Teach Me About Danger Teach Me About:

What My Dog Taught Me About Jesus David Ross Sherman, 2017-05-24 Jenny was nearly two years old when David met her and it was a perfect match between a dog who just wanted out of her prison and a guy looking for someone with whom he could share bad jokes and make listen to his sermons before he delivered them to the church She could handle some bad humor and some boring sermons if she could just be allowed to love some people and be free After all loving people was what she did best And being free is what everyone wants Having come from a pretty difficult beginning Jenny had some issues She was fearful and aggressive toward other dogs but even with her issues she showed an incredible love toward every human she met as well as an unquenchable joy that was always present Come experience the relationship between a man and his dog and discover how God is interpreted in the actions of this wonderful and amazing animal by a guy who sees God in every living thing If you are enduring some difficulty right now this book may help you out of your pain You may just discover that what you have really found is a renewed relationship with the King of kings that will give you a new perspective on life and those with whom we share the planet

The Web of Life Imperative Michael J. Cohen, 2003 A book and course that teaches you the Natural Systems Thinking Process A nature connected learning tool enables our psyche to genuinely tap the healing powers of nature and regenerate 48 peaceful natural intelligences in our awareness and thinking Backyard or backcountry this practical multiple sense book empowers you to improve your health relationships and happiness by replacing destructive omissions in how we learn to think with rejuvenated natural sensitivities Learn how to reconnect your psyche to its nurturing origins in the restorative vigor sustainability and peace of nature Help yourself and your community benefit from the profound renewal that lies in the magnificence of a beautiful day the wisdom of an ancient tree and the fortitude of a weed Let nature s invincible healing energies help your thinking transform your stress disorders and harmful bonds into constructive personal social and environmental rewards Grow from hands on accredited Applied Biophilia classes essays activities research internships ethics counseling and healing Strengthen your inborn natural genius Enjoy an Earth friendly job career internship or teaching certification Take advantage of subsidized online courses and degree programs To understand how and why this book will work for you as it has for so many others consider the following key intelligence test question one that ordinarily might help assess a person s mathematical aptitude If you count a dog s tail as one of its legs how many legs does a dog have Five of course is the correct answer for a math test Intelligent people say five because it is

valid in mathematical systems and contemporary thinking and is highly regarded and rewarded by our society. However, we don't solely live our lives or think in mathematical systems. Our natural sense of reason can consider what we know from our actual contact with a real normal dog too. That's when our multitude of other natural senses come into play: senses of touch, motion, color, texture, language, sound, smell, consciousness, community, trust, contrast, and love. They each provide further information and help our sense of reason make more sense and a more informed decision. They enable our thinking to register that a tail is different than a leg, that a dog has four legs, not five, no matter what might be correct in mathematical logic. It is a grave mistake for anyone not to take seriously the difference between 4 leg and 5 leg ways of knowing and our learned prejudice for the latter. As this book shows, when they are not in balance, the schism between their two different ways of registering the world is significant. Four leg knowing is a magnificent psychological and physiological phenomenon with deep natural system roots into the eons, the heart of Earth, and our psyche. It brings our widely diverse multiplicity of natural sensory experiences into our awareness. Five leg knowing produces important awareness through abstract imagination, labels, and stories. However, when it does not also seek and contain 4 leg knowledge, it results not only in our desensitization but in the separation of our thinking from the regenerative powers of Earth's natural systems within and around us. This profound loss produces the many destructive side effects of our artificial world that we can not readily solve. Four leg versus 5 leg discord creates an entrenched conflict in our psyche between how we think and how nature works. This is a point source of the stress and contamination our society produces in the integrity of people and the environment. It generates our many disorders and troubles that are seldom found in nature. It is important to recognize that by financially and socially rewarding us for getting good grades or for making the grade by using nature isolated 5 leg thinking, our socialization habitually bonds conditions, programs, or ads.
