such a strategy is imprecise History subjectivity bias and prejudice are difficult to temper to the needs of either economic development or social justice The taste smell sounds and architecture of a place all combine to construct the image of a city For researchers policy makers activists and citizens the challenge is to use or transform this image The objective of this book is to help the reader define understand and apply this process After a war on terror a credit crunch and a recession cities still do matter Even as the de territorialization of the worldwide web enables the free flow of money music and ideas across national borders cities remain important City Imaging Regeneration Renewal Decay surveys the iconography of urbanity and explores what happens when branding is emphasized over living
