**Man and His Future** G. E. W. Wolstenholme, 2009-09-18 The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology chemistry and medicine assembled to present papers and discuss results The Novartis Foundation originally known as the Ciba Foundation is well known to scientists and clinicians around the world      *A Scientific Demonstration of the Future Life* Thomson Jay Hudson, 1900      **The Future of Man** P.B. Medawar, 2019-06-07 Originally published in 1960 The Future of Man is a chronicle of Professor Medwar s Reith lectures of 1959 The book outlines his predictions about the future estate of man with the process of foretelling rather than with what is actually foretold He asks can we predict the future size of populations What is the evidence and theoretical background for the belief that human intelligence is declining Could human beings become uniformly excellent or is inborn diversity and inequality a necessary part of the texture of human populations The lectures tried to answer these questions and attempts to end with a definition of the biological standing of man This book will be of interest to anthropologists biologists and natural historians      *The Future Evolution of Man ... Compiled with a Summary and Notes* by P.B. Saint-Hilaire. (Second Edition.). , 1974      **The Heart and the Future Evolution of Man** Imre Vallyon, 2003      **A Scientific Demonstration Of The Future Life** Thomas Jay Hudson, 2012 The present work is devoted to a scientific inquiry concerning man s prospects for a future life In pursuing this inquiry the author has endeavored to follow the strictest rules of scientific induction taking nothing for granted that is not axiomatic and holding that there is nothing worthy of belief that is not sustained by a solid basis of well authenticated facts In other words he has studied the science of the soul precisely as the physical sciences are studied namely from an attentive observation and a systematic

classification of the facts pertaining to the subject matter      *The Spiritual Origins of Eastern Europe and the Future Mysteries of the Holy Grail* Sergei O. Prokofieff, 1993 And however paradoxical it may seem today the Grail mood is in the fullest sense to be found in Russia And the future role that Russia will play in the sixth post Atlantean epoch a task of which I have so often had to speak rests firmly upon this unconquerable Grail mood in the Russian people Rudolf Steiner Nov 3 1918 Although Eastern Europe has been part of Christian humanity for more than a thousand years its task and spiritual identity remain a mystery the answer to which cannot be found unless we look behind outer historical events to the spiritual meta historical dimensions of history This momentous work breathtaking in its scope and detail represents just such a penetrating esoteric study of Eastern Europe in the light of Rudolf Steiner's spiritual research Prokofieff shows how from the earliest times the future conscience of humanity flowed from hidden mystery centers in Hibernia to the eastern Slavic peoples As a result qualities of compassion patience and willingness for sacrifice developed in their souls creating a truly Christian Grail mood Despite incalculable suffering from the persecutions by the Mogul hordes of the thirteenth century to the Bolshevik experiment of the twentieth century this quality has become an unconquerable force in the depths of their being In illuminating the maya of outer history Prokofieff reveals the forces that have been at work to hinder the progress and future intentions of humankind Those adversarial forces have created a karma of materialism that the eastern Slavic peoples have taken upon themselves out of their exalted willingness for sacrifice Will we be able to use the present opportunity granted by this sacrifice to fulfill the primary purposes of the present cultural epoch Serious study of this book intended for students of spiritual science can lead to a profound awakening to the challenges that face humankind today      **The Future Evolution of Man. The Divine Life Upon Earth. Compiled with a Summary and Notes by P.B. Saint-Hilaire. [With a Portrait.].** P. B. SAINT-HILAIRE, 1963      **The Future Affects the Past** Tonnerre, 2013-06-04 Music and nature inspire my writings so I traveled extensively during the writing process of this book I began writing this philosophy treatise at the heart of America by the banks of the Missouri River where I used to drown myself in the magnificent music of the wilderness when I went on my evening walks I would stroll solo in the woods and emerge to rest on a bench facing an ocean blue sky and abysmal thoughts would come to me of their own accord like d j vus There I would sit and sup on the cool evening breeze and witness our great golden star fall behind the distant red horizon like a sinking ship and the beatific and tragic sight of that dying day would fill me up with emotions In that solitude where a person hears their own thoughts speak loudest I would give into a deep ocean of contemplation and examine the nature of the world like a tyrant beholding an atlas of the world I would ask myself deep philosophical questions like if a seed growing into a tree and a tree growing into a forest is only a brief moment in the history of time then how much shorter is my life in this world And if earth is only a dust particle floating in the desert of space then how infinitesimal am I in the infinite infinities and diversities of nature Who or what put me in this island called earth Am I just another artifact in the museum of the universe or am I something higher than a flower or a bird or a crystal I

