Jesse, John R. Dreyer, 2016-06-16 *Small States in the International System* addresses the little understood foreign policy choices of small states. It outlines a theoretical perspective of small states that starts from the assumption that small states are not just large states writ small. In essence, small states behave differently from larger and more powerful states. As such, this book compares three theories of foreign policy choice: realism and its emphasis on structural factors, domestic factors, and social constructivism, emphasizing norms and identity across seven focused case studies from around the world in the 20th Century. Through an examination of the foreign policy choices of Switzerland, Ireland, Finland, Norway, the Netherlands, Belgium, Ethiopia, Somalia, Vietnam, Bolivia, and Paraguay, this book concludes that realist theories built on great power politics cannot adequately explain small state behavior in most instances. When small states are threatened by larger belligerent states, the small state behaves along the predictions of social constructivist theory; when small states threaten each other, they behave along realist predictions.

Global Financial System 1750-2000 Larry Allen, 2004-03-02 This book traces the evolution of the highly integrated global financial system from 1750 to the present.

Women and Politics Kai Padilla, 2018-12-16 Health psychology is the study of psychological and behavioral processes in health, illness, and healthcare. It is concerned with understanding how psychological, behavioral, and cultural factors contribute to physical health and illness. Psychological factors can affect health directly. Health Psychology is concerned with understanding how biology, behavior, and social context influence health and illness. Health psychologists work alongside other medical professionals in clinical settings, work on behaviour change in public health promotion, teach at universities, and conduct research. For example, chronically occurring environmental stressors affecting the hypothalamic-pituitary-adrenal axis cumulatively can harm health. Health psychology also concerns itself with bettering the lives of individuals with terminal illness. When there is little hope of recovery, health psychologist therapists can improve the quality of life of the patient by helping the patient recover at least some of his or her psychological well-being. Health psychologists are also concerned with providing therapeutic services for the bereaved. The theoretical and conceptual input of the book in the health areas will prove quite beneficial for students and researchers, whereas the ideas and research questions raised in the book will surely provoke the scientists for fulfilling heuristic function.
