## **The First Person An Essay On Reference And Intentionality:**

**The First Person** Roderick M. Chisholm,1981      **The first person : an essay on reference and intentionality** Roderick M. Chisholm,1981      **Naturalism and the First-Person Perspective** Lynne Rudder Baker,2013-02-15 Science and its philosophical companion Naturalism represent reality in wholly nonpersonal terms How if at all can a nonpersonal scheme accommodate the first person perspective that we all enjoy In this volume Lynne Rudder Baker explores that question by considering both reductive and eliminative approaches to the first person perspective After finding both approaches wanting she mounts an original constructive argument to show that a non Cartesian first person perspective belongs in the basic inventory of what exists That is the world that contains us persons is irreducibly personal After arguing for the irreducibility and ineliminability of the first person perspective Baker develops a theory of this perspective The first person perspective has two stages rudimentary and robust Human infants and nonhuman animals with consciousness and intentionality have rudimentary first person perspectives In learning a language a person acquires a robust first person perspective the capacity to conceive of oneself as oneself in the first person By developing an account of personal identity Baker argues that her theory is coherent and she shows various ways in which first person perspectives contribute to reality

**New Thinking about Propositions** Jeffrey C. King,Scott Soames,Jeff Speaks,2014-01-09 Philosophy especially philosophy of language and philosophy of mind science especially linguistics and cognitive science and common sense all sometimes make reference to propositions understood as the things we believe and say and the things which are primarily true or false There is however no widespread agreement about what sorts of things these entities are In New Thinking about Propositions Jeffrey C King Scott Soames and Jeff Speaks argue that commitment to propositions is indispensable and that traditional accounts of propositions are inadequate They each then defend their own views of the nature of propositions

**Handbook of Autobiography / Autofiction** Martina Wagner-Egelhaaf,2019-01-29 Autobiographical writings have been a major cultural genre from antiquity to the present time General questions of the literary as e g the relation between literature and reality truth and fiction the dependency of author narrator and figure or issues of individual and cultural styles etc can be studied preeminently in the autobiographical genre Yet the tradition of life writing has in the course of literary history developed manifold types and forms Especially in the globalized age where the media and other technological cultural factors contribute to a rapid transformation of lifestyles autobiographical writing has maintained even enhanced its popularity and importance By conceiving autobiography in a wide sense that includes memoirs diaries self portraits and autofiction as well as media transformations of the genre this three volume handbook offers a comprehensive survey of theoretical approaches systematic aspects and historical developments in an international and interdisciplinary perspective While autobiography is usually considered to be a European tradition special emphasis is placed on the modes of self representation in non Western cultures and on inter and transcultural perspectives of the genre The individual contributions

are closely interconnected by a system of cross references The handbook addresses scholars of cultural and literary studies students as well as non academic readers      A Companion to Analytic Philosophy A. P. Martinich,E. David Sosa,2008-04-15 A Companion to Analytic Philosophy is a comprehensive guide to many significant analytic philosophers and concepts of the last hundred years Provides a comprehensive guide to many of the most significant analytic philosophers of the last one hundred years Offers clear and extensive analysis of profound concepts such as truth goodness knowledge and beauty Written by some of the most distinguished philosophers alive some of whom have entries in the book devoted to them      The Reflexive Nature of Consciousness Greg Janzen,2008-03-27 Combining phenomenological insights from Brentano and Sartre but also drawing on recent work on consciousness by analytic philosophers this book defends the view that conscious states are reflexive and necessarily so i e that they have a built in implicit awareness of their own occurrence such that the subject of a conscious state has an immediate non objectual acquaintance with it As part of this investigation the book also explores the relationship between reflexivity and the phenomenal or what it is like dimension of conscious experience defending the innovative thesis that phenomenal character is constituted by the implicit self awareness built into every conscious state This account stands in marked contrast to most influential extant theories of phenomenal character including qualia theories according to which phenomenal character is a matter of having phenomenal sensations and representationalism according to which phenomenal character is constituted by representational content Series A      **Historical Dictionary of Metaphysics** Gary Rosenkrantz,Joshua Hoffman,2011 A dictionary of metaphysical terms with an emphasis on the history of the people and words      **Antifoundationalism** Beth J. Singer,Tom Rockmore,1991 Essays that follow and expound on the foundationalism antifoundationalism debate throughout the history of philosophy      **Christian Ethics and Commonsense Morality** Kevin Jung,2014-11-27 Christian Ethics and Commonsense Morality goes against the grain of various postmodern approaches to morality in contemporary religious ethics In this book Jung seeks to provide a new framework in which the nature of common Christian moral beliefs and practices can be given a new meaning He suggests that once major philosophical assumptions behind postmodern theories of morality are called into question we may look at Christian morality in quite a different light On his account Christian morality is a historical morality insofar as it is rooted in the rich historical traditions of the Christian church Yet this kind of historical dependence does not entail the evidential dependence of all moral beliefs on historical traditions It is possible to argue for the epistemic autonomy of moral beliefs according to which Christian and other moral beliefs can be justified independently of their historical sources The particularity of Christian morality lies not in its particular historical sources that also function as the grounds of justification but rather in its explanatory and motivational capacity to further articulate the kind of moral knowledge that is readily available to most human beings and to enable people to act upon their moral knowledge      **On Social Facts** Margaret Gilbert,2020-06-30 Are social groups real in any sense that is independent of the thoughts actions and beliefs of the individuals making up the group Using methods of

