Social And Personality Development From Infancy Through Adolescence:

Social and Personality Development Tina Abbott, 2005-10-26 Social and Personality Development looks at the processes by which we come to be who we are. It covers a range of topics central to personality and developmental psychology. The book is arranged in three sections: the first covering the main theories of personality, the second describing the development of gender, and the third focusing on adolescence. It is suitable for the AQA A2 Level examination but will also be of interest to those studying education, nursing, and other related disciplines.

Childhood Socialization Gerald Handel, 2020-10-14 This book presents a selection of studies that together convey how the agents of socialization operate to induct the human child into society. It is most fully devoted to socialization in the United States.

The Self-system Annerieke Oosterwegel, Louis Oppenheimer, 2013-05-13 This book presents a longitudinal study dealing with developmental changes within and between self-concepts and their relation to personal functioning. Within the psychological literature and the developmental literature, in particular, the interest in the ideas people hold about themselves and their relation with personal functioning is rapidly growing. This interest is reinforced by the emphasis on individuality in Western society. The self-system is now thought to consist of a collection of self-concepts in which a distinction is made between domain-specific self-concepts (the real and ideal and context-related self-concepts: the academic, the athletic, and the social). It is also considered to be subjective rather than objective. This subjective self involves characteristics such as continuity and distinctiveness from others. These characteristics have been the primary focus of recent research. In existing literature on the development of the self-system, little is known about the structural characteristics that is developmental changes in the interrelationships among domain-specific and context-related self-concepts or between and within self-concepts. Similarly, little information is available about the relationships between individuals' real and ideal self-concepts, their perceived concepts of others, and the actual ideas others have about the same individuals. This book integrates hitherto separate and different components or aspects of self-knowledge into one encompassing multidimensional self-system.
