NASA EP. United States. National Aeronautics and Space Administration, 1968      **Unknowability** Nicholas Rescher, 2009-04-16 The realities of mankind's cognitive situation are such that our knowledge of the world's ways is bound to be imperfect. None the less the theory of unknowability agnoscology as some have called it is a rather underdeveloped branch of philosophy. In this philosophically rich and groundbreaking work Nicholas Rescher aims to remedy this. As the heart of the discussion is an examination of what Rescher identifies as the four prime reasons for the impracticability of cognitive access to certain facts about the world: developmental unpredictability, verificational surdity, ontological detail and predicative vagrancy. Rescher provides a detailed and illuminating account of the role of each of these factors in limiting human knowledge, giving us an overall picture of the practical and theoretical limits to our capacity to know our world.

Exotheology Joel L. Parkyn, 2023-08-31 Since antiquity theology has frequently gone hand in hand with the study of the heavens. Speculation regarding the plurality of worlds and the possibility of intelligent life beyond Earth has posed questions for and been stimulated by Christian theology. Advancements in astronomy and astrophysics now reveal a vast universe containing trillions of galaxies. Each new exoplanet discovered brings with it a new context in which to consider the place of humanity and the role of divinity in relation to creatures. In particular the Christian doctrines of the incarnation and redemption must be understood afresh in light of the likelihood of extraterrestrial life. In *Exotheology* Joel L. Parkyn examines the twin historic developments in scientific and theological thought on extraterrestrials from antiquity to the twenty-first century. In doing so he demonstrates a consistent pattern of theological formulations that allow for a distinct relation between Christianity and extraterrestrial life but this has so far been without sufficient resolution. Applying concepts from anthropology, psychology and sociology to putative extraterrestrials he explores in new depth the implications of contact and argues for a divine pedagogy of potential modalities of supernatural presence and action with extraterrestrial intelligences.

**The UFO Experience Reconsidered** Moon Books Schooner Moon Books, Robert L. Mason, 2008-02-01 This book was inspired by and is loosely based on *The UFO Experience: A Scientific Inquiry* 1972 by the late Dr J Allen Hynek. Dr Hynek's book is generally considered to be the most influential book ever written about UFOs but much has happened since 1972. This new book not only brings us up to date but extrapolates on current science whenever possible. Perspectives are offered in three basic categories: natural causes, domestic technology and alien technology. But perhaps more importantly a new way of looking at the phenomena is proposed that has been largely overlooked by other authors and which finds itself at home in any of these three possibilities. The reader will not find discussion of conspiracy theories, accounts of abductions or metaphysical and supernatural hypotheses. However one will find speculations about possible alien visitations, what alien technology might

be capable of or what the distant future might hold      Health and Disease in Tribal Societies Katherine Elliott, Julie Whelan, 2009-09-18 The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology chemistry and medicine assembled to present papers and discuss results The Novartis Foundation originally known as the Ciba Foundation is well known to scientists and clinicians around the world      **The Search for Extraterrestrial Intelligence, SETI** Philip Morrison, John Billingham, John Wolfe, 1977      **The Last Frontier** Karl S. Guthke, 2019-05-15 The existence of intelligent extraterrestrial life has been a subject of debate since the dawn of recorded history The Last Frontier originally published in German in 1983 and now available in Helen Atkins's sensitive English translation traces the development of the idea that Earth is not the only planet inhabited by intelligent beings but that there might be a plurality or even an infinity of worlds with human or humanoid life Focusing on the seventeenth to the twentieth century and taking into account theological philosophical scientific popular and literary writings from American British French and German sources Karl S Guthke demonstrates the continuing importance of this question to the process of human self definition      *The Great Silence* Milan M. Ćirković, 2018 Researchers believe that the universe is vast and old enough that life has evolved and become intelligent and technological many times on different worlds yet we have seen no trace of extraterrestrial intelligence This conundrum known as the Fermi paradox is the deepest mystery in the search for extraterrestrial intelligence This book aims to shed some light on that biggest of questions where is everybody      *Stellar Engineering* Greg Matloff, C Bangs, 2019-04-01 In terms of the scale of the galaxy both in space and time we humans are new comers Though we are newly on the scene we are already thinking about how to create large structures in space Recently analysis of data from one of the stars in the Kepler data set has led to speculation regarding huge artificial structures called Stapledon Dyson Spheres constructed by advanced extraterrestrial civilizations The NASA Kepler space observatory has been observing light curves of about 100 000 stars in the constellations of Cygnus and Lyre This star popularly dubbed Tabby's Star after the first name of the astronomer leading one of the data reduction teams shows intriguing periodic dips in its luminosity Stellar Engineering starts by considering terrestrial organisms and early humans who have constructed on their scale megastructures and continues with a history of the development of the stellar engineering concept Kepler data on the subject star is reviewed as is observational data on other possible Stapledon Dyson Sphere candidates Possible applications of such enormous constructs are discussed as well as the intriguing speculation that we might live in a Stapledon Dyson swarm of alien space habitats within our Solar System's Kuiper Belt The chapter frontispiece art illuminates the ideas presented      What We Know About Extraterrestrial Intelligence Michael Ashkenazi, 2016-09-23 Have you ever wondered what could happen when we discover another communicating species outside the Earth This book addresses this question in all its complexity In addition to the physical barriers for communication such as the enormous distances where a message can take centuries to reach its recipient the book also examines the biological

