Wordsworth who drew upon the sciences of population to develop a biopolitics beyond liberalism These authors attempted what Roberto Esposito describes as an affirmative biopolitics which rejects the principle of establishing security by distinguishing between valued and unvalued lives seeks to support even the most abject members of a population and proposes new ways of living in common Infectious Liberty expands our understandings of liberalism and biopolitics and the relationship between them while also helping us to understand better the ways creative literature facilitates the project of reimagining what the politics of life might consist of Infectious Liberty is available from the publisher on an open access basis
