Congress. Senate. Committee on Human Resources. Subcommittee on Health and Scientific Research,1977      **The Establishment Of Communist Regimes In Eastern Europe, 1944-1949** Norman

Naimark,2018-02-07 The collaborative effort of scholars from Russia and the United States this book reevaluates the history of postwar Eastern Europe from 1944 to 1949 incorporating information gleaned from newly opened archives in Eastern Europe For nearly five decades the countries of Yugoslavia Poland Albania Bulgaria Romania Hungary Czechoslovakia and the Soviet zone of Germany were forced to live behind the iron curtain Though their experiences under communism differed in sometimes fundamental ways and lasted no longer than a single generation these nations were characterized by systematic assaults on individual rights and social institutions that profoundly shaped the character of Eastern Europe today The emergence of the former People s Democracies from behind the iron curtain has been a wrenching process but as this book demonstrates the beginning of the communist era was equally as traumatic as its end With the opening of the archives in Russia and Eastern Europe the contributors have been able to get a much firmer grasp on Soviet policies in the region and on East European responses and initiatives which in turn has yielded more satisfying answers to vexing questions about Soviet intentions in the region and the origins of the Cold War Exploring these events from a new better informed

perspective the contributors have made a valuable contribution to the historiography of postwar Europe      Congressional Record United States. Congress,1971 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873      **Other Germanies**

Karen Jankowsky,Carla Love,1997-10-16 This book introduces American audiences to Germany through the perspectives of

members of various ethnic groups within the newly unified country and through the mediation of feminist scholars documenting the artistic contributions to German cultural identity of ten women writers filmmakers dancers and visual artists The work of these artists is presented in various ways as an opportunity for Germans to explore their own repressed identities as a portrayal of the complex histories of cultural change which foreigners bring into Germany as the work of piecing together a minority identity in Germany as a portrayal of the marginalization of women in the construction of the nation and as the interpenetration of Eastern and Western European cultures These artists subvert the process of forming a singular cultural identity by calling into question the creation of a unified personal identity They represent for example the fragmentation of identity through images of amputation the arbitrary construction of identity through games of chance the struggle within the writing self to resist censorship in East Germany and the protest against a culturally imposed identity based on racial categorization The volume s eleven articles address issues of multiculturalism national and personal identity and avant garde art and reflect on the various ways gender and culture interact in the German context

**Trust beyond Borders** Markus M. L. Crepaz, 2010-04-23 Will immigration undermine the welfare state Trust beyond Borders draws on public opinion data and case studies of Germany Sweden and the United States to document the influence of immigration and diversity on trust reciprocity and public support for welfare programs Markus M L Crepaz demonstrates that we are at least in some cases capable of trusting beyond borders of expressing faith in our fellow humans and extending help without regard for political classifications In Europe the welfare state developed under conditions of relative homogeneity that fostered high levels of trust among citizens while in America anxiety about immigration and diversity predated the emergence of a social safety net Looking at our new era of global migration Crepaz traces the renewed debate about us versus them on both sides of the Atlantic and asks how it will affect the public commitment to social welfare Drawing on the literatures on immigration identity social trust and the welfare state Trust beyond Borders presents a novel analysis of immigration s challenge to the welfare state and a persuasive exploration of the policies that may yet preserve it Crepaz contributes much to our knowledge about the link between immigration and social welfare certainly one of the central issues in current national and international politics Stuart Soroka Associate Professor of Political Science and William Dawson Scholar McGill University Finally A book that challenges the growing view that ethnic diversity is the enemy of social solidarity It addresses an issue of intense debate in Western nations it takes dead aim at the theoretical issues at the center of the controversy it deploys an impressive array of empirical evidence and its conclusions represent a powerful corrective to the current drift of opinion Trust beyond Borders will rank among the very best books in the field Keith Banting Queen s Research Chair in Public Policy Queen s University Do mass immigration and ethnic diversity threaten popular support for the welfare state Trust beyond Borders answers no Marshaling an impressive array of comparative opinion data Crepaz shows that countries with high levels of social trust and universal welfare state arrangements can avoid the development of the welfare chauvinism that

typically accompanies diversity Gary Freeman Professor and Department Chair Department of Government University of Texas at Austin Markus M L Crepaz is Professor in the Department of International Affairs at the University of Georgia and Associate Director of the Center for the Study of Global Issues GLOBIS Innovation, Employment and Growth Policy Issues in the EU and the US Paul J.J. Welfens, John T. Addison, 2009-07-21 Economic development has cyclical dynamics and long term dynamics the latter are typically related to demographical changes innovation and long term institutional changes in open economies Financial markets that means mainly capital markets and labor markets are affected in OECD countries both by innovations and institutional reforms As regards demographics ageing is a typical challenge on both sides of the Atlantic and pension reforms in industrialized countries have placed greater emphasis on capital markets than in previous decades Innovation dynamics certainly are also quite important for all high wage OECD countries The Lisbon Agenda has put particular emphasis on more growth higher innovation dynamics and better exploitation of the advantages of a digitally networked society Traditionally the US has a lead in global innovations and the US policy certainly has contributed to the American technological leadership There still is a per capita income gap in favor of the US and the US labor market situation also looks relatively favorable but in the few years since 2001 employment growth in the euro area was higher than that of the US The euro area is however a rather heterogeneous set of countries which differ in terms of institutions attitudes and reform progress and everywhere governments are aware that there have to be reforms not least in the context of globalization which bring a more complex and dynamic spatial structure of value added *Energy Abstracts for Policy Analysis*, 1988 **Journal of the National Cancer Institute**, 1977 **Aspects of Cancer Research**, 1979 *National Cancer Institute Monograph* National Cancer Institute (U.S.), 1979 **National Institutes of Health Annual Report of International Activities** John E. Congress. Senate. Committee on Human Resources, 1977 **The UK Regional-National Economic Problem** Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of

prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government
