Species and Speciation in the Fossil Record Warren D. Allmon, Margaret M. Yacobucci, 2016-10-05 Although the species is one of the fundamental units of biological classification there is remarkably little consensus among biologists about what defines a species even within distinct sub disciplines The literature of paleobiology in particular is littered with qualifiers and cautions about applying the term to the fossil record or equating such species with those recognized among living organisms In Species and Speciation in the Fossil Record experts in the field examine how they conceive of species of fossil animals and consider the implications these different approaches have for thinking about species in the context of macroevolution After outlining views of the Modern Synthesis of evolutionary disciplines and detailing the development within paleobiology of quantitative methods for documenting and analyzing variation within fossil assemblages contributors explore the challenges of recognizing and defining species from fossil specimens and offer potential solutions Addressing both the tempo and mode of speciation over time they show how with careful interpretation and a clear species concept fossil species may be sufficiently robust for meaningful paleobiological analyses Indeed they demonstrate that the species concept

if more refined could unearth a wealth of information about the interplay between species origins and extinctions between local and global climate change and greatly deepen our understanding of the evolution of life

Activism and the Fossil Fuel Industry Andrew Cheon,Johannes Urpelainen,2018-02-06 In less than a decade activism against the fossil fuel industry has exploded across the globe While environmentalists used to focus on legislative goals such as carbon emissions trading or renewable energy policies today the most prominent activists directly attack the fossil fuel industry This timely book offers a comprehensive evaluation of different types of activism the success and impact of campaigns and activities and suggestions as to ways forward This book is the first systematic treatment of the anti fossil fuel movement in the United States An accessible and readable text it is an essential reference for scholars policymakers activists and citizens interested in climate change fossil fuels and environmental sustainability The entire book or chapters from it can be used as required or supplementary material in various courses at the undergraduate and graduate level As the book is not technically challenging but contains a comprehensive review of climate change fossil fuels and the literature on environmental activism it can be used as an accessible introduction to the anti fossil fuel campaign across disciplines

The Fossil Hunter Shelley Emling,2009-10-13 At a time when women were excluded from science a young girl made a discovery that marked the birth of paleontology and continues to feed the debate about evolution to this day Mary Anning was only twelve years old when in 1811 she discovered the first dinosaur skeleton of an ichthyosaur while fossil hunting on the cliffs of Lyme Regis England Until Mary s incredible discovery it was widely believed that animals did not become extinct The child of a poor family Mary became a fossil hunter inspiring the tongue twister She Sells Sea Shells by the Seashore She attracted the attention of fossil collectors and eventually the scientific world Once news of the fossils reached the halls of academia it became impossible to ignore the truth Mary s peculiar finds helped lay the groundwork for Charles Darwin s theory of evolution laid out in his On the Origin of Species Darwin drew on Mary s fossilized creatures as irrefutable evidence that life in the past was nothing like life in the present A story worthy of Dickens The Fossil Hunter chronicles the life of this young girl with dirt under her fingernails and not a shilling to buy dinner who became a world renowned paleontologist Dickens himself said of Mary The carpenter s daughter has won a name for herself and deserved to win it Here at last Shelley Emling returns Mary Anning of whom Stephen J Gould remarked is probably the most important unsung or inadequately sung collecting force in the history of paleontology to her deserved place in history
