure* examines both the intoxicants known since ancient times, wine and opiates, and the stimulants introduced later, tobacco, coffee and tea, from multiple angles. It brings together production, commerce and consumption to reveal the forces behind the spread and popularity of these consumables, showing how Iranians adapted them to their own needs and tastes and integrated them into their everyday lives. Matthee further employs psychoactive substances as a portal for a set of broader issues in Iranian history, most notably the tension between religious and secular leadership. Faced with reality, Iran's Shi'i ulama turned a blind eye to drug use as long as it stayed indoors and did not threaten the social order. Much of this flexibility remains visible underneath the uncompromising exterior of the current Islamic Republic.
