Adamson, 2007 In graphic novel format tells the story of the Apollo 11 mission including the first moon landing in 1969 **The First Men on the Moon** David M. Harland, 2007-10-14 On 12 April 1961 Yuri Gagarin became the first man to orbit the Earth One month later President John F Kennedy challenged the American nation to land a man on the Moon before the decade was out On 16 July 1969 Neil Armstrong Michael Collins and Buzz Aldrin set off in Apollo 11 to attempt this audacious mission and succeeded magnificently This book tells the story of Apollo 11 starting with crew selection and training the choice of the landing site and the assembly of the space vehicle then a detailed account of the mission featuring the lunar landing and moonwalk and a review of how our knowledge of the Moon s history was revolutionised as a result The story is enlivened by dialogue between the astronauts in space and the flight controllers in Mission Control [Apollo 11: The History and Legacy of the First Moon Landing \(The History and Legacy of America's Most Famous Space Missions\)](#) Robert Dawson, 101-01-01 The apollo space program is the most famous and celebrated in american history but the first successful landing of men on the moon during apollo 11 had complicated roots dating back over a decade and it also involved one of nasa s most infamous tragedies Landing on the moon presented

an ideal goal all on its own but the government's urgency in designing the Apollo program was actually brought about by the Soviet Union which spent much of the 1950s leaving the United States in its dust and rocket fuel. In 1957, at a time when people were concerned about communism and nuclear war, many Americans were dismayed by news that the Soviet Union was successfully launching satellites into orbit. Apollo 11, as well as some predecessor missions, as only faked. Overview of the first steps of spaceflight and the preparatory missions for Apollo already here he discovers more pretense than reality. Detailed description of the Apollo 11 mission on the basis of the NASA documentation including the evidence that shows the staging of this mission. Overview of crewed space flight after Apollo 11. Prepare to be captivated as you explore the rabbit hole of technology that propelled humanity into space and the conspiracies questioning its validity. Was the lunar module a technological triumph or is there truth to it being a stage prop fabrication? This book scrutinizes some of the more serious anomalies out there from the perplexing inconsistencies in lunar photography to the enigmatic survival of astronauts through the Van Allen radiation belts.

10 9 ignition sequence start 6 5 4 3 2 1 zero All engines running Liftoff We have a liftoff Thirty two minutes past the hour Liftoff on Apollo 11 Jack King NASA Chief of Public Information At 9 32 a.m. on July 16 1969 time stood still throughout the world as thousands converged on the Kennedy Space Center and millions tuned in on live television. At that instant the first rumbles began to shake the ground as a small spacecraft attached to the giant Saturn V rocket several hundred feet tall started lifting off. Quickly being propelled several thousand miles per hour it takes just a few minutes to reach a speed of 15 000 miles per hour and just a few more minutes to enter orbit at 18 000 miles per hour. Apollo 11 was on its way to a historic first landing on the Moon. Apollo 11's trip to the Moon may have started on that day in 1969 but the journey had begun over a decade earlier as part of the Space Race between the United States and the Soviet Union. While landing on the Moon was a noble goal proposed as early as 1961 by President Kennedy, NASA and the nation as a whole moved with urgency simply to best the Soviet Union which had spent the 1950s beating America to important space-related firsts including launching the first satellite and cosmonaut in orbit. In fact, President Eisenhower's administration began the design for the Apollo program in 1960 in hopes of getting a head start to the Moon despite the fact the plans originated a year before the first Russian cosmonaut Yuri Gagarin orbited the Earth and two years before John Glenn did. Over the decade NASA would spend tens of billions on the Apollo missions, the most expensive peacetime program in American history to that point and even though Apollo 11 was only one of almost 20 Apollo missions, it was certainly the crown jewel, only one of nearly 20 Apollo missions conducted by NASA. And to make Apollo 11 a success it would take nearly a decade of planning by government officials, hard work by NASA scientists, intense training by the astronauts and several

missions preceding Apollo 11 It also cost over 20 billion making the Apollo program the most expensive peacetime program in American history at the time Americans sure felt the cost was worth it as they watched the first live shots of astronauts Neil Armstrong and Buzz Aldrin walking on the Moon As he left his first footprint on the Moon Armstrong transmitted one of the 20th century s most famous phrases That s one small step for man one giant leap for mankind Apollo 11 The History and Legacy of the First Moon Landing comprehensively chronicles the history of the famous mission from the initial designs to the dramatic days of July 1969 and the aftermath Along with pictures of important people places and events you will learn about the first moon landing like you never have before in no time at all Apollo 11 Charles River Editors,2017-02-13 Includes pictures of important people places and events Comprehensively describes the history of the Apollo program including explaining the design and planning that went into it Includes quotes from the astronauts about the mission Includes footnotes 10 9 ignition sequence start 6 5 4 3 2 1 zero All engines running Liftoff We have a liftoff Thirty two minutes past the hour Liftoff on Apollo 11 Jack King NASA Chief of Public Information At 9 32 a m on July 16 1969 time stood still throughout the world as thousands converged on the Kennedy Space Center and millions tuned in on live television At that instant the first rumbles began to shake the ground as a small spacecraft attached to the giant Saturn V rocket several hundred feet tall started lifting off Quickly being propelled several thousand miles per hour it takes just a few minutes to reach a speed of 15 000 miles per hour and just a few more minutes to enter orbit at 18 000 miles per hour Apollo 11 was on its way to a historic first landing on the Moon Apollo 11 s trip to the Moon may have started on that day in 1969 but the journey had begun over a decade earlier as part of the Space Race between the United States and the Soviet Union While landing on the Moon was a noble goal proposed as early as 1961 by President Kennedy NASA and the nation as a whole moved with urgency simply to best the Soviet Union which had spent the 1950s beating America to important space related firsts including launching the first satellite and cosmonaut in orbit In fact President Eisenhower s administration began the design for the Apollo program in 1960 in hopes of getting a head start to the Moon despite the fact the plans originated a year before the first Russian cosmonaut Yuri Gagarin orbited the Earth and two years before John Glenn did Over the decade NASA would spend tens of billions on the Apollo missions the most expensive peacetime program in American history to that point and even though Apollo 11 was only one of almost 20 Apollo missions it was certainly the crown jewel only one of nearly 20 Apollo missions conducted by NASA And to make Apollo 11 a success it would take nearly a decade of planning by government officials hard work by NASA scientists intense training by the astronauts and several missions preceding Apollo 11 It also cost over 20 billion making the Apollo program the most expensive peacetime program in American history at the time Americans sure felt the cost was worth it as they watched the first live shots of astronauts Neil Armstrong and Buzz Aldrin walking on the Moon As he left his first footprint on the Moon Armstrong transmitted one of the 20th century s most famous phrases That s one small step for man one giant leap for mankind Apollo 11 The History and Legacy of the First Moon