problems of communicating between species the problems of identifying a non Terrestrial intelligence and the ethical religious legal and other problems of conducting discussions across light years Most of the book is concerned with issues that could impinge on your life how do we share experiences with ETI Can we make shared laws Could we trade Would they have religion The book addresses these and related issues identifying potential barriers to communication and suggesting ways we can overcome them The book explores this topic through reference to human experience through analogy and thought experiment while relying on what is known to date about ourselves our world and the cosmos we live in *Catalog of Copyright Entries. Copyright Office,1976 **Contact with Alien Civilizations** Michael Michaud,2010-05-05 The proper study of mankind is not merely Man but Intelligence 1 Arthur C Clarke 1951 In the long running television series The X Files the original Deep Throat said to FBI Special Agent Mulder that there are those like yourself who believe in the existence of extraterrestrial life Ah but that s not the question If extraterrestrial life exists most of it may be in simpler forms comparable to the one celled organisms of Earth biology Finding such life would be fascinating for scientists but may be of only passing interest to the general public What intrigues the average citizen is the possibility of contact with extraterrestrial intelligence We want to communicate with other sentient beings learning what they know and telling them about ourselves We want to find out how they are like us and how they are different Microorganisms don t have a lot to say There is another implication of contact that underlies this book Intelligent extraterrestrials might have an impact on our future The information they send us if any might change our cultures They could have conscious intentions toward us and possibly the technologies to reach us directly Their intentions may be benign or not Our interest in alien minds is not new The idea that intelligent beings exist beyond the Earth has been part of the Western intellectual tradition for more than 2000 years Sometimes this belief was widespread at other times it was out of fashion Contact with Extraterrestrial Intelligence and Human Law Michael Bohlander,2023-08-07 It is statistically unlikely that humans are the only intelligent species in the universe Nothing about the others will be known until contact is made beyond a radio signal from space that merely tells us they existed when it was sent That contact may occur tomorrow in a hundred years or never If it does it will be a high risk scenario for humanity It may be peaceful or hostile Relying on alien altruism and benign intentions is wishful thinking We need to begin identifying as a planetary species and develop a global consensus on how to respond in either scenario

**Extraterrestrials** Ben Zuckerman,Michael H. Hart,1995-09-28 Experts critically examine the belief that other intelligent life exists in our galaxy The Search for Extra Terrestrial Intelligence David Lamb,2005-07-26 Is the Search for Extra Terrestrial Intelligence a genuine scientific research programme David Lamb evaluates claims and counter claims and examines recent attempts to establish contact with other intelligent life forms He considers the benefits and drawbacks of this communication how we should communicate and whether we actually can He also assesses competing theories on the origin of life on Earth discoveries of former solar planets proposals for space colonies and the consequent technical and

ethical issues      **Starstruck** Albert A. Harrison, 2007 We live in an era of exploding scientific knowledge about the universe and our place and future within it Much of this new knowledge conflicts with earlier wisdom and some has frightening implications Cosmic evolution space exploration the search for extraterrestrial life and concerns about humanity's future prompt us to seek new answers to old existential questions Where did we come from Why are we here Are we alone What will become of us In our search for answers we turn to science religion myth and varying combinations thereof Exploring an ambiguous region between recognized findings and unfettered imagination *Starstruck* explores the multifaceted far reaching and often contentious attempts of people with contrasting worldviews to develop convincing and satisfying interpretations of rapidly accumulating discoveries in physics astronomy and biology      *The Imperfect Art* Ted Gioia, 1990-07-19 Taking a wide ranging approach rare in jazz criticism Ted Gioia's brilliant volume draws upon fields as disparate as literary criticism art history sociology and aesthetic philosophy in order to place jazz within the turbulent cultural environment of the twentieth century He argues that because improvisation the essence of jazz must often fail under the pressure of on the spot creativity we should view jazz as an imperfect art and base our judgments of it on an aesthetics of imperfection Incorporating the thought of such seminal thinkers as Walter Benjamin Jos Ortega y Gasset and Roland Barthes *The Imperfect Art* offers vivid portraits of the giants of jazz and startling insights into this vital musical form and the interaction of society and art
