Families, History And Social Change Tamara K Hareven, Barbara Trepagnier, 2018-03-05 One of the prevailing myths about the American family is that there once existed a harmonious family with three generations living together and that this ideal family broke down under the impact of urbanization and industrialization The essays in this volume challenge this myth and provide dramatic revisions of simplistic notions about change in the American family Based on detailed research in a variety of sources including extensive oral history interviews of ordinary people these essays examine major changes in family life dispel myths about the past and offer new directions in research and interpretation The essays cover a wide spectrum of issues and topics ranging from the organization of the family and household to the networks available to children as they grow up to the role of the family in the process of industrialization to the division of labor in the family along gender lines and to the relations between the generations in the later years of life While discussing family relations in the past and revising prevailing notions of social change these interdisciplinary essays also provide important perspectives on the present

Social Change and the Life Course: Sociological lives American Sociological Association. Meeting, 1988 **Social Change and the Life Course** Matilda White Riley, 1988 *Social Dynamics of the Life Course* Walter R. Heinz, Victor W. Marshall, In the last two decades research on the life course has successfully combined and integrated different and rather isolated fields of social concerns such as the labor market family solidarity education employment retirement and social policy It has also developed a special focus on crucial problems of sociological research which includes the understanding of micromacro phenomena the dynamics of social change and international comparisons Contributors to this volume take an international comparative approach in applying the life course theoretical framework to issues of work and career Life course research focuses on the relationship between institutions and individuals across the life span and illuminates the impact of modernization on the shaping of biographies Industrial service societies are characterized by historically new contingencies of living arrangements and biographies These contingencies differ according to the extent to which life course patterns are regulated by social institutions In the continental European context institutional frameworks continue to define the timing and sequencing of transitions across the life course In less regulated market societies like the United States and Great

Britain biographies and living arrangements are shaped more by the interaction of markets social networks and individual decisions In active welfare states institutional resources and rules continue to mediate the effects of social change on the life course What the editors and contributors to this fine compendium anticipate is a change on the cultural level toward more equality This trend supports young people and women in particular in their expectations concerning an egalitarian relationship This expectation is not taken for granted from the point of view of the male partner but has to be negotiated in decisionmaking processes as an issue that concerns the couple as a unit Thus the way in which people interact is profoundly impacted by the values and goals of equity demands Walter R Heinz is professor of sociology and social psychology and director Graduate School of Social Sciences University of Bremen Victor W Marshall is professor of sociology and director of the Institute on Aging University of North Carolina at Chapel Hill Carolina
