Gulf Stream Chronicles

David S. Lee,2015-08-19 Off the shore of Hatteras Island where the inner edge of the Gulf Stream flows northward over the outer continental shelf the marine life is unlike that of any other area in the Atlantic Here the powerful ocean river helps foster an extraordinarily rich diversity of life including Sargassum mats concealing strange creatures and exotic sea beans whales and sea turtles sunfish and flying fish and shearwaters and Bermuda petrels During his long career as a research scientist David S Lee made more than 300 visits to this area off the North Carolina coast documenting its extraordinary biodiversity In this collection of twenty linked essays Lee draws on his personal observations and knowledge of the North Atlantic marine environment to introduce us to the natural wonders of an offshore treasure Lee guides readers on adventures miles offshore and leagues under the sea blending personal anecdotes with richly detailed natural history local culture and seafaring lore These journeys provide entertaining and informative connections between the land and the diverse organisms that live in the Gulf Stream off the coast of North Carolina Lee also reminds us that ocean environments are fragile and vulnerable to threats such as pollution offshore energy development and climate change challenging those of us on land to consider carefully the costs of ignoring sea life that thrives just beyond our view

The Gulf Stream Stan

Ulanski,2008-09-08 Coursing through the Atlantic Ocean is a powerful current with a force 300 times that of the mighty Amazon Ulanski explores the fascinating science and history of this sea highway known as the Gulf Stream a watery wilderness that stretches from the Caribbean to the North Atlantic Spanning both distance and time Ulanski s investigation reveals how the Gulf Stream affects and is affected by every living thing that encounters it from tiny planktonic organisms to giant bluefin tuna from ancient mariners to big game anglers He examines the scientific discovery of ocean circulation the role of ocean currents in the settlement of the New World and the biological life teeming in the stream

The Billfish

Story Stan Ulanski,2013-10-15 The billfish is fixed at the apex of the oceanic food chain Composed of sailfish marlin spearfish and swordfish they roam the pelagic waters of the Atlantic and are easily recognized by their long spear like beaks Noted for their speed size and acrobatic jumps billfish have for centuries inspired a broad spectrum of society Even in antiquity Aristotle who assiduously studied the swordfish named this gladiator of the sea xiphias the sword The Billfish Story tells the saga of this unique group of fish and those who have formed bonds with them relationships forged by anglers biologists charter boat captains and conservationists through their pursuit study and protection of these species More than simply reciting important discoveries Stan Ulanski argues passionately that billfish occupy a position of unique importance in our culture as a nexus linking natural and human history Ulanski both a scientist and an angler brings a rich background to the subject in a multifaceted approach that will enrich not only readers appreciation of billfish but the whole of the natural world

The Whole Story of Climate E. Kirsten Peters,2012-11-20

In the publicity surrounding global warming climate scientists are usually the experts consulted by the media We rarely hear from geologists who for almost two hundred years have been studying the history of Earth s dramatic and repeated climate revolutions as revealed in the evidence of rocks and landscapes This book written by a geologist describes the important contributions that geology has made to our understanding of climate change What emerges is a much more complex and nuanced picture than is usually presented While the average person often gets the impression that the Earth s climate would be essentially stable if it weren t for the deleterious effects of greenhouse gases in fact the history of the earth over many millennia reveals a constantly changing climate As the author explains several long cold eras have been punctuated by shorter warm periods The most recent of these warm spells the one in which we are now living started ten thousand years ago based on previous patterns we should be about due for the return of another frigid epoch Some scientists even think that the warming of the planet caused by man made greenhouse gasses tied to agriculture in the past few thousand years may have held off the next ice age Though this may be possible much remains uncertain But what is clearly known is that major climate shifts can be appallingly rapid occurring over as little as twenty or thirty years One danger of dumping greenhouse gases into the atmosphere is that they may increase the chance that this climate switch will be thrown with catastrophic effects on worldwide agriculture Besides her discussion of climate the author includes chapters on how early naturalists pieced together the complicated geological history of Earth and she teaches the reader how to interpret the evidence of rock formations and landscape patterns all around us Accessible and engagingly written this book is essential reading for anyone looking to understand one of our most important contemporary debates *The Gulf Stream Story* Hans Leip,1957 Water Stories Jim Arnosky,2013-09-24 Adventures on the water with vivid illustrations by award winning naturalist Jim Arnosky In each chapter Arnosky explores a different aquatic habitat and the fascinating creatures that live there And every journey is an adventure including counting crocodiles searching for sunken treasure and a daring rescue in a beat up old rowboat

Committee on Oversight and Government Reform,2009 **All-story Magazine** ,1916 The Short Story Charles May,2013-10-14 The short story is one of the most difficult types of prose to write and one of the most pleasurable to read From Boccaccio s Decameron to The Collected Stories of Reynolds Price Charles May gives us an understanding of the history and structure of this demanding form of fiction Beginning with a general history of the genre he moves on to focus on the nineteenth century when the modern short story began to come into focus From there he moves on to later nineteenth century realism and early twentieth century formalism and finally to the modern renaissance of the form that shows no signs of abating A chronology of significant events works and figures from the genre s history notes and references and an extensive bibliographic essay with recommended reading round out the volume **Real Stories of the Geography Makers** John Thomson Faris,1925

