Dark Vanishings Patrick Brantlinger, 2014-01-15 Patrick Brantlinger here examines the commonly held nineteenth century view that all primitive or savage races around the world were doomed sooner or later to extinction. Warlike propensities and presumed cannibalism were regarded as simultaneously noble and suicidal accelerants of the downfall of other races after contact with white civilization. Brantlinger finds at the heart of this belief the stereotype of the self-extminating savage or the view that savagery is a sufficient explanation for the ultimate disappearance of savages from the grand theater of world history. Humanitarians according to Brantlinger saw the problem in the same terms of inevitability or doom as did scientists such as Charles Darwin and Thomas Henry Huxley, as well as propagandists for empire such as Charles Wentworth Dilke and James Anthony Froude. Brantlinger analyzes the Irish Famine in the context of ideas and theories about primitive races in North America, Australia, New Zealand, and elsewhere. He shows that by the end of the nineteenth century, especially through the influence of the eugenics movement, extinction discourse was ironically applied to the great white race in various apocalyptic formulations. With the rise of fascism and Nazism and with the gradual renewal of aboriginal populations in some parts of the world by the 1930s, the stereotypic idea of fatal impact began to unravel, as did also various more general forms of race-based thinking and of social Darwinism.

Integral Development Alexander Schieffer, Ronnie Lessem, 2016-05-23 Alexander Schieffer and Ronnie Lessem introduce a groundbreaking development framework and process to address the most burning issues that humanity faces. While conventional top-down outside-in development has reached a cul-de-sac, a new integral form of development is emerging around the world. Integral Development uniquely articulates this emergent approach and invites us to fully participate in this process. The integral approach has been researched and framed over decades of in-depth experience in transformative development education and practice all over the world. It uniquely combines four mutually reinforcing perspectives: nature and community, culture and spirituality, science systems and technology, and enterprise and economics. Conventional development theory and practice has prioritized the latter two perspectives, neglecting the former two. This has caused massive imbalances in today's world. The four interconnected perspectives allow for a transformative and integrated engagement with core development issues in a way that is locally relevant and globally resonant. Throughout, the practical impact of Integral Development is brought to life through highly innovative cases from around the globe, drawing on the authors' first-hand experience. This makes the book a living demonstration of the power of this pioneering

approach Integral Development shows how individual organizational and societal developments need to be interconnected to release a society's full potential. It shifts the responsibility for large scale development from often distant experts and organizations to each individual community enterprise and institution within the society. It is essential reading and a call to action for everyone concerned with the current state of local and global development. *Daughters of the Pacific* Zohr Dé Ishtar, 1994 This book gives a voice to the Pacific women and shows what strength there is in these underknown cultures our nearest neighbours. The nuclear industry tourism dumping of waste pollution of the oceans all carry a huge price for these islands on the rim of the world and on the rim of our imaginations. *The Discourse about Kurdishness and Indigeneity* Aynur Unal, 2024-09-20 The Discourse About Kurdishness and Indigeneity Kurdish Political Movement in Turkey presents a comprehensive analysis of the self identified Kurdish identity within the Kurdish political movement in Turkey adopting an indigenous perspective. The analysis is mainly focused on the parliamentary politics of three distinct periods in Turkey including the inception of the Kurdistan Workers Party PKK the emergence of other pro Kurdish political parties since the 1990s and the parliamentary politics through the Peoples Democratic Party HDP. In addition to the central perspective of indigeneity the theoretical framework of the book including internal colonialism and Orientalism within Orient perspectives is also employed to critically investigate the relationship of post colonial nation states with multi ethnic societies in the case of Turkey and the Kurdish struggle. The research consists of a mixed methods approach to explore the discourse on Kurdishness by analysing party programs statements and semi structured interviews. The book utilises the Discourse Historical Approach to analyse data and provide an interpretation of the concept of indigeneity within the discourse on Kurdishness. It sheds new light on the Kurdish political movement and other indigenous peoples in Mesopotamia who were rendered invisible after the First World War due to the emerging political discourse in the Middle East. **Transcultural Japan** David Blake Willis, Stephen Murphy-Shigematsu, 2007-11-27 Transcultural Japan provides a critical examination of being Other in Japan. Portraying the multiple intersections of race ethnicity class and gender the book suggests ways in which the transcultural borderlands of Japan reflect globalization in this island nation. The authors show the diversity of Japan from the inside revealing an extraordinarily complex new society in sharp contrast to the persistent stereotypical images held of a regimented homogeneous Japan. Unsettling as it may be there are powerful arguments here for looking at the meanings of globalization in Japan through these diverse communities and individuals. These are not harmonious utopian communities by any means as they are formed in contexts both global and local of unequal power relations. Yet it is also clear that the multiple processes associated with globalization lead to larger hybridizations a global mélange of socio cultural political and economic forces and the emergence of what could be called trans local Creolized cultures. Transcultural Japan reports regional national and cosmopolitan movements. Characterized by global flows hybridity and networks this book documents Japan's new lived experiences and rapid metamorphosis. Accessible and engaging this broad based volume is an attractive

