The First Ms Reader:

Controlling Readers Deborah L. McGrady, 2012-12-01 Guillaume de Machaut 1300-1377 was the master poet of fourteenth century France. He established models for much of the vernacular poetry written by subsequent generations and he was instrumental in institutionalizing the lay reader. In particular, his longest and most important work, the *Voir dit*, calls attention to the coexistence of public and private reading practices through its intensely hybrid form: sixty-three poems and ten songs invite an oral performance, while forty-six private prose letters, as well as elaborate illustration and references to its own materiality, promote a physical encounter with the book. In *Controlling Readers*, Deborah McGrady uses Machaut's corpus as a case study to explore the impact of lay literacy on the culture of late medieval Europe. Arguing that Machaut and his bookmakers were responding to contemporary debates surrounding literacy, McGrady first accounts for the formal invention of the lay reader in medieval art and literature, then analyses Machaut and his bookmakers' innovative use of both narrative and bibliographical devices to try to control the responses of his readers and promote intimate and sensual reading practices in place of the more common public performances of court culture. McGrady's erudite and exhaustive study is key to understanding Machaut, his works, and his influence on the history of reading in the fourteenth century and beyond. The

Franciscan Books and their Readers René Hernández, 2025-10-01

Franciscan Books and their Readers explores the manuscripts written, read, and studied by Franciscan friars from the thirteenth to the fifteenth centuries in northern Italy and specifically Padua, assessing four key aspects: ideal space, form, and readership. The ideal is studied through the regulations that determined what manuscripts should aim for. Space refers to the development and role of Franciscan libraries. The form is revealed by the assessment of the physical configuration of a set of representative manuscripts read, written, and manufactured by the friars. Finally, the study of the readership shows how Franciscans were skilled readers who employed certain forms of the manuscript as a portable personal library and as a tool for learning and pastoral care. By comparing the book collections of Padua's reformed and unreformed medieval Franciscan libraries for the first time, this study reveals new features of the ground-breaking cultural agency of medieval friars.

Contemporary American Women Writers Catherine Rainwater, William J. Scheick, 2021-05-11 Ann Beattie, Annie Dillard, Maxine Hong Kingston, Toni Morrison, Cynthia Ozick, Grace Paley, Marge Piercy, Anne Redmon, Anne Tyler, and Alice Walker all seem to be especially concerned with narrative management. The ten essays in this book raise new and intriguing questions about the ways these leading women writers appropriate and transform generic norms and ultimately revise literary tradition to make it more inclusive of female experience, vision, and expression. The contributors to this volume discover diverse narrative strategies. Beattie, Dillard, Paley, and Redmon, in divergent ways, rely heavily upon narrative gaps, surfaces, and silences, often suggesting depths which are lamentably absent from modern experience or which mysteriously elude language. For Kingston and Walker, verbal assertiveness is the focus of narratives depicting the gradual empowerment of female.

protagonists who learn to speak themselves into existence Ozick and Tyler disrupt conventional reader expectations of the anti novel and the family novel respectively Finally Morrison s and Piercy s works reveal how traditional narrative forms such as the Bildungsroman and the soap opera are adaptable to feminist purposes In examining the writings of these ten important women authors this book illuminates a significant moment in literary history when women s voices are profoundly reshaping American literary tradition

Fluency in Reading Zvia Breznitz,2006-08-15 This is the first book to examine in depth the crucial role of the speed of information processing in the brain in determining reading fluency in both normal and dyslexic readers Part I explains fluency in reading from both traditional and modern perspectives Fluency has historically been viewed as the outcome of other reading related factors and has often been seen as a convenient measure of reading skills This book however argues that fluency has a strong impact on other aspects of reading and plays a central role in the entire reading process Part II deals with the determinants of reading fluency Chief among these is the speed of information processing in the brain Using both behavioral and electrophysiological evidence the book systematically examines the features of processing speed in the various brain systems involved in reading visual orthographic auditory phonological and semantic and shows how speed of processing affects fluency in reading Part III deals with the complex issues of cross modal integration and specifically with the need for effective synchronization of the brain processes involved in reading It puts forward the Synchronization Hypothesis and discusses the role of the Asynchrony Phenomenon as a major factor in dyslexia Finally it summarizes research on manipulating reading rate by means of the Acceleration method providing evidence for a possible intervention aimed at reducing Asynchrony Key features of this outstanding new book include Expanded View of Fluency Reading fluency is seen as both a dependent and an independent Variable Currently available books focus on reading rate solely as the outcome of other factors whereas this volume stresses that it is both an outcome and a cause Information Processing Focus Fluency itself is determined to a large extent by a more general factor namely speed of processing in the brain The book presents wide ranging evidence for individual differences in speed of processing across many subpopulations Brain Synchronization Focus The book posits a new theory arguing that effective reading requires synchronization of the different brain systems visual orthographic auditory phonological and semantic Research Based Interventions Interventions

