

Computer Vision and Legal, social, ethical and professional (LSEP) Issues and Challenges

Abstract— The field of computer vision has seen rapid advancements in recent years, with applications ranging from image recognition and object detection to autonomous vehicles and medical diagnostics. However, along with technological progress, there is a growing recognition of the legal, social, ethical, and professional (LSEP) issues and challenges associated with the deployment of computer vision systems. This paper provides an overview of the key LSEP considerations in the development and implementation of computer vision technologies. It explores legal issues related to privacy, data protection, intellectual property, and liability. Additionally, it discusses social implications such as biases in datasets and algorithmic decision-making, as well as ethical dilemmas surrounding surveillance, consent, and fairness. Furthermore, it addresses professional responsibilities, including transparency, accountability, and the ethical use of AI technologies. By examining these LSEP issues and challenges, this paper aims to foster a deeper understanding of the complex interplay between technology and society and to inform the development of responsible and sustainable computer vision solutions.
