Limits of Science Wenceslao J. Gonzalez,2016-10-05 The problem of the limits of science is twofold First there is the problem of demarcation i e the boundaries or barriers between what is science and what is not science Second there is the problem of the ceiling of scientific activity which leads to the confines of this human enterprise These two faces of the

problem of the limits the barriers and the confines of science require a new analysis which is the task of this book The authors take into account the Kantian roots but they are focused on the current stage of the philosophical and methodological analyses of science This vision looks to supersede the Kantian approach in order to reach a richer conception of science *The Future of Computer Science Research in the U.S.* United States.
