The Florentine Magnates Lineage And Faction In A Medieval Commune:

The Florentine Magnates Carol Lansing, 2014-07-14 In the 1290s a new guild based Florentine government placed a group of noble families under severe legal restraints on the grounds that they were both the most powerful and the most violent and disruptive element in the city In this colorful portrayal of civic life in medieval Florence Carol Lansing explores the patrilineal structure and function of these urban families known as magnates She shows how they emerged as a class defined not by specific economic interests but by a distinctive culture During the earlier period of weaker civic institutions these families built their power by sharing among themselves crucial resources forts political alliances ecclesiastical rights Lansing examines this activity as well as the responses patrilineal strategies drew from women who were excluded from inheritance and full lineage membership In looking at the elements of this culture which emphasized private military force knighthood and faction Lansing argues that the magnates tendency toward violence derived from a patrician youth culture and from the instability inherent in the exaggerated use of patrilineal ties In describing the political changes of the 1290s she shows how some families eventually dropped the most stringent aspects of patrilineage and exerted their influence through institutions and patronage networks Originally published in 1991 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Florentine Magnates Carol Lansing, 1991-01-01 [Communes and Despots in Medieval and Renaissance Italy](#) John E. Law, 2016-12-05 Building on important issues highlighted by the late Philip Jones this volume explores key aspects of the city state in late medieval and Renaissance Italy particularly the nature and quality of different types of government It focuses on the apparently antithetical but often similar governmental forms represented by the republics and despotisms of the period Beginning with a reprint of Jones s original 1965 article the volume then provides twenty new essays that re examine the issues he raised in light of modern scholarship Taking a broad chronological and geographic approach the collection offers a timely re evaluation of a question of perennial interest to urban and political historians as well as those with an interest in medieval and Renaissance Italy

Suitable as an introductory text for undergraduate courses in Medieval Studies and Medieval European History **War, Culture and Society in Renaissance Venice** John Rigby Hale, David Chambers, Cecil H. Clough, Michael Mallett, 1993-01-01 While the majority of these essays are about wars fought against Venice's enemies or on the building and defence of Venetian and other fortifications there are also essays on other aspects of Venetian life and art on Giorgione's earliest work on the career of a Venetian pope on the building of the Ca d'Oro and on the Diarii of Marino Sanuto *Gender, Honor, and Charity in Late Renaissance Florence* Philip Gavitt, 2011-08-22 This book examines the important social role of charitable institutions for women and children in late Renaissance Florence Wars social unrest disease and growing economic inequality on the Italian peninsula displaced hundreds of thousands of families during this period In order to handle the social crises generated by war competition for social position and the abandonment of children a series of private and public initiatives expanded existing charitable institutions and founded new ones Philip Gavitt's research reveals the important role played by lineage ideology among Florence's elites in the use and manipulation of these charitable institutions in the often futile pursuit of economic and social stability Considering families of all social levels he argues that the pursuit of family wealth and prestige often worked at cross purposes with the survival of the very families it was supposed to preserve Violence and Justice in Bologna Sarah Rubin Blanshei, 2018-04-02 This collection of essays offers a unique contribution to the study of violence and justice in a late medieval and early modern Italy by combining a multivocal perspective with a case study focus on the city state of Bologna Drawing on the city's singularly rich archival resources the authors explore various facets of violence ranging from the interpersonal to the less frequently studied typologies of blasphemy rape political rebellion and student brawls and set the institutions of the police and law courts into their socio political and cultural contexts They also apply a broad variety of quantitative and qualitative approaches processual microhistorical legalism comparative and criminological to their assessments of the procedures and practices of criminal justice and the experiences of violent behavior providing both short term in depth analyses of specific events and over arching reviews of long term trends Bologna itself with its renowned university economic innovations strategic importance as a commercial and cultural crossroads its political volatility and experiments with diverse constitutional structures provides a rewarding laboratory for analyzing changes and continuities in late medieval and early modern violence and justice From these studies emerges a narrative that challenges the traditional portrayal of those periods as eras when brutality and rage were normal in social relations and criminal justice was characterized mainly by punitive strategies of torture and repression Power & Purity Carol Lansing, 1998-02-12 Catharism was a popular medieval heresy based on the belief that the creation of humankind was a disaster in which angelic spirits were trapped in matter by the devil Their only goal was to escape the body through purification Cathars denied any value to material life including the human body baptism and the Eucharist even marriage and childbirth What could explain the long popularity of such a bleak faith in the towns of southern France and Italy Power and Purity explores the place of

cathar heresy in the life of the medieval Italian town of Orvieto Based on extensive archival research it details the social makeup of the Cathar community and argues that the heresy was central to the social and political changes of the 13th century The late 13th century repression of Catharism by a local inquisition was part of a larger redefinition of civic and ecclesiastical authority Author Carol Lansing shows that the faith attracted not an alienated older nobility but artisans merchants popular political leaders and indeed circles of women in Orvieto as well as Florence and Bologna Cathar beliefs were not so much a pessimistic anomaly as a part of a larger climate of religious doubt The teachings on the body and the practice of Cathar holy persons addressed questions of sexual difference and the structure of authority that were key elements of medieval Italian life The pure lives of the Cathar holy people both male and female demonstrated a human capacity for self restraint that served as a powerful social model in towns torn by violent conflict This study addresses current debates about the rise of persecution and argues for a climate of popular toleration Power and Purity will appeal to historians of society and politics as well as religion and gender studies

Crying in the Middle Ages Elina Gertsman,2012-02-20 Sacred and profane public and private emotive and ritualistic internal and embodied medieval weeping served as a culturally charged prism for a host of social visual cognitive and linguistic performances Crying in the Middle Ages addresses the place of tears in Jewish Christian and Islamic cultural discourses providing a key resource for scholars interested in exploring medieval notions of emotion gesture and sensory experience in a variety of cultural contexts

Gertsman brings together essays that establish a series of conversations with one another foregrounding essential questions about the different ways that crying was seen heard perceived expressed and transmitted throughout the Middle Ages In acknowledging the porous nature of visual and verbal evidence this collection foregrounds the necessity to read language image and experience together in order to envision the complex notions of medieval crying
