The First Person:

First Person Noah Wardrip-Fruin, Pat Harrigan, 2004 The relationship between story and game and related questions of electronic writing and play examined through a series of discussions among new media creators and theorists Naturalism and the First-Person Perspective Lynne Rudder Baker, 2013-02-15 Science and its philosophical companion Naturalism represent reality in wholly nonpersonal terms How if at all can a nonpersonal scheme accommodate the first person perspective that we all enjoy In this volume Lynne Rudder Baker explores that question by considering both reductive and eliminative approaches to the first person perspective After finding both approaches wanting she mounts an original constructive argument to show that a non Cartesian first person perspective belongs in the basic inventory of what exists That is the world that contains us persons is irreducibly personal After arguing for the irreducibility and ineliminability of the first person perspective Baker develops a theory of this perspective The first person perspective has two stages rudimentary and robust Human infants and nonhuman animals with consciousness and intentionality have rudimentary first person perspectives In learning a language a person acquires a robust first person perspective the capacity to conceive of oneself as oneself in the first person By developing an account of personal identity Baker argues that her theory is coherent and she shows various ways in which first person perspectives contribute to reality , **The First Person Singular** William Rose Benét, 1922 Self and Affect Stefan Lang, Maik Niemeck, 2025-01-11 The self self awareness and emotions are central subjects within contemporary philosophy of mind but comparatively little attention has been paid to the relationships between them This volume brings together philosophers from different specialisms to explore these relationships from three different angles First whether a theory of self awareness can contribute to a theory of emotion including how different aspects and kinds of self awareness are related to different emotions Second from the opposite direction whether research into emotions can help achieve a better understanding of self consciousness Finally the book considers how emotions are involved in the nature and development of selves Self and Affect is essential reading for all scholars and researchers of the philosophy of mind especially those focussing on emotions and self awareness *Grammar in Use across Time and Space* Misumi Sadler, 2007-11-06 This monograph contains the first systematic investigation of the Japanese dative subject construction across time and space It demonstrates that in order to capture what speakers writers know about how to put an utterance or a clause together it is necessary to pay attention to what they do in actual language use and in different discourse types The work also shows the importance of diachronic perspectives to help us better understand the ways in which a particular grammatical structure is represented synchronically By utilizing modern Japanese conversation contemporary Japanese novels and a pre modern and modern Japanese literature corpus the study highlights the role of dative subjects at the semantic and discourse pragmatic levels Specifically it demonstrates that what has been considered to be a most grammatical aspect of Japanese actually turns out to be rather pragmatically oriented **Mood and Modality in**

Hurrian Dennis Campbell,2015-04-10 In a long dead language isolate such as Hurrian grammatical studies are replete with difficulties The paucity of material and our inability to compare it to modern well documented languages typically results in more questions than answers Many posited answers to these questions lead inevitably to dead ends Studies in languages such as Hurrian run the risk of either stagnating due to an adherence to the status quo by scholars or fragmenting when no two scholars can or will agree on any point In this book Campbell has in many ways broken with tradition in an attempt to go beneath the surface and reveal further complexities in Hurrian grammar This work the first English language monograph on Hurrian since 1941 is not a dogmatic treatise meant to counter the status quo but an exploration of the complexities of the Hurrian language from a new perspective His conclusions may challenge present perceptions but the hope is that they will in turn inspire challenges for it is only in this way that our understanding of this wonderful language and the people who spoke it can be furthered Mood and Modality in Hurrian provides a formal and functional analysis of the Hurrian modal morphemes Unlike the better known Semitic and Indo European languages of the ancient Near East Hurrian has a rich complement of modal endings This at times bewildering variety in form and function of modal morphemes in Hurrian has been a largely unstudied topic Although it has been touched upon in a number of studies it has not received a detailed treatment until now Beyond a philological treatment of a dead language Campbell also adds to the accumulated knowledge of ergativity This book explores the interplay between ergativity and modality in Hurrian Furthermore Campbell explores the issue of voice in Hurrian and its relation to modality

The Epistemological Skyhook Jim Slagle, 2016-05-20 Throughout philosophical history there has been a recurring argument to the effect that determinism naturalism or both are self referentially incoherent By accepting determinism or naturalism one allegedly acquires a reason to reject determinism or naturalism The Epistemological Skyhook brings together for the first time the principal expressions of this argument focusing primarily on the last 150 years This book addresses the versions of this argument as presented by Arthur Lovejoy A E Taylor Kurt G del C S Lewis Norman Malcolm Karl Popper J R Lucas William Hasker Thomas Nagel Alvin Plantinga and others along with the objections presented by their many detractors It concludes by presenting a new version of the argument that synthesizes the best aspects of the others while also rendering the argument immune to some of the most significant objections made to it

