The Formation Of Science In Japan Building A Research Tradition:

The Formation of Science in Japan James R. Bartholomew, 1989 Bartholomew history Ohio State focusing on the years 1868 1921 shows how the cultural background of Japanese feudalism combined with selective borrowing of American and European achievements to create a tradition of domestic scientific research Annotation copyrighted by Book News Inc Portland OR *Science and the Building of a New Japan* M. Low, 2005-08-05 This book highlights the importance of individuals in the shaping of postwar Japan by providing an historical account of how physicists constituted an influential elite An history of science perspective provides insight into their role helping us to understand the hybrid identity of Japanese scientists and how they reinvented not only themselves but also Japan The book is special in that it uses the history of science to deal with issues relating to Japanese identity and how it was transformed in the decades after Japan's defeat It explores the lives and work of seven physicists two of whom were Nobel prize winners It makes use of little known Occupation period documents personal papers of physicists and Japanese language source material

The Making of Modern Chinese Medicine, 1850-1960 Bridie Andrews, 2014-12-20 Medical care in nineteenth century China was spectacularly pluralistic herbalists shamans bone setters midwives priests and a few medical missionaries from the West all competed for patients In the century that followed pressure to reform traditional medicine in China came not only from this small clutch of Westerners but from within the country itself as governments set on modernization aligned themselves against the traditions of the past and individuals saw in the Western system the potential for new wealth and power This book examines the dichotomy between Western and Chinese medicine showing how it has been greatly exaggerated As missionaries went to lengths to make their medicine more acceptable to Chinese patients modernizers of Chinese medicine worked to become more scientific by eradicating superstition and creating modern institutions Andrews challenges the supposed superiority of Western medicine in China while showing how traditional Chinese medicine was deliberately created in the image of a modern scientific practice

A Medicated Empire Timothy M. Yang,2021-06-15 Winner of the 2022 Hagley Prize in Business History In *A Medicated Empire* Timothy M Yang explores the history of Japan s pharmaceutical industry in the early twentieth century through a close account of Hoshi Pharmaceuticals one of East Asia s most influential drug companies from the late 1910s through the early 1950s Focusing on Hoshi s connections to Japan s emerging nation state and empire as well as the ways in which it embraced an ideology of modern medicine as a humanitarian endeavor Yang shows how the industry promoted a hygienic middle class culture that was part of Japan s national development and imperial expansion Yang demonstrates that the company s fortunes had less to do with scientific breakthroughs and medical innovations than with Japan s web of social political and economic relations He lays bare Hoshi s business strategies and its connections with politicians and bureaucrats and he describes how public health authorities dismissed many of its products as placebos at best and poisons at worst Combining global histories of business medicine and imperialism *A Medicated Empire* illuminates how the development of the pharmaceutical industry simultaneously supported and subverted regimes of public health at home and abroad

The Order of Learning Edward Shils, 2013-04-01 The Order of Learning considers the problems facing higher education by focusing on main underlying factors the relationship of higher education to government academic freedom and the responsibilities of the academic profession among others Edward Shils argues that higher education has a central role in society and that distractions such as pressures from government disinterest of students and faculty in education and involvement of institutions of higher learning in social questions have damaged higher education by deflecting it from its commitment to teaching learning and research Shils believes that the modern university must be steadfast in its commitment to the pursuit of truth the education of students and the provision of research Universities should not be all things to all people On one hand the academic community must understand the essential mission of the university and resist distractions On the other government must provide the necessary support to higher education even when the immediate pay

