## **The Ganges:**

The Ganges in Myth and History Steven G. Darian, 2001-01-01 No river has kindled Man's imagination like the Ganges. From its icy origins high in the Himalayas this sacred river flows through the holy cities and the great plains of northern India to the Bay of Bengal. In a country where the red heat of summer inspires prayer for the coming monsoon, the life-giving waters of the Ganges have assumed legendary powers in the form of the Hindu goddess Ganga, the source of creation and abundance. Pilgrims flock to her shores to cleanse and purify themselves, to cure ailments and to die that much closer to paradise. Steven Darian writes of the human experience and the legendary myths that surround the Ganges. While collecting material for this book, Dr. Darian lived by the Ganges, explored her shores, and was a pilgrim to the Ganga Sagar festival at Sagar Island off Calcutta where the sacred river and the ocean merge.

**The Ganges** Raghbir Singh, 1992 Noted photographer Singh makes a personal pilgrimage along the Ganges from the Himalayas where the river arises among snows through the villages of the Gangetic Plain past Banares through Bihar to the Bay of Bengal. Along the way he captures the river in many stages and captures also the lives.

**The Ecology, Exploitation and Conservation of River Turtles** Don Moll, Edward O. Moll, 2004-04-08 The underlying theme of this book is that a widespread taxonomically diverse group of animals important both from ecological and human resource perspectives remains poorly understood and in decline while receiving scant attention from the ecological and conservation community. This volume proposes a comprehensive overview of the world's river turtles, ecology, conservation, and management. It begins with a categorization of taxa which inhabit flowing water habitats followed by information on their evolutionary and physical diversity and biogeography. Within the framework of ecology, the authors discuss the composition of river turtle communities in different types of lotic habitats and regions, population dynamics, movements, reproductive characteristics, and behavior, predators, and feeding relationships. In a conservation and management section, the authors identify and evaluate the nature and intensity of factors which threaten river turtle survival, almost all of which involve direct human exploitation or indirect effects of human-induced habitat alteration and degradation. They then list and evaluate the various schemes which have been proposed or employed to halt declines and restore populations and make recommendations for future management plans for specific species and regions. In closing, they state their viewpoint concerning future research directions and priorities and an evaluation of future prospects for survival of the world's river turtle species.
