Teacher As Stranger Educational Philosophy For The Modern Age:

Teacher as Stranger Maxine Greene, 1973 Martin Heidegger Steven Hodge, 2015-06-11 This book sets out to explore the challenge to education contained in Heidegger's work His direct remarks about education are examined and placed in the broader context of his philosophy to create an account of Heidegger's challenge Martin Heidegger is an undisputed giant of 20th Century thought During his long academic career he made decisive contributions to philosophy influencing a host of thinkers in the process including Arendt Gadamer Sartre Merleau Ponty Derrida and Foucault Heidegger inquired into the deepest levels of human being and its social natural and technological contexts Although he did not develop a systematic philosophy of education his philosophical insights and occasional remarks about education make him an interesting and troubling figure for education Heidegger is of interest to education for his contributions to our understanding of human being and its environment Heidegger's insights are troubling too for many of the assumptions of education His critiques of humanism and the modern instrumental mindset in particular have significant implications The work of scholars who have expanded on Heidegger's remarks and those who have been influenced by his philosophy is also surveyed to fill out the examination A vision of education emerges in which teachers and learners awaken to the deadening influences around them and become attuned to the openness of being *Culture and Power in the Classroom* Antonia Darder, 2015-12-03 This is a timely second edition of the enormously significant book which changed how teachers and community activists view their own practice This edition concludes with personal essays by teachers professors and community activists explaining the direct impact which *Culture and Power in the Classroom* has had on their lives Unlike many texts that discuss educational failure this book provides a historical context for understanding underachievement in our nation Thoroughly revised to include the new thinking on diversity and learning this edition includes a new chapter on assessment and the brain This second edition will be welcomed by previous and new readers alike and will help influence the approach of a new generation of teachers whether they are based in schools colleges or community centres **A Vocation at Risk** James A. Bryant Jr., 2021-06-25 New teachers need a resource which will accomplish three things First a work is needed that gives them the imminently practical information that they will need to succeed in their careers This information includes tips on surviving the politics of a school and how to successfully communicate with the parents of the school Second pre service teachers need a work that will provide them with a workable theoretical base that is clearly tied to their practice There is no lack of theory in teacher preparation programs but my research has shown that students do not see the connections between the theory that is preached and their career concerns Finally there is a great need for a work that will reacquaint pre service teachers with the idealistic purposes of education Many young people choose education as a career because of their desire to make a difference in the life of a child or in their community But by the time they have completed the necessary course work these same students no longer recall their earlier idealism There is a tremendous need to remind

new teachers of their ideals as they prepare to enter a classroom This book does all three **A Light in Dark Times** Maxine Greene, William Ayers, Janet L. Toward a Sociology of Education John Beck,Chris Jenks,Nell Keddie,Michael F. D. Young,2020-03-10 By including material from literary philosophical and anthropological sources and by selecting readings which consider educational practice both within and beyond formal educational contexts this book broadens the character of sociological inquiry in education The editors bring together material they have found valuable when working with students of education and sociology at all levels Many of these articles and extracts are either inaccessible or have not been reprinted The collection should stimulate inquiry about the assumptions underlying current debates on curriculum streaming school organization methods of teaching and preconceived notions of ability *The Art and Craft of Pedagogy* Richard Hickman,2011-09-22 Richard Hickman considers effective teaching across the curriculum examining the notion that successful teachers of art and design are amongst the best teachers of any subject with much to offer outside their discipline in terms of pedagogy The case study approach focuses on adolescent learning although much of what is considered is applicable to all ages and phases of education to consider the following questions What are the characteristics of successful art teaching How do individual life experiences inform art teachers teaching How in turn might others benefit from their pedagogical practices Using self portraiture autoethnography and autobiography Hickman draws together the varied experiences of a group of art teachers to explore a range of issues including identity learning environment and the nature of the teacher learner relationship which are discussed with clarity and imagination **Tolerance and Dissent within Education** Nuraan Davids,Yusef

Waghid,2017-07-31 This book explores how the concept of tolerance might be understood cultivated and enacted in and through educational encounters It argues that by opening up educational encounters to allow for dissent that is disagreement criticism and open dialogue our everyday social life experiences and relationships would flourish and potentially allow for a more peaceful and harmonious co existence alongside those with whom we disagree Dissent does not mean that anything goes what is needed is considerate and responsible recognition of distinct and diverse perspectives Tolerance is sometimes

regarded as a simple and uncritical celebration of difference and sometimes dismissed as a necessary and resentful acceptance of others Here the authors make a compelling case for conditional tolerance which requires us to continuously reflect on the limits of what we are willing to tolerate The book will be an indispensable resource for researchers and students working in the areas of education philosophy and sociology particularly those with an interest in educational freedom democracy and social justice *Metaphors We Teach By* Dr. Ken Badley, Harro Walter Van Brummelen, 2012-06-01

Metaphors We Teach By helps teachers reflect on how the metaphors they use to think about education shape what happens in their classrooms and in their schools Teaching and learning will differ in classrooms whose teachers think of students as plants to be nurtured from those who consider them as clay to be molded Students will be assessed differently if teachers think of assessment as a blessing and as justice instead of as measurement This volume examines dozens of such metaphors related to teaching and teachers learning and learners curriculum assessment gender and matters of spirituality and faith The book challenges teachers to embrace metaphors that fit their worldview and will improve teaching and learning in their classrooms
