renewable fuel alternatives have been suggested accompanied by imaginaries of how these technologies will contribute to a better future These imaginaries have a wide ranging impact because the implementation of each alternative technology will require the build up of multifarious socio technical ensembles that support their use As a result replacing fossil fuels with these renewable alternatives is likely to be a complex process This dissertation considers the emergence of two such visions of renewable fuels studying imaginaries of biogas and electricity in the Swedish context Biogas has a long history of use as a transport fuel in Sweden where although it makes up a small percentage of total fuel use it also forms the basis of numerous municipal public transport systems Meanwhile electric vehicles have become increasingly attractive as more actors subscribe to an imaginary that sees the future of vehicles as shared autonomous and electric This interaction is exemplified in urban public transportation as many municipalities begin to implement electric buses in an attempt to increase energy efficiency and reduce pollution This thesis follows three case studies where the imaginaries of biogas and electric vehicles interact urban public transport in the municipalities of Linköping and Malmö and analysis of a comprehensive national policy document Fossil fuel freedom on the road It contributes to a wider understanding of how visions can influence obduracy and change of transport alternatives within the wider transformation to a fossil fuel free future

Divine Providence Bruce R. Reichenbach, 2016-09-08 We ask God to involve himself providentially in our lives yet we

cherish our freedom to choose and act Employing both theological reflection and philosophical analysis the author explores how to resolve the interesting and provocative puzzles arising from these seemingly conflicting desires He inquires what sovereignty means and how sovereigns balance their power and prerogatives with the free responses of their subjects Since we are physically embodied in a physical world we also need to ask how this is compatible with our being free agents Providence raises questions about God s fundamental attributes The author considers what it means to affirm God s goodness as logically contingent how being almighty interfaces with God s self limitation and the persistent problems that arise from claiming that God foreknows the future Discussion of these divine properties spills over into the related issues of why God allows or even causes pain and suffering why if God is all knowing we need to petition God repeatedly and encounter so many unanswered prayers and how miracles as ways God acts in the world are possible and knowable Throughout the author looks at Scripture and attends to how providence deepens our understanding of God and enriches our lives
