**Airline Executives and Federal Regulation** Walter David Lewis,2000 This book is a collection of eight case studies of relationships between airline executives and federal regulatory agencies from the passage of the Air Commerce Act in 1926 to the Airline Deregulation Act of 1978 By focusing on the lives and personalities of individual entrepreneurs W David Lewis and his contributors hope to explore the interaction between technology government regulation and entrepreneurship Each essay in the book focuses on a particular airline executive such as Eddie Rickenbacker Robert Six and Donald Nyrop Lewis has been careful to give a variety of perspective Airlines of various types are represented large and small scheduled and unscheduled Some of the executives profiled were known for having adversative relationships with federal regulators whereas others wholeheartedly accepted regulation and thrived under it There have been public calls for a return to airline regulation and Lewis thinks it is not inconceivable that regulation may ultimately return if problems continue and conditions deteriorate further But he says it is well to remember that deregulation occurred because there were flaws in the regulatory system it replaced This collection of essays scholarly and well documented but written in a lively style suitable for specialists and nonspecialists alike provides a long range perspective on the issue of airline deregulation *Catalog of Copyright Entries. Civil Aeronautics Board. Special Staff on Regulatory Reform, 1975 *Airline Deregulation* Kenneth Button, 2017-04-21 The end of the twentieth century saw remarkable changes in the way that economic regulation was viewed There occurred a liberalization of attitude and something of a withdrawal of the state from its interventionist role These changes were particularly pronounced in the context of transport where the long standing tradition had been one of market intervention by the government The aim of this book first published in 1991 is to examine the outcomes of deregulation on the international airline industry and to consider whether the experiences of market liberalization reveal any common threads In particular whether they reveal any universal indications of how underlying transport markets function how management responds to new stimuli the degree of protection needed by transport users and nature of the transition process from regulation to liberalization *The American Economic Review* , 1974 Includes annual List of doctoral dissertations in political economy in progress in American universities and colleges and the Hand book of the American Economic Association