off is not self evident This book provides a refreshing new perspective precisely by taking a traditional stance on the role of higher education in modern society It includes carefully researched and elegantly written essays on many of the central issues facing education today This work will be of great interest to educators and students alike as well as those interested in the future of higher education in the United States *Ruins to Riches* Raymond G. Stokes,2024-05-09 The first comparative account of the remarkable economic recovery of Germany and Japan since the end of World War II **British Engagement with Japan, 1854-1922** Antony Best,2020-11-26 This book by a leading authority on Anglo Japanese relations reconsiders the circumstances which led to the unlikely alliance of 1902 to 1922 between Britain the leading world power of the day and Japan an Asian non European nation which had only recently emerged from self imposed isolation Based on extensive original research the book goes beyond existing accounts which concentrate on high politics strategy and simple assertions about the two countries similarities as island empires It brings into the picture cultural factors particularly the ways in which Japan was portrayed in Britain and ambivalent British attitudes to race and supposed European superiority which were overcome but remained difficulties It charts how the relationship developed as events unfolded including Japan s wars against China and Russia and in addition looks at royal diplomacy where the Japanese Court came eventually to be treated as a respected equal Overall the book provides a major reassessment of this important subject *Academic Freedom and the Japanese Imperial University, 1868-1939* Byron K. Marshall,2023-09-01 Byron K Marshall offers here a dramatic study of the changing nature and limits of academic freedom in prewar Japan from the Meiji Restoration to the eve of World War II Meiji leaders founded Tokyo Imperial University in the late nineteenth century to provide their new government with necessary technical and theoretical knowledge An academic elite armed with Western learning gradually emerged and wielded significant influence throughout the state When some faculty members criticized the conduct of the Russo Japanese War the government threatened dismissals The faculty and administration banded together forcing the government to back down By 1939 however this solidarity had eroded The conventional explanation for this erosion has been the lack of a tradition of autonomy among prewar Japanese universities Marshall argues instead that these later purges resulted from the university s 40 year fixation on institutional autonomy at the expense of academic freedom Marshall s finely nuanced analysis is complemented by extensive use of quantitative biographical and archival sources Byron K Marshall offers here a dramatic study of the changing nature and limits of academic freedom in prewar Japan from the Meiji Restoration to the eve of World War II Meiji leaders founded Tokyo Imperial University in the late nineteenth **History of Universities: Volume XXXIV/1** Ku-Ming Chang,Alan Rocke,2021 History of Universities XXXIV 1 contains the customary mix of learned articles which makes this publication an indispensable tool for the historian of higher education This volume offers a global history of research education in the nineteenth and twentieth centuries **Earthquake Nation** Greg Clancey,2006-05-01 Accelerating seismic activity in late Meiji Japan climaxed in the legendary Great Nobi Earthquake of 1891 which rocked the main island from

Tokyo to Osaka killing thousands Ironically the earthquake brought down many modern structures built on the advice of foreign architects and engineers while leaving certain traditional wooden ones standing This book the first English language history of modern Japanese earthquakes and earthquake science considers the cultural and political ramifications of this and other catastrophic events on Japan s relationship with the West with modern science and with itself Gregory Clancey argues that seismicity was both the Achilles heel of Japan s nation building project revealing the state s western style infrastructure to be surprisingly fragile and a new focus for nativizing discourses which credited traditional Japanese architecture with unique abilities to ride out seismic waves Tracing his subject from the Meiji Restoration to the Great Kant Earthquake of 1923 which destroyed Tokyo Clancey shows earthquakes to have been a continual though mercurial agent in Japan s self fashioning a catastrophic undercurrent to Japanese modernity This innovative and absorbing study not only moves earthquakes nearer the center of modern Japan change both materially and symbolically but shows how fundamentally Japan shaped the global art science and culture of natural disaster

Japanese Capitalism and Entrepreneurship Pierre-Yves Donzé, Julia S. Yongue, 2024-05-27 From being the last country in the world to open its doors to global trade in the 1850s to becoming the second industrialized nation in the 1960s Japan has experienced impressive economic and social development over the last two centuries In the last three decades however it became entrenched in a long phase of economic stagnation dropping from second to third place in the global economy having been overtaken by China in 2010 Inspired by the recent works on the history of capitalism this history of business shows that the Japanese company was not the product of a unique national culture Japanese capitalism was largely shaped by a political economic and institutional environment which offered a variety of new opportunities to entrepreneurs who also played a central role in the process of change Rural capitalism that formed during the period of national seclusion shifted to industrial capitalism after the opening of the nation to global trade this form of capitalism was close to those observed in other late industrializing countries and was characterized by the monopolistic domination of large business groups or zaibatsu during the interwar years The Second World War saw the emergence of wartime capitalism with the central government as the dominant actor in the economy and after 1945 the need to reconstruct the country and catch up with advanced Western economies gave birth to a new form of capitalism based on a cooperative relationship between business and the state communitarian capitalism more broadly known as the Japanese Business System The liberalization and deregulation brought new changes in the business system marked by the emergence of financial capitalism in the 1980s and 1990s

Structuring Mass Higher Education David Palfreyman, Ted Tapper, 2009 Undoubtedly the most important development in higher education in recent years has been the seemingly inexorable expansion of national systems In a comparatively short time period many countries have moved from an elite to a mass model Furthermore expansion has invariably changed the whole experience of higher education for all the interested parties from presidents rectors and vice chancellors to first term undergraduates Structuring Mass Higher Education examines the impact

of this change upon the existing national structures of higher education It also defines and highlights what makes an elite university something which institutions must strive for in order to gain their position as global players With case studies and contributions from a wide range of international authors the book explores questions such as Do higher education institutions retain a national significance even though the vestiges of an international reputation have long faded Has expansion undermined the quality of higher education because governments sought to expand on the cheap Is the elite institutional response to mass higher education perceived as a threat to be responded to with purposeful action that sustains their elite status Does the emergence of the international league tables pose a challenge to those responsible for governing elite institutions These are critical issues with which both policy makers and institutional leaders will have to grapple over the next ten years making Structuring Mass Higher Education a timely relevant and much needed text It will appeal to policy makers and practitioners within higher education as well as student and scholars worldwide
