The Evolution of Feathers Christian Foth,Oliver W. M. Rauhut,2020-03-11 Feathers are one of the most unique characteristics of modern birds and represent the most complex and colourful type of skin derivate within vertebrates while also fulfilling various biological roles including flight thermal insulation display and sensory function For years it was generally assumed that the origin of flight was the main driving force for the evolution of feathers However various discoveries of dinosaur species with filamentous body coverings made over the past 20 years have fundamentally challenged this idea and produced new evolutionary scenarios for the origin of feathers This book is devoted to the origin and evolution of feathers and highlights the impact of palaeontology on this research field by reviewing a number of spectacular fossil discoveries that document the increasing morphological complexity along the evolutionary path to modern birds Also featuring chapters on fossil feather colours feather development and its genetic control the book offers a timely and comprehensive overview of this popular research topic

Advances and Innovations in Systems, Computing Sciences and Software Engineering Khaled Elleithy, 2007-08-28 Advances and Innovations in Systems Computing Sciences and Software Engineering includes a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of Computing Sciences Software Engineering and Systems Advances and Innovations in Systems Computing Sciences and Software Engineering includes selected papers from the conference proceedings of the International Conference on Systems Computing Sciences and Software Engineering SCSS 2006 which was part of the International Joint Conferences on Computer Information and Systems Sciences and Engineering CISSE 2006 All aspects of the conference were managed on line not only the reviewing

submissions and registration processes but also the actual conference. Conference participants, authors, presenters, and attendees only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground-breaking conference. The on-line structure of this high-quality event allowed academic professionals and industry participants to contribute work and attend world-class technical presentations based on rigorously refereed submissions. Live without the need for investing significant travel funds or time out of the office. Suffice to say that CISSE received submissions from more than 70 countries for whose researchers this opportunity presented a much more affordable dynamic and well-planned event to attend and submit their work to versus a classic on-the-ground conference. The CISSE conference audio room provided superb audio even over low-speed internet connections, the ability to display PowerPoint presentations, and cross-platform compatibility; the conferencing software runs on Windows, Mac, and any other operating system that supports Java. In addition, the conferencing system allowed for an unlimited number of participants, which in turn granted CISSE the opportunity to allow all participants to attend all presentations as opposed to limiting the number of available seats for each session.
