**The Forgotten Frontier** Peter Rivi re,1972      *Frontier Goi s, 1822-1889* David McCreery,2006-10-23 This book examines the development of the state the nation and the economy on the far western frontier of Brazil during the period of the Brazilian Empire The author argues that the province of Goi s although physically in the center of Brazil was effectively the far edge of the Empire thanks to poverty and poor communications Goi s thus provides a useful test case of the limits and effectiveness of nation building and state building and of economic integration into national and international economies during these years The inhabitants of Goi s successfully struggled to develop an interprovincial export trade in cattle at the same time as local elites negotiated a durable and largely peaceful political compromise with the central government Smuggling and tax evasion were key to the development of the economy yet politics remained pro government and largely unruffled by partisan strife until the last decade of the Empire      *Areruya and Indigenous Prophetism in Northern Amazonia* Virg nia Amaral,2024-08-08 Based on four years of ethnographic research this book discusses the presence of Christianity on Areruya an indigenous religious movement practiced by the Ingarik in Northern Amazonia Tracing the role of 19th century missionaries in the region the book shows how shamans started to announce the coming of a cataclysm associated with the promise of indigenous salvation in Christian paradise and the acquisition of the colonizers goods It also explores how the ancient mythological elaboration of salvation after death was reinforced through both an appropriation of some aspects of Christianity and the development of a very violent form of shamanism which epitomizes the evilness ascribed to the human condition on earth Virg nia Amaral offers a valuable reflection on cultural transformations revealing how Areruya is not only a shamanic appropriation of Christianity but also an indigenous and ritualized interpretation of colonization      *Society and Government in Colonial Brazil, 1500-1822* A.J.R. Russell-Wood,2024-10-28 Professor Russell Wood s detailed studies of Brazilian social history in the colonial era have long been recognised as model contributions to the history of class race gender and religion This collection combines work on particular persons and groupings with survey articles on the role of the port and the frontier in colonial Brazil and on its historiography The author describes the administration and structure of government and the realities of royal power with examples drawn from the port cities and the mining townships of the interior then moves on to examine the interplay of class religion and race with reference to brotherhoods of persons of African descent and the racially exclusive Third Orders One group who overcame legal physical and social constraints were women who whether of European or African descent contributed decisively to the economy and society of Brazil To conclude there are accounts of three individuals each of whose experiences illustrate facets of the judicial system governance and education in Portugal s richest colony Les tudes d taill es du professeur Russell Wood sur l histoire sociale br silienne durant la p riode coloniale ont longtemps t reconnues comme un mod le de contribution histoire des classes des races des genres et des religions Cette collection allie des travaux au sujet d individus sp cifiques et de groupements des r sum s d enqu te sur la

du port et de la frontière dans le Brésil colonial et dans son historiographie. L'auteur critique l'administration et la structure gouvernementale ainsi que les réalités du pouvoir royal s'appuyant d'exemples tirés des cités portuaires et des communes minières de l'intérieur. Il passe ensuite à l'examen de l'interaction des classes, des religions et des races en faisant référence aux liens de fraternité qui unissaient les personnes de descendance africaine ainsi qu'aux Troisièmes Ordres qui pratiquaient la *Noble Savage*. **Death, Ritual, and Belief** Douglas J. Davies, 1997-01-01  
Describing a variety of funeral ritual from major world religions and from local traditions this book shows how cultures cope not only with corpses but also create an added value for living through the growth of afterlife beliefs. The key theme of the book is the rhetoric of death: the way cultures use the most potent weapon of words to bring new power to life. Human identity and its transformation through mortuary rites is explored through the mummies of Chile and Egypt, African sacrificial deaths, Indian cremations, immigrant cemeteries in the USA, ancestor rites in Eastern religions and Mormonism and the freezing of the dead in cryonics. Research findings are presented on cremation and afterlife beliefs, especially reincarnation, sensing the presence of the dead and the death of pets in Britain to show how mortuary rituals are constantly changing in response to death as a major feature of the human environment. *Death, Ritual, and Belief* Douglas Davies, 2002-04-30

Describing a great variety of funeral ritual from major world religions and from local traditions this book shows how cultures not only cope with corpses but also create an added value for living through the encouragement of afterlife beliefs. The explosion of interest in death in recent years reflects the key theme of this book: the rhetoric of death: the way cultures use the most potent weapon of words to bring new power to life. This new edition is one third longer than the original with new material on the death of Jesus, the most theorized death ever, which offers a useful case study for students. There is also empirical material from contemporary recent events such as the death of Diana and an expanded section on theories of grief which will make the book more attractive to death counsellors. **Humans and Animals: Intersecting Lives and Worlds**