would compile thoughts until my thoughts thoughts reach the limit and my mind nearly faints from exhaustion I read nature and wrote at the park until the moon rose and stars arrived to light up the heaven like an army of glowing fireflies Portions of the book were written by the snowy mountain tops of Utah and at the beaches of Lake Michigan whose pure blue water ebbs away and flows towards the windy metropolis of Chicago I then traveled abroad to Africa to collect and recollect my thoughts in the primordial Garden of Eden in South Sudan with its billions of birds animals and insect s chirping buzzing squealing screaming and singing in the orchestra of life playing in the theatre of Nature I meditated and contemplated about life by the shores of Lake Victoria which reflects the white clouds of Uganda s clear sky in its surface like a gigantic mirror on the ground Then I went on an intellectual mecca to Europe visiting intellectualistic sites like the British Library where Marx wrote the most consequential book of modernity I also went to the British Museum and Oxford University to affirm and confirm the contents of this discourse The book was actually edited in London It is called The Future Affects The Past because the subject of d j vu is the object the other subjects of the book revolve around It was premeditated by fate before I was even born that I would script this book Prior to taking my first breath of life before my heart beat for the first time in this world I already wrote this book and it was a matter of time before destiny made it occur into actuality Wisely so I do not call this book my own because I know that infinity is its source just like the infinitely ancient and creative Nature is the source of all arts and inventions Nature had copyright on all things This book is an avalanche of past and present knowledge it s a culmination of precedent human wisdom it s a synthesis of the insights of many books and many minds I am just a instrument used by greater Nature Nature is a tremendous bow that shoots arrows from infinite distance away and infinite time ago and I am only one of Nature s arrows of fire who live to illuminate the dark world of ignorance with philosophical knowledge

**Man's Future Birthright** Hermann Joseph Muller, 1973-01-01 Hermann Joseph Muller 1890 1967 was a member of the early genetics group at Columbia University that developed the chromosome theory of inheritance T H Morgan received the Nobel Prize in Medicine and Physiology for this work in 1934 and Muller his student received the Nobel Prize in 1946 for his discovery of radiation induced mutation Muller s writings extended beyond contributions to technical journals He was an active critic of social abuse of science he advocated eugenic programs based on free choice and he played a major role in the reform of high school biology Muller s social views were published in magazines and journals which are accessible to scholars more than to the lay reader or student They have been collected here to show how extensively he thought our lives are affected by radiation evolution modern medicine and gene theory He attempted to alert humanity to the dangers of neglect and abuse of their genetic heritage He also used humanistic values to urge mankind to improve itself to foster cooperativeness to increase health and intelligence and to adopt an evolutionary outlook A companion collection of essays The Modern Concept of Nature Essays on Theoretical Biology by H J Muller also published by State University of New York Press deals with Muller s scientific contributions to genetics and evolution It was Muller who developed the relation between

genes and mutation his views on the primacy of the gene in biology are reflected today in the similar primacy of nucleic acids as the basis of life For students of the history of ideas a collection of these essays would illustrate how genetic thinking prepared the world view for molecular biologists The relation of science to values is often neglected because of the inaccessibility of the written contributions of famous scientists To read Muller s major essays in these two areas is an important way to evaluate a scientist s career his maturation of ideas and his developing application of science to society

**The Future of Post-Human History** Peter Baofu,2012-03-15 Is history really so universalistic even when similar events happen in different contexts that as George Santayana 1905 once famously wrote t hose who cannot remember the past are condemned to repeat it This more universalistic view of history can be contrasted with an opposing view which is more relativistic in orientation as shown by the equally known remark by Winston Churchill that h istory is written by the victor to the extent that what is regarded as true in history today may not be so in another era when a new victor comes into power THEX 2011 So which of the two views is correct here Contrary to these opposing views and other ideas as will be discussed in the book history in relation to both universality and relativity is neither possible or impossible nor desirable or undesirable to the extent that the respective ideologues on different sides would like us to believe Of course this challenge to the opposing views about history does not suggest that the study of history is controversial at best or that those fields related to the study of history like political science economics military studies anthropology sociology psychology philosophy theology literature ethics and so on should be rejected too Needless to say neither of these extreme views is reasonable Rather this book offers an alternative better way to understand the future of history especially in the dialectic context of universality and relativity while learning from different approaches in the literature but without favoring any one of them or integrating them since they are not necessarily compatible with each other Instead this book offers a new theory that is the multifold theory of history to go beyond the existing approaches in a novel way If successful this seminal project is to fundamentally change the way that we think about history from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what the author originally called its post human fate **The Future of the Universe**

A.J. Meadows,2007-05-27 Many excellent books have been written about the past history of the universe and of the various objects galaxies stars planets to be found in it All the exciting events from the original Big Bang to the appearance of human beings have been carefully recorded Much less has been written about what comes next What will happen to all these galaxies stars and planets in the future And what will happen to us and to any other intelligent life in the u verse It is obviously more dif cult to examine the future than the past but there are ways of doing it Not everything in the universe is the same age so a study of the older objects gives us some idea of what will happen to the younger objects Some things vary in a fairly regular way so you can guess what will happen next For example the number of spots visible on the Sun s surface increases and then decreases again every eleven years on average These ups and downs can be expected to continue for a

considerable time in the future Finally theoretical explanations of how things work at present often give some hint of how they will develop in the future One rule of thumb in astronomy though there are plenty of exceptions is that the further away objects are the less we know about them This means that it is often more difficult to forecast the future for distant objects than for ones nearby