THE SEA - Its Stirring Story of Adventure, Peril & Heroism Frederick Whympers,2022-01-04 The book The Sea Its Stirring

Story of Adventure Peril Heroism is an exciting review of the history of sea travels from the earliest times to the XIX century It includes the first mentions of sea travel the history of shipbuilding mentions the greatest men who pursued geographical discoveries like Columbus and his contemporaries and the deeds of pirates like Sir Francis Drake The author revises the history of the most significant shipwrecks and concludes with poetry dedicated to sea and ship travel The author spent his life traveling on a steamship and collected numerous stories and illustrations of interesting distant places The book is the culmination of his lifetime interest in sea travel history and art *World History* Steven Wallech, Touraj Daryaei, Craig Hendricks, Anne Lynne Negus, Peter P. Wan, Gordon Morris Bakken, 2013-01-22 *World History A Concise Thematic Analysis* presents the highly anticipated second edition of the most affordable and accessible survey of world history designed for use at the college level An engaging narrative that contextualizes history and does not drown students in a sea of facts Offers a comparative analysis of the great civilizations of Eurasia Africa and the Americas Addresses themes of population dynamics food production challenges disease history warfare and other major issues for civilizations Features new interior design and organization to enhance user experience Instructor s test bank available online at <http://www.wiley.com/go/wallech>

Stories of the Ocean Currents Sharr Dee, 101-01-01 *Stories of the Ocean Currents* is a creative and educational exploration of the vital ocean currents that shape our planet Told through imaginative first person narratives from the perspective of currents like the Gulf Stream and the Kuroshio the book transforms scientific concepts into engaging relatable tales It explains how these currents regulate global climate transport nutrients and sustain marine life while also facing threats from climate change and pollution Drawing on scientific research and storytelling the book highlights the interconnectedness of Earth s systems and the critical role of ocean currents in maintaining environmental balance It invites readers whether students nature lovers or curious minds to connect with the natural world in a fresh way By giving voice to the oceans powerful forces the book inspires appreciation understanding and a call to protect these underwater lifelines for the health of the planet and future generations *Technical Innovation in American History* Rosanne Welch, Peg A. Lamphier, 2019-02-22 From the invention of eyeglasses to the Internet this three volume set examines the pivotal effects of inventions on society providing a fascinating history of technology and innovations in the United States from the earliest European colonization to the present *Technical Innovation in American History* surveys the history of technology documenting the chronological and thematic connections between specific inventions technological systems individuals and events that have contributed to the history of science and technology in the United States Covering eras from colonial times to the present day in three chronological volumes the entries include innovations in fields such as architecture civil engineering transportation energy mining and oil industries chemical industries electronics computer and information technology communications television radio and print agriculture and food technology and military technology The A Z entries address key individuals events organizations and legislation related to themes such as industry consumer and medical

technology military technology computer technology and space science among others enabling readers to understand how specific inventions technological systems individuals and events influenced the history cultural development and even self identity of the United States and its people The information also spotlights how American culture the U S government and American society have specifically influenced technological development **Geographical Review** ,1917 52 *ONE PAGE SCIENCE STORIES* Kern E. Kenyon,2017-12-04 In all of these one page science stories the author was directly involved Most of them are arranged chronologically especially near the beginning more technical ones happen to occur near the middle and more speculative ones at the end The author have documented the stories by some citing publications Since the author became an oceanographer many of the stories are related to the ocean in one way or another However some hypothesizing has crept into the later stories that allows the author to break through the boundaries of his or her trained academic expertise One page would be close to the average length of the stories where the range is from half to three pages It has been found possible to summarize a remarkably long period of work sometimes extending over ten years into a single page People not so familiar with science might more readily attempt a short version rather than a lengthier discussion Those who want more can consult the references There are only two short relatively simple equations that probably will not be a stumbling block and incomprehensible jargon has hopefully been eliminated Short poems could have been used to abstract the information but that might be too great a condensation and it is a level of cleverness somewhat beyond the author s reach A few of the stories can be considered to be quick answers to some tales of old wives *American Stories* Helene Barbara Weinberg,Carrie Rebora Barratt,2009 They also consider the artists responses to foreign prototypes travel and training changing exhibition venues and audience expectations The persistence of certain themes childhood marriage the family and the community the attainment and reinforcement of citizenship attitudes toward race the frontier as reality and myth and the process and meaning of making art underscores evolving styles and standards of storytelling Divided into four chronological sections the book begins with the years surrounding the American Revolution and the birth of the new republic when painters such as Copley Peale and Samuel F B Morse incorporated stories within the expressive bounds of portraiture During the Jacksonian and pre Civil War decades from about 1830 to 1860 Mount Bingham Lilly Martin Spencer and others painted genre scenes featuring lighthearted narratives that growing audiences for art could easily read and understand
