STEM Education: An Overview of Contemporary Research, Trends, and Perspectives Elliott Ostler,2015-09-04 STEM Education An Overview of Contemporary Research Trends and Perspectives is a resource designed for STEM professionals in the field of education The book contains essays on STEM content ethics history research and educational programs **Words and Worlds** ,2009-01-01 In this book the reader is invited to enter a strange world in which you can tell the age of the captain by counting the animals on his ship where runners do not get tired and where water gets hotter when you add it to other water It is the world of a curious genre known as word problems or story problems It originated in the ancient civilizations of Egypt China and India and is the subject of daily rituals among students and teachers in mathematics classrooms all around the world An international group of scholars with a shared interest in this phenomenon explore multiple aspects of this world from multiple perspectives These discussions take us deep into philosophical issues of the relationships between words mathematical systems and the physical and social worlds we all inhabit Empirical investigations are reported that throw light on how students and their teachers experience and interpret this activity raising profound questions about the nature and purposes of mathematics teaching learning in general and how it could be improved

Changing Teaching. Changing Teachers Keith Wood,Saratha Sithamparam,2020-11-23 A unique feature of this book is its focus on engaging teachers themselves in changing teaching as a way to bring about teacher change through lesson study and learning study The sequence changing teaching changing teachers is significant This approach to professional development is not about telling teachers what and how they should teach to bring about change in their students learning outcomes It is about empowering teachers to make their own decisions about what needs to change Empowering teachers in

this way has been identified as the soul of Japanese lesson study Cheng 2019 It is the soul which can so easily be compromised when lesson study is adopted and inevitably it seems adapted in new contexts around the globe Without teacher empowerment top down curriculum development is almost bound to fail In presenting the cases of collaborative professional development included in this book care has been taken to include the teachers voices They are intended to be the subjects and not the objects of our research into teachers professional development

Chinese as a Second Language Research from Different Angles ,2024-04-02 A crucial question for Chinese as a Second Language research is how to help elevate Chinese language teaching methodology to the level of other world language methodologies such as English Spanish and German This work goes in two directions One explores how to apply research results achieved in Chinese linguistics to Chinese language teaching and the other is engaged in creating a strong applied linguistics research field that supports Chinese language teaching CASLAR scholars are mainly involved in the latter one This book is a representative sample of their research endeavors

Supporting Learning Flow Through Integrative Technologies Tsukasa Hirashima, Ulrich Hoppe, Shelley Shwu-Ching Young, 2007 Contains a range of issues related to using information technology for learning This book indicates a move from local support of specific learning activities towards supporting learning and teaching processes in a broader context beyond single tools and individuals users considering user learner groups on different levels of granularity

Teachers Creating Context-Based Learning Environments in Science R. Taconis, den Brok P., 2016-10-26 Context based science education has led to the transformation of science education in countries all over the world with changes also visible in learning environments and how these are being shaped These changes involve authentic problems on research and design new types of interactions within communities of practice new content areas and also new challenges for teachers in teaching motivating scaffolding and assessing their students among other things This book focuses on context based science education and its resulting changes in the perspective of research on learning environments It also focuses on the implications for the teachers and the professional development of their competencies and beliefs The book consists of eleven chapters by experts in various themes surrounding learning environments research and science education preceded by and concluded with a chapter with reflections on context based learning environments in science by the editors of this book The conclusion they draw is that professional development of science teachers may be the most important and the most difficult part of the process of teachers creating context based learning environments in science as is the focus in the title of this book