and useful resource for students of Japanese culture and society as well as being a timely and revealing contribution to research scholars and for those interested in race ethnicity cultural identities and transformations *Cultural Genocide and Asian State Peripheries* B. Sautman,2006-10-30 This volume engages the concept and related notions of cultural hegemony cultural erosion cultural hybridity and cultural survival by considering whether five regimes in Asia deploy policies aimed at extirpating the language religion arts customs or other elements of the cultures of non dominant peoples **Wild Ideas** David Rothenberg,1995 *Minorities in Global History* Holger Weiss,2024-04-04 This collection analyses the concept of minority and minorities in global history Taking transnational transregional and comparative approaches it explores narratives of inclusion and exclusion both conceptually and through case studies Exploring examples of marginalization in Imperial Russia early 20th century Korea WWII China and Postcolonial Africa amongst others the chapters in this volume seek to understand the entanglements of fluid minorities and native populations in various historical settings They explore dynamics between nation states and empires minority majority processes in post imperial and post Soviet contexts fourth world perspectives and transnational minority movements Taken together the contributions to this collection address the exposure to and challenge of historical and contemporary treatments of marginalization exclusion belonging and inclusion in global history *Cloak of Green* Elaine Dewar,1995 Most concerned citizens trust environmental groups to fight on behalf of the public for sensible solutions to the world s most pressing problems But Elaine Dewar discovered that this trust is often misplaced In this book the award winning journalist explores links between key environmental groups government and big business Written like a mystery *Cloak of Green* follows the author from a Toronto fundraiser for the Kayapo Indians of Brazil to the Amazon rainforest and the global backrooms of Brasilia Washington and Geneva Along the way she meets some fascinating people Anita Roddick of the Body Shop businessman politician Maurice Strong and activists who run key Canadian and American environmental groups She discovers some disturbing revelations about these groups and their relations to green corporations and government *Cloak of Green* is a penetrating investigative study that challenges many established pieties of the environmental movement **Stress Relief for Men** Jed Diamond, Ph.D.,2014-04-01 Depression fatigue chronic pain sexual dysfunction anger and irritability these are just some of the toxic effects of stress *Stress Relief for Men* introduces energy healing techniques based on ancient wisdom and cutting edge science that are designed to neutralize stress so that you can regain inner strength and power in your life without talk therapy or drugs According to preeminent heart surgeon and author Mehmet Oz MD The next big frontier in medicine is energy medicine This essential resource provides the most scientifically sound tools from this emerging new field applied to the most pressing problems facing men today Learn how to Eradicate depression anxiety anger and irritability Improve your love life including better communication with your partner Eliminate chronic pain reduce inflammation and sleep better Develop peace of mind greater well being and a passion for life This book teaches you how to apply these proven energy healing power tools Earthing Grounding healing