Anja Höing, Arieahn Matamonasa Bennett, 2019-07-22 This volume was first published by Interdisciplinary Press in 2016. Relationships between humans and non-human animals are deeply complex and often governed by tensions and paradoxes. Both wild and domestic, metaphorical and real, assistants and adversaries, animals effortlessly bridge cultural and natural spaces and form an integral part of human lives. This volume addresses several currently debated topics in science and culture: How shall we rethink, rebuild and re-envision our relationships with other animals? How do we construct ideas of the animal? How can we negotiate animal interests against our own? In which ways do we make sense and use of animals in human cultural spaces? Addressing the non-human animal from the standpoint of various social and cultural constructions from a global and multidisciplinary perspective, the chapters within this volume do not seek to answer these questions but rather to draw attention to the complexity of the underlying issues and the manifold dimensions of the animal-human bond. **The**

Wilcox, 2017-01-24 Brazil has the second largest cattle herd in the world and is a major exporter of beef While ranching in the Amazon and its destructive environmental consequences receives attention from both the media and scholars the states of Mato Grosso and Mato Grosso do Sul actually host the most cattle A significant beef producer in Brazil beginning in the late nineteenth century the region served as a laboratory for raising cattle in the tropics where temperate zone ranching practices do not work Mato Grosso ranchers and cowboys transformed ranching s relationship with the environment including the introduction of an exotic cattle breed the Zebu that now dominates Latin American tropical ranching Cattle in the Backlands presents a comprehensive history of ranching in Mato Grosso Using extensive primary sources Robert W Wilcox explores three key aspects the economic transformation of a remote frontier region through modern technical inputs the resulting social changes especially in labor structures and land tenure and environmental factors including the long term impact of ranching on ecosystems which he contends was not as detrimental as might be assumed Wilcox demonstrates that ranching practices in Mato Grosso set the parameters for tropical beef production in Brazil and throughout Latin America As the region was incorporated into national and international economic structures its ranching industry experienced the entry

of foreign investment the introduction of capitalized processing facilities and nascent discussions of ecological impacts developments that later affected many sectors of the Brazilian economy

**Scoping the Amazon** Stephen Nugent, 2016-07-01

The Amazon Indian is an icon that straddles the world between the professional anthropologist and the popular media Presented alternately as the noble primitive the savior of the environment and as a savage dissolute cannibalistic half human it is an image well worth examining Stephen Nugent does just that critiquing the claims of authoritativeness inherent in visual images presented by anthropologists of Amazon life in the early 20th century and comparing them with the images found in popular books movies and posters The book depicts the field of anthropology as its own form of culture industry and contrasts it to other similar industries past and present For visual anthropologists ethnographers Amazon specialists and popular culture researchers Nugent's book will be enlightening entertaining reading

**Anthropologists in a Wider World** Paul Dresch, Wendy James, David J. Parkin, 2000

The tradition of intensive fieldwork by a single anthropologist in one area has been challenged by new emphasis on studying historical patterns wider regions and global networks Some anthropologists have started their careers from the new vantage point amidst a chorus of claims for innovative methodologies Others have lived through these

changes of perspective and are able to reflect on them while re evaluating the place of fieldwork within the broader aims of general anthropology This book explores these transformations of world view and approach as they have been experienced by anthropological colleagues a number of whom began their work very much in the earlier tradition They cover experiences of field research in Africa Papua New Guinea South America Central and South Asia Europe the Middle East Indonesia Japan and China Constant through the chapters is a distinctively qualitative empirical approach once associated with the village but now being developed in relation to large scale or dispersed communities

**Native and National in Brazil** Tracy Devine Guzmán, 2013-05-27 How do the lives of indigenous peoples relate to the romanticized role of Indians in Brazilian history politics and cultural production Native and National in Brazil charts this enigmatic relationship from the sixteenth century to the present focusing on the consolidation of the dominant national imaginary in the postindependence period and highlighting Native peoples ongoing work to decolonize it Engaging issues ranging from sovereignty citizenship and national security to the revolutionary potential of art sustainable development and the gendering of ethnic differences Tracy Devine Guzman argues that the tensions between popular renderings of Indianness and lived indigenous experience are critical to the unfolding of Brazilian nationalism on the one hand and the growth of the Brazilian indigenous movement on the other Devine Guzman suggests that the indigenous question now posed by Brazilian indigenous peoples themselves how to be Native and national at the same time can help us to rethink national belonging in accordance with the protection of human rights the promotion of social justice and the consolidation of democratic governance for indigenous and nonindigenous citizens alike
