Situating Composition Composition Studies And The:

Situating Composition Ede, Lisa, 2004 Responding to a growing pedagogical paralysis in debates over the nature and status of composition studies as an academic discipline Lisa Ede offers a provocative inquiry into the politics of composition's place in the academy The result is a timely and engaging reflection on the rhetoric ideology and ethics of scholarship and instruction in composition studies today Composition Studies in the New Millennium Lynn Z. Bloom, Donald A.

Daiker, Edward Michael White, 2003 *Exploring Composition Studies* Kelly Ritter, Paul Kei Matsuda, 2012-04-30 Kelly Ritter and Paul Kei Matsuda have created an essential introduction to the field of composition studies for graduate students and instructors new to the study of writing The book offers a careful exploration of this diverse field focusing specifically on scholarship of writing and composing Within this territory the authors draw the boundaries broadly to include allied sites of research such as professional and technical writing writing across the curriculum programs writing centers and writing program administration Importantly they represent composition as a dynamic eclectic field influenced by factors both within the academy and without The editors and their sixteen seasoned contributors have created a comprehensive and thoughtful exploration of composition studies as it stands in the early twenty first century Given the rapid growth of this field and the evolution of its research and pedagogical agendas over even the last ten years this multi vocal introduction is long overdue

Bibliographic Research in Composition Studies Vicki Byard, 2009-10-02 Bibliographic Research in Composition Studies is a student friendly guide to how knowledge is constructed and disseminated in composition studies as well as a thorough handbook on how to conduct bibliographic research in the discipline Student readers are taught Stephen North's taxonomy of scholarship empirical research and practice so that they can better contextualize the sources they read and they learn the unique ways that some genres of publication function in composition studies The book also leads students through the entire process of completing a bibliographic assignment **The SAGE Handbook of Rhetorical Studies** Andrea A. Lunsford, Kirt H. Wilson, Rosa A. Eberly, 2008-10-29

The SAGE Handbook of Rhetorical Studies surveys the latest advances in rhetorical scholarship synthesizing theories and practices across major areas of study in the field and pointing the way for future studies Edited by Andrea A Lunsford and Associate Editors Kirt H Wilson and Rosa A Eberly the Handbook aims to introduce a new generation of students to rhetorical study and provide a deeply informed and ready resource for scholars currently working in the field

Situating Writing Processes Hannah J. Rule, 2019 Situating Writing Processes adds a physical and material dimension to the writing process histories theory and pedagogy in composition studies Shifting contemporary process teaching away from routine sameness and strategy and toward responsivity difference and improvisation this book helps writing teachers reimagine a critical pedagogical concept and position student writers to locate composing within dynamic and unforeseen contexts *Research on Composition* Peter Smagorinsky, 2006

Covering the period between 1984 and 2003 this authoritative sequel picks up where the earlier volumes Braddock et al 1963 and Hillocks 1986 now classics in

the field left off It features a broader focus that goes beyond the classroom teaching of writing to include teacher research second language writing rhetoric home and community literacy workplace literacy and histories of writing Each chapter is written by an expert in the area reviewed and covers both conventional written composition and multimodal forms of composition including drawing digital forms and other relevant media Research on Composition is an invaluable road map of composition research for the next decade and required reading for anyone teaching or writing about composition today

Microhistories of Composition Bruce McComiskey, 2016-04-01 Writing studies has been dominated throughout its history by grand narratives of the discipline but in this volume Bruce McComiskey begins to explore microhistory as a way to understand enrich and complicate how the field relates to its past Microhistory investigates the dialectical interaction of social history and cultural history enabling historians to examine uncommon sites objects and agents of historical significance overlooked by social history and restricted to local effects by cultural history This approach to historical scholarship is ideally suited for exploring the complexities of a discipline like composition Through an introduction and eleven chapters McComiskey and his contributors including major figures in the historical research of writing studies such as Louise Wetherbee Phelps Kelly Ritter and Neal Lerner develop focused narratives of particular significant moments or themes in disciplinary history They introduce microhistorical methodologies and illustrate their application and value for composition historians contributing to the complexity and adding momentum to the emerging trend within writing studies toward a richer reading of the field's past and future Scholars and historians of both composition and rhetoric will appreciate the fresh perspectives on institutional and disciplinary histories and larger issues of rhetorical agency and engagement enacted in writing classrooms that are found in *Microhistories of Composition* Other contributors include Cheryl E Ball Suzanne Bordelon Jacob Craig Matt Davis Douglas Eyman Brian Gogan David Gold Christine Martorana Bruce McComiskey Josh Mehler Annie S Mendenhall Kendra Mitchell Antony N Ricks David Stock Kathleen Blake Yancey Bret Zawilski and James T Zebroski

Contemporary Composition Studies Edith Babin, Kimberly Harrison, 1999-12-30 Composition studies is a rapidly growing and constantly changing field At present however graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field's development Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline The first part of the book provides entries for leaders in composition studies Each entry identifies the areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person's contributions and a bibliography of representative works The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline The

entries for the terms show how the disciplinary context has shaped the ways in which they have been used The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms provide examples of the terms in context and list scholars often associated with them An appendix includes entries for scholars from other disciplines who have contributed to the field The Lure of Literacy Michael Harker, 2014-12-03 readers of LiCS will find a strong argument for how understandings of literacy are fundamental to the work that compositionists do making this book useful not only to those doing similar work but also to be shared with colleagues who have less familiarity with literacy studies The Lure of Literacy presents a model of how theories of literacy can be applied to the debates that beset compositionists again and again offering a way out of their unproductive cycles Literacy in Composition The Lure of Literacy promises to transcend the stale and unproductive debate on freshman composition that has gripped English studies for more than a century It is the first book to chart the origin of the discussion from the early twentieth century to the advent of the New Literacy Studies Michael Harker recontextualizes proposals to abolish compulsory composition and reimagines pedagogical conditions in English studies in order to present a different model for first year writing This new model for compulsory composition programs focuses on students attitudes about composition and interrogates the very idea of literacy itself