A Reader's Guide to the Choice of the Best Available Books (about 50,000) in Every Department of Science, Art & Literature, with the Dates of the First & Last Editions, & the Price, Size & Publisher's Name of Each Book William Swan Sonnenschein, 1901 **The Reader's Companion to U.S.**

Women's History Wilma Mankiller, 1998 Contains articles on fashion and style household workers images of women jazz and blues maternity homes Native American women Phillis Wheatley homes picture brides single women and teaching *What Women Want* Gayle Graham Yates, 1975 The women's movement is perhaps the most baffling of the recent social reforms to sweep the United States It is composed of numerous distinct groups each with specific interests and goals each with individual leaders and literature What are the philosophies behind these groups Who are their leaders and how have their ideas evolved Do they have a vital connection with the women's movement of the past And where are feminist groups headed In this study that brilliantly illuminates the literature and purposes of feminists *What Women Want* The Ideas of the Movement Gayle Graham Yates has produced the first comprehensive history of feminist women's groups Concentrating chiefly on the movement from 1959 to 1973 when it erupted in such activist groups as the National Organization for Women NOW the Women's Equity Action League WEAL and the National Women's Political Caucus NWPC the author analyzes in detail their literature factions and issues Her survey encompasses virtually every major expression of the movement's multiple facets from *The Feminine Mystique* *Born Female* and *Sexual Politics* to *Sex and the Single Girl* and *Memoirs of an Ex Prom Queen* In a significant breakthrough the author discerns the pattern underlying this diversity which should contribute to a fuller understanding of future developments in the women's struggle She accomplishes this by identifying three key attitudes informing the movement the feminist the women's liberationist and the androgynous or cooperative male female relationship The author provides a sensitive yet critical analysis of the chief spokeswomen in contemporary America activists like Gloria Steinem Shulamith Firestone and Ti Grace Atkinson She treats each of the feminist ideologies with balance and respect yet is refreshingly unafraid to criticize new developments She bolsters her own conclusions in support of an androgynous or equal sexual society with a judicious spirit Scholars and the general public alike will find Yates's book not only an indispensable contribution to women's studies but also a strong and timely addition to contemporary American life and thought **The Christian Science Journal**, 1920 Oscillatory "Temporal Sampling" and Developmental Dyslexia:

Towards an Over-Arching Theoretical Framework Usha Goswami, Alan Power, Marie Lallier, Andrea Facchetti, 2015-04-01

Children with developmental dyslexia fail to acquire efficient reading and spelling skills despite adequate tuition and an absence of overt sensory and or neural deficits Learning to read and spell requires linguistic skills auditory skills and visual skills Oscillatory temporal sampling theory links the development of sensory and linguistic processes The auditory system samples acoustic information at different temporal rates which for speech processing suggests that temporal information encoded by delta theta and gamma oscillations is bound together in the final speech percept Temporal sampling theory proposed a possible deficit in dyslexia in auditory sampling of the speech signal at syllable relevant rates 10 Hz delta and theta This would hypothetically affect prosodic development prior to reading and syllable based parsing which would affect efficient linguistic skills and consequently reading development across languages The visual system also samples information in the visuo spatial field In theory atypical visual oscillatory sampling could therefore be related to some of the visual features of developmental dyslexia In this special issue we bring together visual and auditory sensory processing studies around the general theme of oscillatory temporal sampling Contributors were encouraged to discuss their findings within a temporal sampling perspective The resulting studies cover a wide range of sensory processes with findings both supporting and contradicting the theory It is also important to note that studies covered a wide range of languages and that the behavioural manifestations of a sampling impairment may differ both with language and over the course of development Nevertheless it is encouraging to see such diverse findings considered within a single theoretical framework even if at the same time it is apparent that an over arching theoretical framework encompassing both visual and auditory deficits in dyslexia is yet to be achieved
