**The Science of Boredom** Sandi Mann,2016-03-22 Are we living in an age where we are more boredom prone Or are other people boring us Or could we be that boring person In our current information age we are constantly connected to technology and have so many varied ways to spend our leisure time that we should all surely never know what boredom feels like Yet boredom appears to be on the rise it seems that the more we have to stimulate us the more stimulation we crave In a quest to relieve our boredom we engage in dangerous risk taking from extreme sports to drugs to gambling to anti social behaviour or we overindulge in shopping or eating The Science of Boredom explores the causes and consequences of boredom in the fast paced twenty first century Parents are desperate to keep their children entertained during every waking moment the education system is geared towards interactivity and attention spans are dropping as we use multiple devices at all times But the world of work can be increasingly repetitive and routine and we are losing the ability to tolerate this everyday tedium Using Sandi Mann s own ground breaking research into boredom this book tells the story of how we act react and cope when we are bored and argues that there is a positive side to boredom It can be a catalyst for humour fun reflection creativity and inspiration The radical solution to the boredom problem is to harness it rather than try to avoid it Allowing yourself time away from constant stimuli can enrich your life We should all embrace our boredom and see the upside of our downtime

**Spiritual Boredom** Dr. Erica Brown,2012-05-17 Break the Surface of Spiritual Boredom to Find the Reservoir of Meaning Within We need to be bored When we get bored and take responsibility for our boredom we arrive at a new level of interest introspection or action that has been stirred by the very creativity used to keep boredom away The relationship between boredom and creativity is far from accidental Creative minds are often stimulated by boredom regarding it as a brain rest until the next great idea looms on the horizon of the otherwise unoccupied mind from Chapter 10 Boredom is a crisis of our age In religious terms boredom is sapping spirituality of its mystical and wholesome benefits slowly corroding our ability to recognize blessing and beauty in our lives to experience wonder and awe What happens when our need for constant newness minimizes our interest in prayer learning and the mysteries of nature This intriguing look at spiritual boredom helps you understand just what this condition is particularly as it relates to Judaism and what the absence of inspiration means to the present and future of the Jewish tradition Drawing insights from psychology philosophy and theology as well as ancient Jewish texts Dr Erica Brown explores the many ways boredom manifests itself within Judaism in the community classroom and synagogue and shows its potentially powerful cultural impact on a faith structure that advises sanctifying time not merely passing it

Boredom: The Elephant in the Room Doris Sommer, Robert D. Austin, Alexandra Vuyk, David M. Ndeti, Nicolas Prevelakis, Pier Luigi Sacco, Josefa Ros Velasco, 2024-07-16. When cases of domestic violence spiked during the COVID-19 lockdowns, terror spread among potential victims while governments that enforced the isolation seemed helpless to address the damages. Vulnerable partners, children, and parents were hostage to possible perpetrators given the risks of retaliation at home and the danger of death by contamination in shelters. The alarm raises questions about under-examined triggers for violence against others and oneself. One common trigger is boredom. It is the elephant in the room, a known stressor in institutional settings: schools, prisons, and military installations, and otherwise out of focus despite the ubiquity of gender-based violence. Detecting the ravages of boredom in apparently safe domestic settings hints at a range of meanings for the word and a web of personal and collective dysfunctions including anxiety, depression, feelings of worthlessness, and anomie. Conventional remedies for these challenges do not address the escalating rates of violence to oneself and to others. Their evident ineffectiveness during the crisis laid bare structural flaws in standard human development strategies which span home and school environments, the law, and approaches to mental health. A major flaw has been the narrow perspectives of one or another discipline when the dangers are interrelated and demand multidisciplinary approaches. Chronic violence and alarming rates of depression before, during, and after the pandemic show failures of predictable perspectives and their recommendations even in normal conditions. The question of how authorities should react to harm done begs the question of how to prevent harm from happening. Prevention rather than punishment for crimes or treatment for pathologies has become a preferred approach for both legal and clinical interventions. To stop violence before it erupts requires investigation into its causes because treating the effects of aggression, evacuating victims, punishing perpetrators, counselling patients addresses symptoms rather than diseases. Why was the lockdown a time of increased domestic violence? What accounts for recent spikes in teen suicides? What are the existing and possible tools for measuring boredom? Answers from experts stay within foreseeable observations about the loss of jobs, the increase of alcoholism, social media addiction, and psychological stress. These familiar answers do not lead beyond the description of pathological patterns. But different approaches may follow from attending to the under-examined danger of having nothing to do.