Formal Approaches to Languages of South America Cilene Rodrigues, Andrés Saab, 2023-05-15 This book analyzes the linguistic diversity of South America based on approaches deeply rooted in the tradition of formal grammar The chapters brought together in this contributed volume consider native languages all kinds of languages used in the region including sign languages indigenous languages and the romance languages Portuguese and Spanish originally introduced by European colonizers which underwent processes of transformation giving rise to new local grammars One fourth of the language families of the world are located in South America but the majority of languages in the region are still understudied and out of the radar of theoretical linguistics mostly because their grammars are not well known by international researchers This book aims to fill this gap by bringing together studies rooted in the formal grammar approach first developed by Noam Chomsky which sees language not only as mere corpora attested in oral and written production but also as expressions of systems of thought and language production which are essential parts of human cognition The book is divided in three parts sign languages romance languages and indigenous languages and brings together studies of the following South American languages Brazilian Sign Language Libras L ngua Brasileira de Sinais Argentinian Sign Language LSA Lengua de Se as Argentina Peruvian Sign Language LSP Lengua de Se as Peruana Brazilian Portuguese Chilean and Argentinian Spanish Quechua Paraguayan Guarani A ingae Macro J languages Formal Approaches to the Languages of South America will be an invaluable resource both for theoretical linguists and cognitive scientists by providing access to top quality research on understudied languages and enabling these languages to be incorporated into comparative studies that can contribute to advance the knowledge of general principles governing all human languages

Structuring Mind Sebastian Watzl, 2017 What is attention How does attention shape consciousness In an approach that engages with foundational topics in the philosophy of mind the theory of action psychology and the neurosciences this book provides a unified and comprehensive answer to both questions Sebastian Watzl shows that attention is a central structural feature of the mind The first half of the

book provides an account of the nature of attention. Attention is prioritizing; it consists in regulating priority structures. Attention is not another element of the mind but constituted by structures that organize, integrate, and coordinate the parts of our mind. Attention thus integrates the perceptual and intellectual, the cognitive and motivational, and the epistemic and practical. The second half of the book concerns the relationship between attention and consciousness. Watzl argues that attentional structure shapes consciousness into what is central and what is peripheral. The center-periphery structure of consciousness cannot be reduced to the structure of how the world appears to the subject. What it is like for us thus goes beyond the way the world appears to us. On this basis, a new view of consciousness is offered. In each conscious experience, we actively take a stance on the world we appear to encounter. It is in this sense that our conscious experience is our subjective perspective.

The Logical Alien Sofia Miguens, 2020-01-14. Is our logical form of thought merely one among many, or must it be the form of thought as such? From Kant to Wittgenstein, philosophers have wrestled with variants of this question. This volume brings together nine distinguished thinkers on the subject, including James Conant, author of the seminal paper "The Search for Logically Alien Thought."

The Distinction of Fiction Dorrit Cohn, 2000-12. Winner of the Aldo and Jeanne Scaglione Prize for Comparative Literary Studies from the Modern Language Association. Winner of the Modern Language Association's Aldo and Jeanne Scaglione Prize for Comparative Literary Studies. The border between fact and fiction has been trespassed so often it seems to be a highway. Works of history that include fictional techniques are usually held in contempt, but works of fiction that include history are among the greatest of classics. Fiction claims to be able to convey its own unique kinds of truth. But unless a reader knows in advance whether a narrative is fictional or not, judgment can be frustrated and confused. In *The Distinction of Fiction*, Dorrit Cohn argues that fiction does present specific clues to its fictionality and its own justifications. Indeed, except in cases of deliberate deception, fiction achieves its purposes best by exercising generic conventions that inform the reader that it is fiction. Cohn tests her conclusions against major narrative works, including Proust's *A la Recherche du temps perdu*, Mann's *Death in Venice*, Tolstoy's *War and Peace*, and Freud's case studies. She contests widespread poststructuralist views that all narratives are fictional. On the contrary, she separates fiction and nonfiction as necessarily distinct, even when bound together. An expansion of Cohn's Christian Gauss lectures at Princeton and the product of many years of labor and thought, *The Distinction of Fiction* builds on narratological and phenomenological theories to show that boundaries between fiction and history can be firmly and systematically explored.
