The Future Of Theology:

The Future of Theology Miroslav Volf, Carmen Krieg, Thomas Kucharz, 1996 This is a print on demand book and is therefore non returnable Perhaps no other theologian of the second half of this century has shaped theology so profoundly as has Jürgen Moltmann He appeared on the world theological scene with his *Theology of Hope* 1964 and took most of its capitals by storm His subsequent works have kept him at the forefront of the modern theological enterprise and the power of his vision and the originality of his method have inspired a host of new theologians In terms of fecundity Moltmann's opus remains unmatched among his generation of theologians More than 130 dissertations written so far on his thought most of them in the past decade testify eloquently to its continued attractiveness In honor of Moltmann's 70th birthday twenty six of the world's leading theologians his friends colleagues interlocutors and former students have contributed to this volume on the future of theology Moltmann himself has always sought to be both contemporary and future oriented his theology can be viewed as an exercise not only from the perspective of God's future but also toward a new human future Thus a book on the future of theology takes up an aspect of his theme and his concern Yet this volume also makes a significant contribution to theology in its own right seeking as it does to address the present crisis of theology As Miroslav Volf writes in his introduction On the threshold of the third millennium the presumed queen of sciences has grown old and feeble unable to see that what she thinks is her throne is just an ordinary chair uncertain about what her territories are and confused about how to rule in the realms she thinks are hers seeking advice from a quarrelsome chorus of counselors each of whom thinks himself the king and ending up with a divided even schizophrenic mind The essays in this volume attempt to revitalize theology as it confronts a difficult future Despite the formidable obstacles that threaten the very survival of theology in the next century religious and cultural plurality the marginalization of theology in public discourse increasing abstraction in the practice of theology pressing issues of gender race poverty and ecology the seemingly archaic voice of theology in post Christian societies the contributors to this volume all believe in the future of theology as a vibrant discipline *The Future of Theology* is organized in three parts Challenges deals with the external or internal problems that theology is facing Perspectives offers proposals on how to meet the challenges Themes concentrates on various issues that need special attention today Together these essays succeed in setting the theological agenda for the future of theology and thereby serve as a fitting tribute to this volume's esteemed honoree Contributors Stanley Hauerwas Elisabeth Moltmann-Wendel John B Cobb Jr James H Cone D Lyle Dabney Ingolf U Dalferth Gustavo Guti rrez Douglas John Hall Ellen T Charry M Douglas Meeks Johann Baptist Metz Konrad Raiser Wolfhart Pannenberg Paul Ricoeur John Howard Yoder Dietrich Ritschl Dorothy S Lee Jon Sobrino Elsa Tamez Geoffrey Wainwright Rosemary Radford Ruether Miroslav Volf Michael Welker Nicholas Wolterstorff Catherine Keller Huns K ng The Future of Theology John Auricchio, 1970 **Apocalyptic and the Future of Theology** Joshua B. Davis, Douglas Harink, 2012-11-07 Ernst Kasemann famously claimed that apocalyptic is the mother of Christian

theology J Louis Martyn's radical interpretation of the overarching significance of apocalyptic in Paul's theology has pushed Kasemann's claim further and deeper Still despite the recognition that apocalyptic is at the core of New Testament and Pauline theology modern theology has often dismissed domesticated or demythologized early Christian apocalyptic A renewed interest in taking apocalyptic seriously is one of the most exciting developments in recent theology The essays in this volume taking their point of departure from the work of Martyn and Kasemann wrestle critically with the promise and possible peril of the apocalyptic transformation of Christian theology With original contributions from established scholars including Beverly Gaventa Stanley Hauerwas Robert Jenson Walter Lowe Joseph Mangina Christopher Morse and Fleming Rutledge as well as younger voices this volume makes a substantial contribution to the discussion of apocalyptic and theology today A unique feature of the book is a personal reflection on Ernst Kasemann by J Louis Martyn himself Ernst Troeltsch and the Future of Theology John Clayton, 1976-08-12 A reassessment of the theology of the German Protestant theologian Ernst Troeltsch 1865-1923 and of his significance for contemporary theology The six papers here presented were originally delivered at an international colloquium on Troeltsch held at the University of Lancaster The contributors focus on the fundamental issues raised by Troeltsch which remain central to theology today and seek to engage him as a discussion partner in a continuing debate Troeltsch has been unduly neglected as a theologian a fact which is due partly to the dominance of the dialectical theology of Barth and Bultmann in Germany after the First World War This book seeks to remedy this state of affairs by dealing critically with Troeltsch's theology as well as constructively with the issues The papers fall into three groups in the first Troeltsch is considered as a Christian theologian in the second are studied the possibilities of systematic and historical theology along Troeltschian lines in the third the questions of what makes Christianity Christian and of Christian claims to exclusive truth are examined in the light of Troeltsch's work Each of the contributors is a noted Troeltsch scholar and the book contains an extensive bibliography which adds to its usefulness to students and scholars alike

