Perry, 2023-07-17 Science fiction cinema once relegated to the undervalued B movie slot has become one of the dominant film genres of the 21st century with Hollywood alone producing more than 400 science fiction films annually Many of these owe a great deal of their success to the films of one defining decade the 1950s Essays in this book explore how classic 50s science fiction films have been recycled repurposed and reused in the decades since their release Tropes from Don Siegel's *Invasion of the Body*

In the mid 1950s to combat declining theater attendance, film distributors began releasing pre-packaged genre double bills including many horror and science fiction double features. Though many of these films were low budget and low end, others such as Invasion of the Body Snatchers, Horror of Dracula, and The Fly became bona fide classics. Beginning with Universal International's 1955 pairing of Revenge of the Creature and Cult of the Cobra, 147 officially sanctioned horror and sci-fi double bills were released over a 20-year period. This book presents these double features year by year and includes production details, historical notes, and critical commentary for each film. *Cheap Tricks and Class Acts* John "J.J." Johnson, 2009-02-13. In the 1950s, Hollywood unleashed a wave of monsters: everything from demon aliens and dinosaurs to blobs and bloated bugs infested theaters and drive-ins. Lost worlds were discovered, unnatural terrors shook the screen, gigantism ran rampant. Moviegoers were left with one question: How did they do that? This work uncovers the cheap and challenging behind-the-scenes production secrets of the fantastic films of the 1950s. Special technical effects, visual effects, menacing makeup, stunts, fantastic sets, and film locations are all covered in detail, along with the many men and women who shared in these occasionally brilliant and usually outrageous efforts. Also included is a lengthy checklist of the prominent makeup, stunt, prop, and effects artists of the era, with a listing of their fantastic film credits. *The Golden Age of Science Fiction* John Wade, 2020-11-12. A detailed look at the British world of science fiction in the 1950s. John Wade grew up in the 1950s, a decade that has since been dubbed the golden age of science fiction. It was a wonderful decade for the genre but not so great for young fans. With early television broadcasts being advertised for the first time as unsuitable for children and the inescapable barrier of the X certificate in the cinema barring anyone under the age of sixteen, the author had only the radio to fall back on, and that turned out to be more fertile for the budding SF fan than might otherwise have been thought. Which is probably why, as he grew older, rediscovering those old TV broadcasts and films that had been out of bounds when he was a kid took on a lure that soon became an obsession. For him, the super accuracy and amazing technical quality of today's science fiction films pale into insignificance beside the radio, early TV, and B picture films about people who built rockets in their back gardens and flew them to lost planets or tales of aliens who wanted to take over, if not our entire world, then at least our bodies. This book is a personal account of John Wade's fascination with the genre across all the entertainment media in which it appeared, the sort of stuff he reveled in as a young boy and still enjoys today. Not only a well-researched book grounded in hundreds of sources but also an unmistakable labor of love. *New York Journal of Books* **Keep Watching the Skies!** Bill Warren, 2009-11-30.
