No Exit James McAllister,2018-09-05 James McAllister outlines a new account of early Cold War history one that focuses on the emergence of a bipolar structure of power the continuing importance of the German question and American efforts to create a united Western Europe Challenging the conventional wisdom among both international relations theorists and Cold War historians McAllister argues that America s central objective from the Second World War to the mid 1950s was to create a European order that could be peaceful and stable without requiring the permanent presence of American ground forces on the continent The permanent presence of American forces in Europe is often seen as a lesson that policymakers drew from the disastrous experiences of two world wars but McAllister s archival research reveals that both FDR and Eisenhower as well as influential strategists such as George Kennan did not draw this lesson In the short term American power was necessary to balance the Soviet Union and reassure Western Europe about the revival of German power but America s long term objective was to create the conditions under which Western Europe could take care of both of these problems on their own In the author s view the key element of this strategy was the creation of the European Defense Community If Western

Germany could be successfully integrated and rearmed within the context of the EDC Western Europe would have taken the most important step to becoming a superpower on par with the United States and the Soviet Union Understanding why this strategy was pursued and why it failed McAllister asserts has important implications for both international relations theory and contemporary questions of American foreign policy **Foreign Relations of the United States** United States.
