The Fighting Liberty Ships Adolph A. Hoehling, 1990-01-01

Launching Liberty Doug Most, 2025-08-19 Out of nothing but the government's behest a few bold men conjured a giant ship building industry in 1940 and launched the ships that took America to war and to victory In 1940 the shadow of war loomed large over American life President Roosevelt understood that it wasn't a matter of if the United States would be pulled into battle but when He foresaw a new kind of war one that hinged on efforts at home Long before the attack on Pearl Harbor German U boats were relentlessly attacking American vessels prompting Roosevelt to launch a monumental ship building campaign He knew that no matter how much weaponry and how many tanks planes and trucks America built the Arsenal of Democracy would be useless unless it could be brought in massive volume and at breakneck speed to troops fighting overseas Launching Liberty tells the remarkable story of how FDR partnered with private businessmen to begin the production of cargo freighters longer than a football field ships he affectionately dubbed ugly ducklings These colossal Liberty Ships took over six months to build at the start of his 350 million emergency shipbuilding program far too long The government turned to Henry Kaiser the man who had delivered the Boulder Dam ahead of schedule and under budget but had never built a ship in his life Kaiser established a network of shipyards from coast to coast and recruited tens of thousands of workers eager to contribute to the war effort Many particularly African Americans and women traveled from some of the most downtrodden rural parts of the nation to help their country and to find a better life of greater equality As German U boats maintained their pace of attack Roosevelt and Kaiser initiated a bold nationwide competition among shipyards to see who could construct ships the fastest Driven by duty and the thrill of innovation workers reduced the shipbuilding timeline from months to weeks and then to days Launching Liberty is a tapestry of voices reflecting the diverse American experience of World War II From the halls of the White House to the cramped quarters of half finished cargo ships we hear from naval architects welders nurses engineers daycare providers and mothers balancing family life with the demands of wartime economy This book uncovers the inspiring untold stories of those who rose to the challenge during one of America's most tumultuous times

They Go to Sea David Arturi, 2003-10 A novel that brings to life the courage of our American merchant seamen and Naval Armed Guard gun crews on convoy duty to England

American Women during World War II Doris Weatherford, 2009-10-16 American Women during World War II documents the lives and stories of women who contributed directly to the war effort via official and semi official military organizations as well as the millions of women who worked in civilian defense industries ranging from aircraft maintenance to munitions manufacturing and much more It also illuminates how the war changed the lives of women in more traditional home front roles All women had to cope with rationing of basic household goods and most women

volunteered in war related programs Other entries discuss institutional change as the war affected every aspect of life including as schools hospitals and even religion American Women during World War II provides a handy one volume collection of information and images suitable for any public or professional library *Sea Ports and Sea Power* Lynn Harris,2016-12-14 This volume represents a more Africanist approach to the framework of maritime landscapes and challenges of adapting international heritage policy such as the UNESCO convention While the concept of a maritime landscape is very broad a more focused thematic strategy draws together a number of case studies in South Africa Namibia Tanzania and Nigeria with a common thread Specifically the contributors address the sub theme of sea ports and sea power as part of understanding the African maritime landscape Sea ports and surrounds are dynamic centers of maritime culture supporting a rich diversity of cultural groups and economic activities Strategic locations along the African coastline have associations with indigenous maritime communities and trade centers colonial power struggles and skirmishes establishment of naval bases and operations and World War I and II engagements *Her Finest Hour: Shipbuilding in the Portland Area during World War II* Robert La Du,2017-01-05 This work describes the monumental accomplishments of the World War II shipyards in Portland Oregon and Vancouver Washington Working twenty four hours a day seven days a week they built and launched thousands of vessels Liberty ships Victory ships tankers aircraft carriers submarine chasers and many kinds of landing craft to help defeat the Axis powers and preserve the way of life of the free world Robert La Du viewed firsthand these activities from his home overlooking shipyards on the Willamette River His father worked at Albina shipyard his sister worked at Henry Kaiser s Swan Island shipyard and he himself as a high school student worked nights at Commercial Iron and Steel shipyard These experiences inform and enhance the pages of *Her Finest Hour* *The American Neptune* ,1996 A quarterly journal of maritime history **World War II Commemorative Bibliography: Convoys in World War II** United States. Library,1991 James Harrod: Founder of Harrodsburg, Kentucky Bobbi Rightmyer,2023 A pioneer a Soldier and a Visionary In 1774 James Harrod founded the oldest permanent English settlement west of the Allegheny Mountains Establishing Harrodsburg was a symbolic act declaring the Kentucky frontier open for settlement Harrod was a soldier and pioneer who was instrumental in exploration of the area His settlement domesticated an area considered wild and untamed and has continued for more than 200 years Author Bobbi Dawn Rightmyer details the beginning of this historic city and life of the man who founded it **I'm a Teacher Too...** Brent M Barry,2005-03 All too often in our great nation s history there seems to be some sort of a separation between the great expectations of the American Education system the greatness of our masses and the awesomeness of the Department of Defense Some have said No American Educator wants a solder sailor or airman telling them how to teach in the average American classroom

Splinter Fleet Theodore R Treadwell,2013-11-12 Hastily built at the onset of World War II to stop German U boats from taking their toll on Allied shipping the 110 foot wooden subchasers were the smallest commissioned warships in the U S

Navy yet they saw as much action as ships ten times their size In every theater of war these expendable workhorses of the fleet escorted countless convoys of slow moving ships through submarine infested waters conducted endless mind numbing antisubmarine patrols and were used in hundreds of amphibious operations Some subchasers worked as gunboats to search for and destroy enemy barges Others rescued downed airmen and retrieved drowning soldiers under heavy enemy fire During the German occupation of Norway three American built subchasers and their Norwegian crews came to be known as The Shetlands Bus for their clandestine work as ferries the only link between Norway and the free world This book written by the commander of one of the subchasers defines their place in naval history and gives readers a taste of life on board the wooden warships Ringing with authenticity it describes the cramped quarters and unforgiving seas as well as the tenacious courage and close bonds formed by the men as they sought out the enemy and confronted nature Long overshadowed by the larger faster warships and more glamorous PT boats of World War II subchasers have been mostly forgotten This work restores the plucky little ships to their hard earned status as significant members of the fleet **Operation Alacrity**

Norman Herz,2014-01-15 To win the war against German U boats the Allies had to protect their convoys in the vast black hole of the mid Atlantic known as the Azores Gap In 1943 they devised a plan to set up air bases on the Azores Islands owned by neutral Portugal It was essential for the operation to remain secret because the Allies had to get there before the Germans who had their own plan to build bases Author Norman Herz took part in the Allied operation as a corporal with the U S Army Corps of Engineers 928th Engineer Aviation Regiment At the time he was given little information about the operation and told never to talk about what he did After the war Operation Alacrity remained mostly unknown kept secret Herz suggests so the U S government would not be embarrassed they had claimed they would not invade the Portuguese territory In researching the book Herz found not a word of the operation mentioned in any official U S history of World War II but a treasure trove of declassified memos and others documents from the files of the U S Joint Chiefs of Staff and the Combined U S U K Chiefs of Staff and in state department files The story is filled with diplomatic intrigue and double dealing including secret meetings between Franklin Roosevelt and Winston Churchill and Churchill s use of a 1373 treaty with Portugal to justify landing in the Azores The story also involves all of the Allied engineering branches from U S Navy Seabees to RAF Sappers The success of their operation is undeniable U boats stopped patrolling the Azores Gap and not a single Allied troopship was lost again in the area Today the base is an important link to American and NATO defense worldwide