The Future of Religion and the Religion of the Future Theodore John Rivers, 2011-11-25 In The Future of Religion and the Religion of the Future Theodore John Rivers explores the changing relationship between technology and religion Rivers draws upon his expertise in the fields of medieval and religious history to discuss how the promotion of Christianity and monasticism in the Middle Ages began a process that has lent religious undertones to the way in which we interact with modern technology Rivers ultimately suggests that the growing presence of technology makes it a likely candidate for the next religious form competing with all the major religions in place today

The Future of Liberal Theology Mark D. Chapman, 2017-11-22 This title was first published in 2002 Two hundred years after

the publication of Schleiermacher's epoch making *Speeches The Future of Liberal Theology* presents a comprehensive and critical re assessment of the past present and future of the liberal tradition in Christian theology In dialogue with the different forms of liberalism emerging from the Enlightenment each of which is carefully defined distinguished international theologians draw on a range of perspectives which represent the diversity of liberal theology Discussing the criticisms of liberalism offered in the twentieth century and engaging with contemporary theological debate which is often deeply hostile to liberalism the conclusions offered for liberal theology range from the deeply pessimistic to the thoroughly optimistic Students clergy and theological educators more broadly will value this critical reflection on the current state of theology and suggestions for its future course together with the serious engagement with issues in theological education which this book presents

The Future of Liberation Theology Ivan Petrella, 2017-03-02 *The Future of Liberation Theology* envisions a radical new direction for Latin American liberation theology One of a new generation of Latin American theologians Ivan Petrella shows that despite the current dominance of end of history ideology liberation theologians need not abandon their belief that the theological rereading of Christianity must be linked to the development of historical projects models of political and economic organization that would replace an unjust status quo In the absence of historical projects liberation theology currently finds itself unable to move beyond merely talking about liberation toward actually enacting it in society Providing a bold new interpretation of the current state and potential future of liberation theology Ivan Petrella brings together original research on the movement with developments in political theory critical legal theory and political economy to reconstruct liberation theology's understanding of theology democracy and capitalism The result is the recovery of historical projects thus allowing liberation theologians to once again place the reality of liberation and not just the promise at the forefront of their task

Karl Barth and the Future of Evangelical Theology Christian T Collins Winn, John L Drury, 2017-09-28 The theology of Karl Barth has often been a productive dialogue partner for evangelical theology but for too long the dialogue has been dominated by questions of orthodoxy Karl Barth and the Future of Evangelical Theology contributes to the conversation through a creative reconfiguration of both partners in the conversation neither of whom can be rightly understood as preservers of Protestant orthodoxy Rather American evangelicalism is identified with the revivalist forms of Protestantism that arose in the post Reformation era while Barth is revisited as a theologian attuned both to divine and human agency In the ensuing conversation questions of orthodoxy are not eliminated but subordinated to a concern for the life of God and God's people By offering an alternative to the dominant constraints this book opens up new avenues for fruitful conversation on Barth and the future of evangelical theology

Theology and the Future Trevor Cairney, David Starling, 2014-07-31 Theology was once queen of the sciences the integrating centre of Christendom's conceptual universe In our own time the very idea of systematic theology is frequently called into question derided as an arcane and superstitious pseudo discipline Even within the church it is commonly disregarded in favour of unreflective piety and pragmatism At the same time the southward shift in world Christianity's centre of gravity prompts crucial questions about the future form and content of theology Within this context *Theology and the Future* offers a case for the continuing viability of theology exploring how it might adapt to changing circumstances and discussing its implications for how we are to imagine and help shape our shared human future Beginning with the question of God this book explores what might be meant by the future of God and what its implications are for Christian theology Chapters follow on the location of theology in global Christianity the church and the academy and on its sources and method The second half of the book explores a wide variety of dimensions of the human future that theology might address and illuminate The essays bring together a mix of specialist theologians and interdisciplinary thinkers to support the assertion that there can be no more critical endeavor to the future than understanding God and all things in relationship to him

Future Faith Graeme Smith, Andrew Todd, 2024-12-30 *Future Faith Public and Practical Theologies for the Contemporary World* explores what is needed for theology to survive and thrive in the next generation As well as declining student numbers and pressures on university theology departments churches are increasingly questioning the value of theological study The volume addresses the need for innovative responses to this crisis which re evaluate the place of theological study in the ecclesial academic social and cultural landscape Focusing on the UK it brings together leading scholars in public and practical theology from the academy and the churches Contributors engage in particular with the insights and work of Professor Stephen Pattison It is argued that the future of contemporary theology lies in its ability to contribute to modern life in practical and public ways If theology is to have a future it must be relevant in the workplace in public institutions and in public life The chapters consider the methodological innovations required for theology to have such a future and investigate specific examples of the practical expressions of a future theology in some important contemporary settings Public theology professional life and chaplaincy are the three key areas in which the outward facing nature of theological reflection is explored and developed *Future Faith* will be of particular interest to scholars and students working in these spheres
