## **The Futurist Imagination:**

*Futurism and the Technological Imagination* Günter Berghaus, 2009 This volume *Futurism and the Technological Imagination* results from a conference of the International Society for the Study of European Ideas in Helsinki It contains a number of re written conference contributions as well as several specially commissioned essays that address various aspects of the Futurists relationship to technology both on an ideological level and with regard to their artistic languages In the early twentieth century many art movements vied with each other to overhaul the aesthetic and ideological foundations of arts and literature and to make them suitable vehicles of expression in the new Era of the Machine Some of the most remarkable examples came from the Futurist movement founded in 1909 by Filippo Tommaso Marinetti By addressing the full spectrum of Futurist attitudes to science and the machine world this collection of 14 essays offers a multifaceted account of the complex and often contradictory features of the Futurist technological imagination The volume will appeal to anybody interested in the history of modern culture art and literature

*The Futurist Moment* Marjorie Perloff, 2003-12-03 This volume examines the flourishing of Futurist aesthetics in the European art and literature of the early twentieth century Futurism was an artistic and social movement that was largely an Italian phenomenon though there were parallel movements in Russia England and elsewhere The Futurists admired speed technology youth and violence the car the airplane and the industrial city all that represented the technological triumph of humanity over nature This work looks at the prose visual art poetry and the manifestos of Futurists from Russia to Italy The author reveals the Movement's impulses and operations tracing its echoes through the years to the work of postmodern figures like Roland Barthes This updated edition reexamines the Futurist Moment in the light of a new century in which Futurist aesthetics seem to have steadily more to say to the present

Back to the Futurists Elza Adamowicz, Simona Storchi, 2015-11-01 In 1909 the Italian poet Filippo Tommaso Marinetti's Founding Manifesto of Futurism was published on the front page of *Le Figaro* Between 1909 and 1912 the Futurists published over thirty manifestos celebrating speed and danger glorifying war and technology and advocating political and artistic revolution This collection of essays aims to reassess the activities of the Italian Futurist movement from an international and interdisciplinary perspective focusing on its activities and legacies in the field of poetry painting sculpture theatre cinema advertising and politics The essays offer exciting new readings in gender politics aesthetics historiography intermediality and interdisciplinarity They explore the works of major players of the movement as well as its lesser known figures and the often critical impact of Futurism on contemporary or later avant garde movements such as Cubism Dada and Vorticism The publication will be of interest to scholars and students of European art literature and cultural history as well as to the informed general public

**The Futurist Files** Iva Glisic, 2018-10-26 Futurism was Russia's first avant garde movement Gatecrashing the Russian public sphere in the early twentieth century the movement called for the destruction of everything old so that the past could not

hinder the creation of a new modern society Over the next two decades the protagonists of Russian Futurism pursued their goal of modernizing human experience through radical art The success of this mission has long been the subject of scholarly debate Critics have often characterized Russian Futurism as an expression of utopian daydreaming by young artists who were unrealistic in their visions of Soviet society and naïve in their comprehension of the Bolshevik political agenda By tracing the political and ideological evolution of Russian Futurism between 1905 and 1930 Iva Glisic challenges this view demonstrating that Futurism took a calculated and systematic approach to its contemporary socio political reality This approach ultimately allowed Russia's Futurists to devise a unique artistic practice that would later become an integral element of the distinctly Soviet cultural paradigm Drawing upon a unique combination of archival materials and employing a theoretical framework inspired by the works of philosophers such as Lewis Mumford Karl Mannheim Ernst Bloch Fred Polak and Slavoj Žižek *The Futurist Files* presents Futurists not as blinded idealists but rather as active and judicious participants in the larger project of building a modern Soviet consciousness This fascinating study ultimately stands as a reminder that while radical ideas are often dismissed as utopian and impossible they did and can have a critical role in driving social change It will be of interest to art historians cultural historians and scholars and students of Russian history

**International Futurism in Arts and Literature** Günter Berghaus, 2000 This publication offers for the first time an interdisciplinary and comparative perspective on Futurism in a variety of countries and artistic media 20 scholars discuss how the movement shaped the concept of a cultural avant garde and how it influenced the development of modernist art and literature around the world *Nihilist Order* Professor David Ohana, 2016-04-19 The explosive combination of nihilist leanings together with a craving for totalitarianism was an ideal of philosophers cultural critics political theorists engineers architects and aesthetes long before it materialised in flesh and blood not only in technology but also in fascism Nazism bolshevism and radical European political movements *The Nihilist Order* originally published in three hardcover volumes and now published in a consolidated paperback edition with an encompassing new Introduction inspired excellent review endorsements both amongst the academic and public spheres and has been heralded as a great achievement in European intellectual and cultural history *Technoculture and Critical Theory* Simon Cooper, 2003-08-29 The author explores the work of major thinkers and cultural movements that have grappled with the complex relationship between technology politics and culture Subjects such as the Internet cloning warfare fascism and Virtual Reality are placed within a broad theoretical context which explores how humanity might through technology establish a more ethical relationship with the world Examining the philosophy of writers such as Heidegger Benjamin Lyotard Virilio and Žižek and cultural movements such as Italian Futurism this book marks a timely intervention in critical theory debates The broad scope of the book will be of vital interest to those in the fields of philosophy critical theory cultural studies politics and communications *Art on the Edge* Harold Rosenberg, 1983-06-15 Discusses the aesthetic orientations and creative directions of prominent contemporary artists

Lawrence and Italian Futurism Andrew Harrison, 2003 The significance of D H Lawrence's reading of two Italian Futurist volumes in the summer of 1914 is widely acknowledged but the nature of its significance has not been more closely examined nor traced through his major fictional and discursive writings of the Great War and its aftermath D H Lawrence and Italian Futurism addresses the oversight firstly by examining the context to Lawrence's now famous June 1914 letters concerning Futurism secondly by placing Futurism and Lawrence's interest in Futurism in the light of the movement's intellectual indebtedness to nineteenth century Naturalism and thirdly by providing new readings of *The Rainbow* *Women in Love* and *Studies in Classic American Literature* which draw on these contextual materials The book's form will make it attractive to scholars and students of European modernism as well as to those interested in the works of D H Lawrence      **Phenomenology of Life - From the Animal Soul to the Human Mind** Anna-Teresa Tymieniecka, 2007-08-23 Transcendental phenomenology presumed to have overcome the classic mind/body dichotomy in terms of consciousness yet according to progress in scientific studies the biological functions of the brain seem to appropriate significant functions attributed traditionally to consciousness Should we indeed dissolve the specificity of human consciousness by explaining human experience in its multiple sense-giving modalities through the physiological functions of the brain The present collection of studies addresses this crucial question challenging such naturalizing reductionism from multiple angles In search for the roots of The Specifically Human Experience Bombala moving along the line of Animality and Intellection Gosetti Ferencei Naturalistic Attitude and Personalistic Attitude Villela Petit and numerous other perspectives we arrive at a novel proposal to explain the scholar functional differentiation of conscious modalities We reach their source in the ontopoietic thread conducting the Logos of Life in its stepwise Evolutionary Unfolding Carmen Cozma and in sentience as its quintessential core of further irreducible continuity Tymieniecka dispelling dichotomies and reductionisms      **Modern Visual Poetry** Willard Bohn, 2001 Far from frivolous playthings modern visual poems represent serious experiments Together with other members of the avant-garde the visual poets sought to restructure the basic vision of reality that they inherited from their predecessors This statement describes contemporary visual poets as well who like their earlier colleagues strive to say things that are more meaningful in ways that are more meaningful
