Teachers and Students Carnegie Commission on Higher Education,1975 Teachers and Students Carnegie Commission on Higher Education,1975 Higher Education ,1981 **Resources in Women's Educational Equity: Special Issue** ,1979 *Daring to Educate* Yolanda L. Watson,Sheila T. Gregory,2023-07-03 While President Emerita Johnnetta B Cole is credited with propelling Spelman College the oldest historically Black womens college to national prominence little is generally known about the strong academic foundation and legacy she inherited Contrary to popular belief the first four presidents of Spelman including its two co founders were White women who led the early development of the College armed with the belief that former slaves and free Black women should and could receive a college level education This book presents the history of Spelman s foundation through the tenure of its fourth president Florence M Read which ended in 1953 This compelling story is brought up to date by the contributions of Spelman s current president Beverly Daniel Tatum and by Johnnetta B Cole The book chronicles how the vision each of these women presidents and their response to changing social forces both profoundly shaped Spelman s curriculum and influenced the lives and minds of thousands of young Black women The authors trace the evolution of Spelman from its beginning when the founders aware of the limited occupations open to its graduates strove to uplift the Black race by providing an academic education to disenfranchised Black women while also providing training for available careers to the fifties when the college became an exemplar of liberal arts education in the South This book fills a void in the history of Black women in higher education It will appeal to a wide readership interested in women s studies Black history and the history of higher education in general *Good Teaching in Higher Education* Immanuel Ulrich,2023-08-23 How do I plan my course How can I inspire students How do I present myself How do I want to teach How do I test correctly What teaching methods are there Due to the lack of comprehensive university didactic training teachers too often have to answer these and many other questions for themselves This book is intended to counteract this and presents practical tips on good university teaching for all disciplines based on the current state of research Involvement in Learning National Institute of Education (U.S.). Study Group on the Conditions of Excellence in American Higher Education,1984 **Teaching and Learning in Higher Education** Beatrice L. Bridglall,2013-08-28 Concerns with how students are taught and whether and how they learn has become particularly salient in higher education This is evident in growing awareness of increases in time to degree and declines in attainment rates for many students including those who are underrepresented in our nation s community and public and private colleges and universities It is also demonstrated vis vis recent findings that more than a third of college students evinced no noticeable improvement in critical thinking writing and complex reasoning skills after four years as an undergraduate These findings suggest that while a focus on access to and participation in the nation s colleges and universities remain a prominent goal it is no longer sufficient given persistent disparities in post secondary student learning There are a few models however from which we can

distill a set of strategies for promoting not only high achievement but also retention and completion rates This book examines three such models in higher education the Meyerhoff Scholars Program at the University of Maryland Baltimore County the Opportunity Programs at Skidmore College in Saratoga Springs New York and the Premedical Program at Xavier University in New Orleans with a proven record of student achievement and completion **Resources in Education** ,2000-10

Teaching and learning in higher education: The role of emotion and cognition Jian-Hong Ye,Mei Yen Chen,Yung-Wei Hao,2023-07-24 **Proceedings of the 2023 2nd International Conference on Social Sciences and Humanities and Arts (SSHA 2023)** Mohd Fauzi bin Sedon,Intakhab Alam Khan,Mehmet CÜNEYT BİRKÖK,KinSun Chan,2023-06-29 This is an open access book With the progress of social civilization social science and its research are becoming more and more important Theoretically and practically the study of social phenomena and social problems and the development of prosperous social sciences are the eternal themes of human beings At present social science research and its results can hardly meet the needs of social development especially the unscientific evaluation of social science results which has aroused great concern from all walks of life and has produced dirt and questions on social science thus affecting the proper development of social science Max Weber once said that the most important function of social science in modern times is to keep people clear headed and to resist the delusions of prophetic legislators Humanities and arts are the process of perceiving realizing thinking manipulating and expressing objective or subjective objects through capturing and excavating feeling and analyzing integrating and applying or displaying the stage results in the form obtained through feeling seeing hearing smelling touching The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions And by reacting to today s increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc **Statistical Reference Index** ,1990 Asian Americans in Higher Education: Charting New Realities Yoon K. Pak,Dina C. Maramba,Xavier J. Hernandez,2014-03-25 The Asian American and Pacific Islander AAPI population continues to obfuscate the discourse on diversity and higher education institutions The historical and contemporary experiences of AAPIs in higher education clearly indicate that their presence has influenced and reinforced the importance of diversity in educational environments To contextualize AAPIs participation in postsecondary education this monograph provides A historical overview of the model minority stereotype The affirmative action debate and AAPIs Their involvement in the education pipeline A discussion of their experiences in college Implications

for future research practice and policy are further discussed Educators administrators faculty policy makers and researchers who are concerned with diversity issues and the AAPI population will find this monograph an engaging and valuable resource
