Teacher And Pupil Some Socio Psychological Aspects:

Teacher and Pupil Philip Gammage, 2017-04-28 This title first published in 1971 provides a guide to the social psychology of learning The author examines the school class as a group and considers the formation of some of the attitudes of the children and the teacher as they relate to education Building upon interaction as a major theme the study focuses attention on the ways in which relationships can affect the classroom climate The background to group dynamics leads to the elements of sociometry and to consideration of teaching styles communication structure and perceptions of the teacher's role This title will be of interest to students of sociology and education *The Psychology of Learning* Gordon R.

Cross, 2016-06-06 *The Psychology of Learning An Introduction for Students of Education* provides a comprehensive coverage of educational psychology The title tackles various psychological variables that play a critical role in education The text first deals with learning theories such as classical conditioning operant conditioning and the Gestalt theory Next selection deals with the concept of memory which includes perception short and long term memory and forgetting The text also talks about motivation along with skills and language Chapter 7 covers thinking and problem solving while Chapter 8 tackles intelligence and ability The coverage of the title also includes personality and morality The book will be of great use to student teachers instructors and behavioral scientists A Social Psychology of Schooling Colin Rogers, 2017-09-14 If a theory of education is

to be helpful to the practising teacher it must take the social context of learning into account Originally published in 1982 Colin Rogers does just this exploring the implications of two decades detailed research in to the social psychology of teaching and learning The central theme that emerges from this study is the importance of the still controversial teacher expectancy effect the effect of teachers expectations on the performance of pupils By examining in detail the claims made by those who believe that the expectations of teachers can influence levels of pupils academic attainment the book shows the complexity of interpersonal interaction and perception within the classroom and the nature of problems involved in studying these It also focuses on the way that the mutual perceptions of teachers and pupils themselves affect and are affected by other aspects of life in a school and extensive use is made of research conducted in British schools to illustrate major points The conclusion of the study was that it is the classroom the very environment in which teachers and pupils interact rather than teacher training that may need reform Research in Education, 1972 **Development of Creativity in Indian Schools** Kanta Prasad

Agarwal, 1992 **Teacher-Pupil Conflict in Secondary Schools (1987)** Kate Cronk, 2018-01-12 Published in 1987 the central question with which this book is concerned is what can and should teachers do about teacher pupil conflict in schools Few teachers in secondary education would need to have this sort of conflict described as even if that have been fortunate enough to avoid it themselves they will know of it from staffroom discussion and from the media In can be seen in disorderly classrooms where pupils mess about and have a laugh and in the bleak expression on the face of their teacher Equally it can be detected in those classrooms where the teacher is in firm control but where pupils gaze listlessly out of the window or

only minimally comply with work demands It is characterized by sudden blazing temper on both sides and also by long periods of weariness boredom and disengagement It is not that conflict which might arise from temporary private troubles from having a bad day or going through a bad patch for it is there week in week out and involves significant numbers Such conflict has been of interest to both psychologists and sociologists of education and important contributions have been offered by both of these disciplines Sociologists have mapped out the differing cultural values and norms which appear to promote it They have identified the social constraints present within the environment in which it is produced constraints which emanate from the socio economic organization of society and from the maintenance of an institutional framework and which affect the micro dynamics of teacher pupil interaction Psychologists have described the effects on behaviour of genetic factors environmental conditions and cognitive states Important though such insights are however they can only speak indirectly to teacher practice This book provides an educational approach to the subject discussing topics including theoretical considerations teacher pupil discussion and relationships between classroom behaviour and the curriculum It will appeal to those involved with schools and education as well as psychologists educational sociologists and researchers

The Social Psychology of Facial Appearance Ray Bull,Nichola Rumsey,2012-12-06 Several years ago Coleman 1981 reported that in 1979 one of the many in ternational cosmetics companies had an annual sales figure of 2 38 billion nearly 1 25 million sales representatives and over 700 products the majority of these being for the face Cash and Cash 1982 noted that in 1979 U S consumers spent over 4 million on cosmetic

products They stated that Although this practice would seem to be a fascinating aspect of human behavior on the basis of its generality and resilience social behavioral scientists have largely ignored the phenomenon so plainly or pleasingly in front of their eyes Why should people be so concerned with their facial appearance Many psychologists have argued e g Kleck Rubenstein 1975 not only that facial information is usually the first that is available to the perceiver but also that it is continuously available during social interaction Maruyama and Miller 1981 stated that appearance is often the first dimension upon which a stranger can be evaluated Since people tend to see others as integrated and consistent units rather than as collections of situation specific behaviors a potent and immediately evident basis for an evaluation such as physical appearance should intrude into and affect any overall and subsequent evaluation Disaffection From School (RLE Edu M) David Hargreaves, Stephen Hester, Frank Mellor, 2012-05-04 A large number of pupils are or are liable to become disaffected with their schooling In this comprehensive account of the problem Ken Reid suggests that school can and should do much more to prevent and overcome disaffected behaviour as manifested by such factors as absenteeism disruption and underachievement The book covers disruptive behaviour in its broader context and examines the search for an explanation within schools themselves Formal and multidisciplinary approaches to the problem are also fully treated The author has drawn on his considerable school and research experience and the book is well illustrated with examples and case histories Ken Reid argues that questions about attitudes and approaches in teaching and in pastoral care provoke a continued challenge and stresses that if such questions are not faced squarely the long term prognosis for secondary education in Britain may be bleak Teachers in training and all those involved in the education and welfare of difficult or disadvantaged children especially teachers heads and social workers will find Disaffection from School both challenging in its analysis and helpful in its suggestions Psychology of Education: Schools, teachers and parents Peter K.