philosophy to examine such longstanding sociological questions Margaret Gilbert gives a general characterization of the core phenomena at issue in the domain of human social life After developing detailed analyses of a number of central everyday concepts of social phenomena including shared action a social convention a group's belief and a group itself she proposes that the core social phenomena among human beings are plural subject phenomena In her analyses Gilbert discusses the work of such thinkers as Emile Durkheim Georg Simmel Max Weber and David Lewis Gilbert's book aims to exhibit some general and structural features of the conceptual scheme in terms of which we think about social groups collective action social convention and shared belief It offers an important corrective to individualistic thinking in the social sciences Michael Root Philosophical Review In this rich and rewarding work Margaret Gilbert provides a novel and detailed account of our everyday concepts of social collectivity In so doing she makes a seminal contribution to some vexed issues in the philosophy of social science An intellectually pioneering work John D Greenwood Social Epistemology *The Routledge Companion to Twentieth Century Philosophy* Dermot Moran, 2008-10-27 The twentieth century was one of the most significant and exciting periods ever witnessed in philosophy characterized by intellectual change and development on a massive scale The Routledge Companion to Twentieth Century Philosophy is an outstanding authoritative survey and assessment of the century as a whole Featuring twenty two chapters written by leading international scholars this collection is divided into five clear parts and presents a comprehensive picture of the period for the first time major themes and movements logic language knowledge and metaphysics philosophy of mind psychology and science phenomenology hermeneutics existentialism and critical theory politics ethics aesthetics Featuring annotated further reading and a comprehensive glossary The Routledge Companion to Twentieth Century Philosophy is indispensable for anyone interested in philosophy over the last one hundred years suitable for both expert and novice alike **Semantic Powers** Jonardon Ganeri, 1999 The author defends a conception of language as essentially a means for the reception of knowledge through testimony He finds this account in the work of classical Indian philosophers of language and presents a detailed analysis of their theories Meinongian Logic Dale Jacquette, 2011-07-11 No detailed description available for Meinongian Logic *Subjectivity* Willem van Reijen, Willem G. Weststeijn, 2000 Subjectivity is one of the central issues of twentieth century philosophy literature and art Modernism which discovered the subconscious put an end to the belief in the Cartesian Subject as the autonomous centre of knowledge and self consciousness Instead the subject became something uncontrollable unreliable incomplete and fragmentary The attempts to recapture the unity of the subject led to the existential quest and the flight into ideology nazism communism Postmodernism the cultural movement of the second half of the twentieth century did not consider the subject any longer as an important category Attention was focused on the I and the Other on dialogism and polyphonism Bakhtin Ideology lost its appeal and so did the great stories Lyotard In this issue of Avant Garde Critical Studies the problem of subjectivity in twentieth century culture is discussed from various angles by specialists in the field of philosophy literature film music and

dance      **Towards a History of Consciousness** Vwadek P. Marciniak, 2006 Towards a History of Consciousness Space Time and Death offers a cogent and compelling discussion of the neglected topic of the history of consciousness An analysis of our postmodern ontology reveals deep but neglected roots What are those roots and how did they grow Is there a self without consciousness What is the relation of the self to the individual Does the recognition of death contribute to the growth of consciousness As a survey of western history this work pushes the boundaries of the understanding of consciousness in intriguing and sometimes provocative directions This integrative study is intended for the serious curious student and thinker

**The Phenomenal and the Representational** Jeffrey Speaks, 2015 This title is about two kinds of properties of perceiving subjects their phenomenal properties and their representational properties It focuses on three questions What are phenomenal properties What are representational properties What is the relationship between phenomenal and representational properties

**Cognition, Content, and the a Priori** Robert Hanna, 2015 Robert Hanna works out a unified contemporary Kantian theory of rational human cognition and knowledge which develops new lines of thought in philosophy of perception Along the way he provides original accounts of intentionality sense perception and perceptual knowledge the analytic synthetic distinction the nature of logic and the a priori

**Qualitative Consciousness** Josh Weisberg, 2022-10-20 Qualitative consciousness is conscious experience marked by the presence of sensory qualities like the experienced painfulness of having a piano dropped on your foot or the consciousness of seeing the brilliant reds and oranges of a sunset Over his career philosopher David Rosenthal has defended an influential theoretical approach to explaining qualitative consciousness This approach involves the development of two theories the higher order thought theory of mental state consciousness and the quality space theory of sensory quality If the problem of explaining qualitative consciousness is divided into two more manageable pieces the door opens to a satisfying explanation of what is seen by some to be an intractable explanatory puzzle This interdisciplinary collection develops criticizes and expands upon themes inspired by Rosenthal's work The result is an exciting collection of new essays by philosophers and scientists which will be of interest to all those engaged in consciousness studies

**Self-Feeling** Gerhard Kreuch, 2019-11-11 This monograph offers new insights into the connection between self consciousness and emotion It focuses on what fundamental feelings of being tell us about ourselves The results enrich the philosophy of human affectivity and help shed new light on some pressing current problems The author seeks to understand self consciousness as an affective phenomenon namely as self feeling He identifies it as a pre reflective pre propositional bodily feeling that shapes our space of possibilities It is the affective disclosure of individual existence His account overcomes the difficulties of infinite regress and vicious circularity that reflective or higher order accounts of self consciousness struggle with At the same time it helps build a bridge between the basic level of self consciousness and the higher level of more substantial thoughts about oneself The title explores fundamental affectivity Matthew Ratcliffe's theory of existential feelings features of self feeling and appropriateness and inappropriateness in self

interpretation It also considers the contributions of the Heidelberg School of self consciousness to current debates The title provides students and researchers with a unique look into such vital philosophical questions as What is self consciousness How do we know ourselves It will also appeal to a wider audience interested in self consciousness and or human affectivity since it does not presuppose knowledge of the jargon
