**Emerging Trends in Digital Era Through Educational Technology** Dr. Manichander T., **Re-envisioning The Role of Technology in Education** Md Siddique Hossain, 2023-03-10. The unprecedented developments in education information and communication technology that took place during the last decades of the twentieth century have led to a metamorphosis of processes and practices in almost all spheres of human endeavours. Higher education has undergone important paradigm shifts which include the shift from a teacher centric system of learning to a student centric system of learning and the replacement of the traditional practice of learning over a specified period of time by the concept of lifelong learning. Education technology (ET) and information communication technology (ICT) today play an important role in productive and relevant learning. In this context, it is necessary to appreciate the fact that the first step towards realizing the aim of making our society a continuously learning society is to make education accessible and affordable for all.

**Developing Countries and Technology Inclusion in the 21st Century Information Society** Etim, Alice S., 2020-11-27. In recent years, many developing regions across the globe have made rigorous efforts to become integrated into the global information society. The development and implementation of information communication technology (ICT) devices and policies within various fields of service have significantly aided in the infrastructural progression of these countries. Despite these considerable advancements, there remains a lack of research and awareness on this imperative subject. *Developing Countries and Technology Inclusion in the 21st Century Information Society* is an essential reference source that discusses the adoption and impact of ICT tools in developing areas of the world as well as specific challenges and sustainable uses within various professional fields.
